Community Wealth Builder

This Report

This report focuses on Bentley ward in the North of Doncaster and consists of four smaller communities as LSOA level: Tollbar and Almholme, Arksey, Bentley and York Road. The report begins with a one-page summary outlining key information and priorities about Bentley ward. The document builds on the initial community profile of 2021 and updated figures have been included where possible. This report shows the initial conversations with communities, including ward members, community organisations, faith groups, residents and other organisations who work in the area. Communities' knowledge of their own areas enables them to identify their strengths and the assets on which they can build on. This document is shared with the intention of supporting those conversations and sharing information that might not be readily available to local people.

Bentley

Low GCSE attainment scores

26.4% of children living in poverty

23.3% of Bentley residents reported to have fair, bad or very bad health

36.2% of the residents of Bentley live alone

Over 95% of the population identify as 'White' and report that their main language spoken is English

26% of year 6 children are classified as obese

Toll Bar

One of the Lowest GCSE attainment scores in Doncaster at 37.7 out of 90

26.4% of children living in **poverty**

24.3% of Toll Bar residents reported to have fair, bad or very bad health

28% of the residents of Toll Bar live alone

3.1% of the community identify as Asian, Asian British or Asian Welsh

26% of year 6 children are classified as obese

Arksey

Highest GCSE attainment sore in Bentley ward (57.1 out of 90)

26.4% of children living in **poverty**

22.7% of Arksey residents reported to have fair, bad or very bad health

29.8% of the residents of Arksey live alone

Over 95% of the population identify as 'White' and report that their main language spoken is English

26% of year 6 children are classified as obese

Almholme & York Road

51.1 out of 90 GCSE attainment score

26.4% of children living in poverty

19.8% York Road residents reported to have fair, bad or very bad health

42.8% of the residents of York Road live alone

Over 95% of the population identify as 'White' and report that their main language spoken is English

26% of year 6 children are classified as obese

One page Summary

Bentley is a suburb located in the North of Doncaster. Bentley consists of four smaller identifiable communities as Lower Super Outlet Areas (LSOA); Bentley, Toll Bar, Arksey, Almholme & York Rd.

People in Bentley have a lower life expectancy and spend more of their lives in poor health than the average person. There is a high prevalence of respiratory conditions, including chronic obstructive pulmonary disease (COPD) and lung cancer. Many residents are living with conditions related to poor lifestyle choices, including smoking (one in four residents smokes) and high levels of physical inactivity.

Mortality rates for respiratory diseases, lung cancer and coronary heart disease are higher than the national and borough averages. There are also significantly higher rates of emergency admissions associated with these conditions, which suggest residents face challenges in self-managing their conditions and rely on emergency care.

The Bentley ward is rich in physical assets such as green spaces, community buildings and a thriving third sector. Within the ward there are two main communities: Bentley and Toll Bar.

Poverty and deprivation are significant challenges in Bentley as well as the higher proportion of unemployed residents. More children are reported to be living in poverty in Bentley in comparison to the average of Doncaster. This could be a contributing factor to the lower school attainment and child development rates in the ward.

Bentley has a higher-than-average proportion of residents from the Gypsy Roma Traveller community. The Doncaster borough has seen an increase in diversity across the borough, with the proportion of white British residents decreasing in 2014; however, Bentley continues to be predominantly white British. The age composition of the population of Bentley and Toll Bar is similar to the average of Doncaster.

The area has a high density of housing, particularly of traditional terrace houses. There is a higher-than-average proportion of socially rented accommodation, and a lower proportion of owner-occupied housing in the area. Bentley has a high percentage of people over 65 years-old living alone compared to the average Doncaster and England. Whilst this does not necessarily mean they are experiencing loneliness, there is an increased risk of isolation.

Key Health Priorities

- Poverty (including child poverty, income deprivation, unemployment, and long-term unemployment)
- Higher mortality rates due to respiratory conditions which can be linked to poor lifestyle behaviours (smoking, alcohol consumption, inadequate dietary intake and physical inactivity)
- Childhood development (including starting well, weight management, physical activity, and school attainment)

Assets

Well Doncaster uses a community-centred approach which allows investment in supporting, working with and empowering communities to facilitate healthier communities. The voice and role of our communities and taking a strengths/assets-based approach to work with individuals, families and communities is crucial to the achievement our overall vision.

Asset Maps

The maps below show different types of assets across Bentley ward. These have been developed using ward boundaries. Bentley has large areas of rural land; therefore, assets tend to cluster in the urbanised areas Bentley and York Road, with limited resources in the Toll Bar, Arksey and Almholme areas. It should be noted that these maps are a starting point in understanding the community and that further work is needed amongst the community to understand all the assets and how they are used.

Community Assets

Bentley community and the tail end of Toll Bar and Almholme is rich in green space and when speaking to residents is one of the greatest assets they identify in their community.

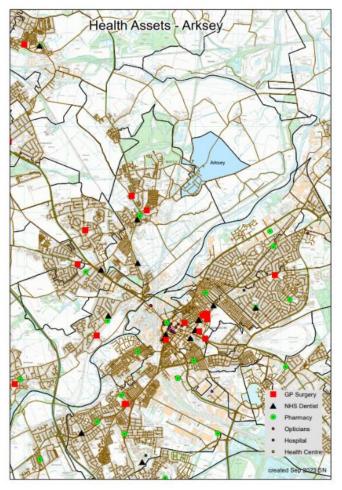

Figure 8. Health Assets in Arksey

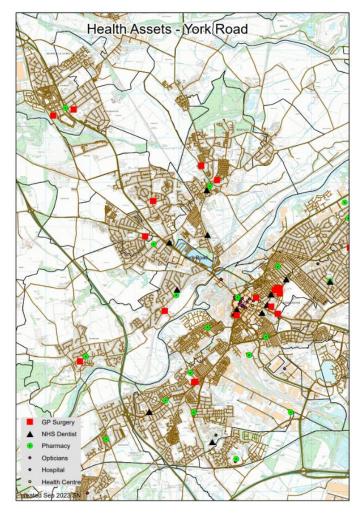

Figure 9. Health Assets on York Road

It is recognised that work is needed in the community to expand the understanding of who, how and what is accessed in the area. Greater knowledge of the identity of each community/ward will allow a more appropriate and effective response to community needs. Bentley and Toll Bar remain as priority areas for North Doncaster and ongoing work will continue to support it.

Assets in the Community

Population Health Management

It is vital to understand the effect and direction the pandemic and cost of living crisis is having on community organisations in the ward so that appropriate and targeted support can be offered, and work can be implemented to manage any gaps or risks associated with changes. To support the former, Well Doncaster officers undertake regular population health management insight with community organisations in Bentley, identifying their current status and needs, and work with each group and partners to meet their goals. This is a living document and will be updated and adapted as needs are met and change. If you would like more detail on this, please contact welldoncaster@doncaster.gov.uk

Health and Wealth

Health inequalities are avoidable differences across the population, and between different groups within society. Health inequalities arise from the conditions in which we live, work and play. These conditions influence our opportunities for good health, how we think, feel and act, therefore shaping our health and wellbeing.

Deprivation

Evidence shows that people living in our most deprived areas face the worse health inequalities in relation to health access, experiences and outcomes. Deprivation covers a range of issues and refers to unmet needs caused by a lack of resources, including but not limited to finances, housing and education. It is measured in different ways including the Indices of Multiple Deprivation (IMD). Bentley remains less deprived with an IMD score of 34.6 in comparison to the borough average of 30.3. The map below, however, shows that Bentley falls within the 10% most deprived communities in Doncaster.

Locality	Ward	Community	IMD19	Rank
South	Conisbrough	Denaby Main	67.85232038	1

Table 1. Index of Multiple Deprivation Rar	nk in 2019 and 2015
--	---------------------

The map below shows that Bentley ward falls within the top 10 most deprived areas in Doncaster at ward level. IMD measures relative levels of deprivation in small areas, called Lower-layer Super Output Areas (LSOA). Data taken at LSAO level suggests deprivation varies considerably amongst communities with Bentley. Toll Bar and Almholme rank the most deprived community in Bentley ward and seventh most deprived community within Doncaster with an IMD score of 49.87 (Table 1). This is followed by Bentley community itself, ranked 16th most deprived community overall in Doncaster with an IMD score of 40.1. York Road (IMD score of 28.9) and Arksey (IMD score of 21.25) are both communities in the Bentley ward boundaries but with significantly lower levels of deprivation.

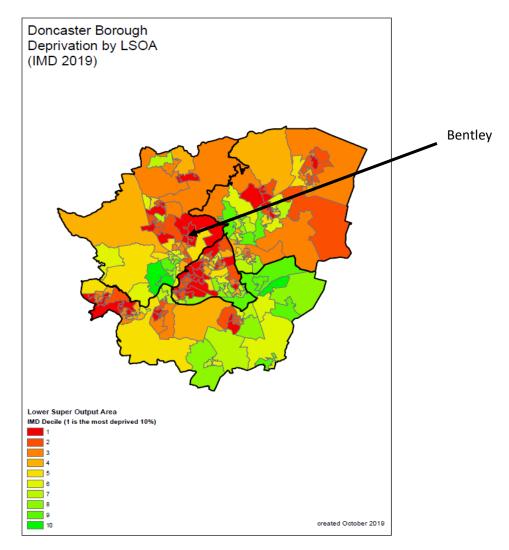

Figure 10. Doncaster Index of Multiple Deprivation changes between 2015-2019

Wealth Inequalities

Many Bentley residents are currently living in poverty across the life course, which reflects the high level of multiple deprivation.

Public Health England data shows there is a higher proportion of residents in Bentley (19.6%) living in deprivation due to low income compared to the Doncaster (16.6%) and national average (12.9%). It should be noted that this data reflects levels of both unemployment rates and working-age adults on low earnings.

Fuel Poverty

Table 2. Rates of Fuel Poverty at LSOA level in Adwick Le Street & Carcroft (Office of National Statistics, 2022)

E010 0758 4	Doncaster 021A	Marshgate	710	125	17.6

Many residents are living in fuel poverty. Fuel poverty is defined as a household living on a lower income that is not deemed reasonable enough to warm a home sufficiently. According to fuel poverty by Parliamentary constituency, North Doncaster has the highest rates of fuel poverty (19.1%) in comparison to Don Valley (15.4%) and Central Doncaster (18.1%). In 2020, 21.9% of adults in Bentley ward were unable to warm their homes to a reasonable standard compared to Doncaster's average (18.8%). Data taken at LSOA level suggests residents living in Bentley Rise

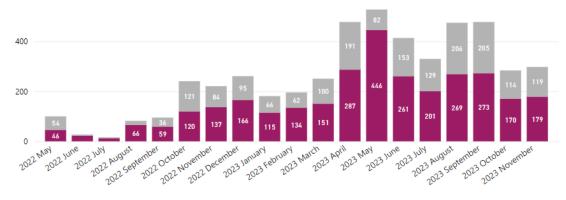

North and Bentley New Village South are facing significantly higher levels of fuel poverty than any other community in Bentley ward.

Older people living in poverty (IDAOPI)

Older people living in poverty (IDAOPI) is another area of concern. In Bentley, 20.3% of older people are currently living in deprivation because of income deprivation. Such poverty can also have detrimental effects on child development. The Income Deprivation Affecting Children Index (IDACI) shows that 26.4% of children are living in households affected by low incomes compared to Doncaster (22.7%) and England's (17.1%) average.

Food Poverty

There are 8 active foodbanks in the North locality of Doncaster. Seventh Day Adventist, Bentley Baptist Church and Manna Community CIC all provide foodbanks for Bentley residents. Cost of Living Crisis, Low income, Benefit Changes, Debt and Benefit delays are the top 5 reasons for residents accessing support from foodbanks across Doncaster. Figure 5 shows demand for food support has increased since April 2022 across North of Doncaster. An average of 164 adults are supported by food parcels every month in North of Doncaster, whilst 97 children are supported by food parcels every month. It must be noted that this data does highlight where residents are accessing support, and therefore it is unknow where food poverty is more prevalent.

Adults
 Children

Employment

According to the 2021 Census, over half of the population (55.7%) are not in employment, with 31.7% of these residents having never worked. There is a significantly higher proportion of working age adults currently unemployed and claiming out of work benefits in Bentley ward (7.1%) in comparison to the average of England (5%) and Doncaster (6.1%). This is also reflected in the high proportion of residents aged over 16 years of age (41.8%) who are economically inactive in comparison to England (39.1%). Given the coronavirus pandemic was declared in early 2020 and this data was taken across 2021/22, rates of short-term unemployment may reflect the increased levels of job losses during this time.

Of those employed, the highest proportion of people in Bentley are employed in elementary occupations (19.1%), which is nearly double the amount of people when compared to England (10.5%). Those employed in highly skilled occupations such as managers, directors and senior officials are significantly lower across Bentley ward (8.3%) in comparison to Doncaster (10.2%) and England (12.9%). Additionally, there are very few people employed in professional occupations in Bentley (9.5%), which is significantly lower than England (20.3%). Skilled trades occupations (12.4%) make up the second largest proportion of employment rates in Bentley. This highlights the need for development in employment, skills and training opportunities available to Bentley residents.

A high proportion of residents in employment have less than 10km to travel to work (48.8%) compared to Doncaster (41.7%) and England (35.4%) average. However, a considerably higher proportion of adults travel to work by car or van from Bentley (57.9%) compared to Doncaster (57.9%) and England and less than 10% of residents walk or cycle to work. This suggests public health interventions to improve active travel should be a priority in Bentley ward to improve physical activity levels and reduce carbon emissions.

Citizens Advice Doncaster Borough

Citizens advice Doncaster Borough (CADB) are an independent charity and part of the Citizens Advice Network across England and Wales. They provide free, confidential and impartial advice and campaign on money, benefit, housing or employment issues affecting people's lives. There are 185 residents living in Bentley currently accessing CADB. During the 2023/24 fiscal year, Bentley has the highest number of interactions with CADB in the North of Doncaster. Benefits and tax credits, debt, utilities and communications, benefits and universal credits and housing issues are the top 5 issues when seeking support.

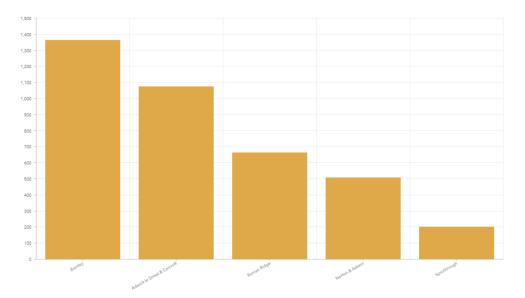

Figure 12. number of interactions with Citizens Advice Doncaster Borough (CADB) during fiscal year 2023/24

Childhood Development

Childhood obesity is significantly higher in Bentley with 25% of children classified as obese at reception age compared to the average of Doncaster (22%). This figure increases to 26% at year 6 and is significantly higher than those reported for England. However, data shows food habits have improved in school aged children over the last 12 months. That is, 71% of children reported to consume fruit and vegetables most or every day of the week in 2021 compared to 63% in 2020. However, 19% of pupils reported to consume takeaways most or every day of the week compared to Doncaster's 13% average. This suggests public health interventions may need to focus on educating school aged children and parents on food choices.

Smoking Exposure

The 2020-21 Pupil Lifestyle Survey which included primary and secondary schools, reported that 47% of school aged children encountered smoking in the home in Bentley ward, which is significantly higher than the Doncaster average of 35%. Evidence suggests growing up in a home where smoking occurs is one of the biggest risk factors to children becoming smokers themselves and may explain the high rates of children that have reported smoking at school-age. That is, 12% of year 8 and 10 children reported they had tried cigarettes or smoking and 19% of pupils reported they have used or tried e-cigarettes in North locality.

Education

At KS4, each pupil is given an Attainment 8 score (a score out of 90) based on their 8 best GCSE grades including English, maths and at least 3 other traditional academic GCSEs (sciences, languages, and humanities). Other qualifications at an equivalent level (e.g., BTECs) can also count towards the score. In 2022, GCSE attainment scores per pupil (out of 90) were varied across Greater Bentley. Arksey (57.1) has the highest scores, closely followed by York Road (51.1) and Norton (50.6), whilst Toll Bar and Almholme (37.7) appeared one of the lowest in Bentley and Doncaster overall. In 2023, 45% of Arksey pupils, 54% of Bentley, Toll Bar and Almholme pupils and 53% of York Road pupils achieved the expected standard in reading, writing, and mathematics at key stage 2, all below the national average (60%).

Health Inequalities

Long-Term Health Conditions

The proportion of residents with poor health in Bentley is considerably greater than the national average. Over 21% of ward residents reported having poor general health compared to an average of 17.6% across England. A total of 23.3% of Bentley residents, 24.3% of Toll Bar residents, 22.7% of Arksey residents and 19.8% York Road residents reported their health to be fair, bad, or very bad health (ONS, 2021).

Long term health conditions derived from poor lifestyle choices, living conditions and physical inactivity are a cause for concern in Bentley. Incidences of cancers are significantly higher in Bentley residents (113 per 100) compared to Doncaster (107 per 100) and England (100 per 100). More specifically, lung cancer rates in Bentley (165 per 200) is the 6th highest rate in Doncaster and considerably higher than the national average (100). Chronic Obstructive Pulmonary Disease (COPD), another lung related

illness, is also the 2nd leading cause of emergency hospital admissions amongst Bentley residents (1230 per 100).

Strokes are the leading cause of emergency hospital admissions with a significant 134.7 per 100 occurring. Additionally, deaths caused by conditions related to poor lifestyle choices are high, particularly deaths occurring in those ages under 75. Deaths caused by cancers (132.9 per 100,00), circulatory disease (119.2 per 100), coronary heart disease (CHD) (149 per 100) and respiratory diseases (153.1 per 100).

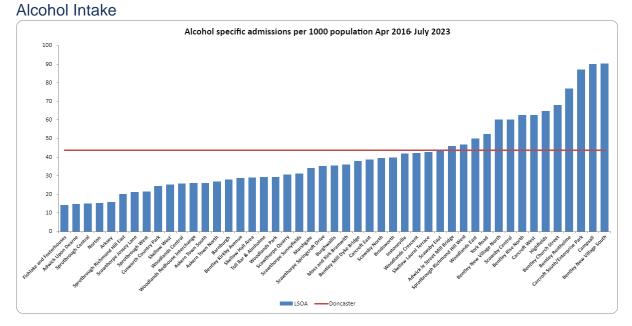

Figure 13. Alcohol Specific Admissions per 1000 population April 2016-2023 (ONS, 2021)

Communities in Bentley have some of the highest rates of alcohol specific admissions in Doncaster (figure 6). Bentley New Village South (90.2 per 1000) has the highest rates in Doncaster, more than double that of Doncaster city (43.6 per 1000). Bentley Rostholme (76.8 per 1000) and Bentley Church Street (67.8 per 1000) are amongst the top 5 highest rates of alcohol related admissions in Doncaster. Bentley Rise North (62.4 per 1000) is placed within the highest 10, whilst York Road (52.2 per 1000) sits as 11th highest in Doncaster.

The Mayflower Medical Practice	6353	544	8.56%	
Barnburgh Surgery	2044	174	8.51%	
Doncaster	274681	49332	17.96%	

According to NHS England (2023), there are 64045 registered patients with Doncaster North Primary Network (PCN) in North of Doncaster, 11,885 of those are registered as smokers. The Ransome Practice has the highest prevalence of smokers registered in the North locality. There are 1519 smokers registered at the GP practice, equating to 22.5% of patients, which is significantly higher than Doncaster overall. It must be noted that such data is taken from self-reported measures when signing up to a GP and so, relies on individuals self-reporting their behaviours. It must also be noted that residents registered at GPs do not necessarily reside in that community and may not truly reflect the prevalence of smoking in specific communities.

Life expectancy

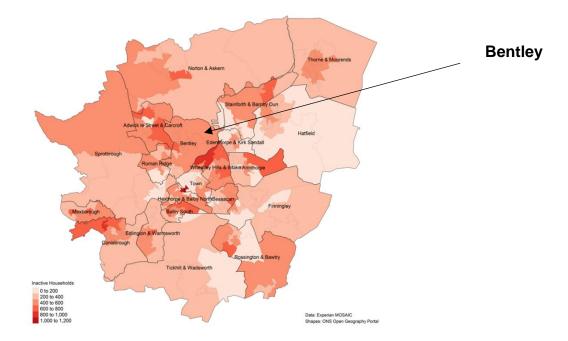

Residents of Bentley have a lower life expectancy and live more years in poor health in comparison to the averages of Doncaster and England. Life expectancies for both males and females are 3 and 5 years lower than the borough and national averages, respectively.

Males have a life expectancy of 75.8 years of age compared to the average of Doncaster 77.9 years of age and England 79.5 years of age. Female life expectancy is 75.8 years, compared to Doncaster's of 81.3 years and England's of 83.2 years of age

The higher levels of deprivation in the area and the higher prevalence of smoking, alcohol consumption and obesity could be driving the differences. Work should be undertaken to fully understand the factors affecting individual's lifestyle choices in Bentley ward and more specifically, within each community of Bentley, Tollbar, Almholme and York Rd.

Physical Activity

Levels of physical activity in Bentley are lower compared to the rest of the borough. This is further illustrated in the map below, which identifies the areas with the highest numbers of inactive households.

Further, the table below shows that Bentley has 883 households that are likely to have high levels of inactivity. This data has been matched to the number of children and young people living in deprived and inactive households. The former data positions Bentley as an area of focus and priority for the Get Doncaster Moving Strategy. The table below shows the number of households in the priority areas of inactive, low incomes and households with children and young people:

Community	Inactive	Low Incomes	C&YP	Total
Adwick le Street	883	877	920	2680
Denaby	951	913	514	2378
Wheatley Park & Wheatley Hills	802	885	667	2354
Bentley	883	692	773	2348
Edlington	667	858	726	2251
New Rossington	673	823	749	2245
Intake	651	781	668	2100
Skellow & Carcroft	594	892	563	2049
Stainforth	618	738	676	2032
Thorne	747	817	367	1931

Table 4. Get Doncaster Moving	Priority communities
-------------------------------	----------------------

Data from the 2021 Pupil Lifestyle Survey indicated that 48% of school-aged children in Bentley reported walking to school. This is higher than the average of Doncaster (46%). Engagement in physical activity via school clubs is 13% which is higher than the rest of the borough. Around 90% of school-aged children reported enjoying physical activity which is 3% lower than the average of Doncaster. For those who reported not enjoying physical activity, the most common reason was 'getting hot and tired' (49%).

Green Spaces and Parks

Bentley ward is rich in green spaces with Bentley Park having won the Green Flag Award for parks in 2017, 2018, 2019 and 2020. Facilities at the park include a playing field, multi-use games area, skate park, toddler and junior play areas, a bowling green and a Pavilion with a sprung dance floor.

Bentley is also home to a Community Woodland with various accessible tracks and a lake. In 2021, the Trans Pennine Trail stretch which connects the Woodland to Bentley Park received £400k investment to the surface. This funding has improved walking and cycling routes as well as horse riding access between Bentley, Toll Bar and the outside of the Bentley ward.

Linden Walk Park in Toll Bar is included in the Get Doncaster Moving Future Parks work and it is expected in late 2023 work will begin to co-design improvements to the park with residents.

Community Information

Population Population Size Bentley ward: 18,200

Bentley: 11,300

Toll Bar & Almholme: 1200

Arksey: 1200

York Road: 710

Ethnicity and Language

Bentley ward does not appear to be very diverse in ethnicity or languages spoken. Over 95% of the population residing in this ward identify as 'White' and report that their main language spoken is English.

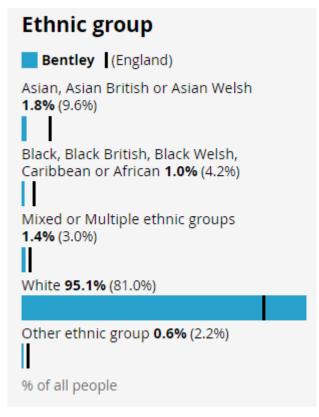

Figure 14. Ethnicity in Bentley Ward (ONS, 2021)

The Census (2021) reports Toll Bar community to have a slightly more diverse population with 3.1% of the community identifying as Asian, Asian British or Asian Welsh. It should still be acknowledged that this is significantly lower than the rest of England (9.6%).

Age Profile

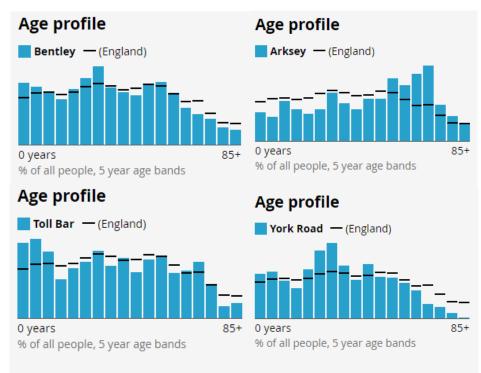

Figure 15. Age profile in Bentley ward (ONS, 2021)

Bentley as a ward has a similar aged population to the rest of England. However, there are differences within each community. Figure 15 shows that Toll Bar and York Road, have a significantly younger than average population. There are more children aged 15 and under in Toll Bar and working age adults in York Road contributing to this. Arksey has an older than average population, with a larger proportion of adults aged 55-85 residing in the community. whilst Carcroft has a much younger population. There are similar numbers of males and females within each age group category.

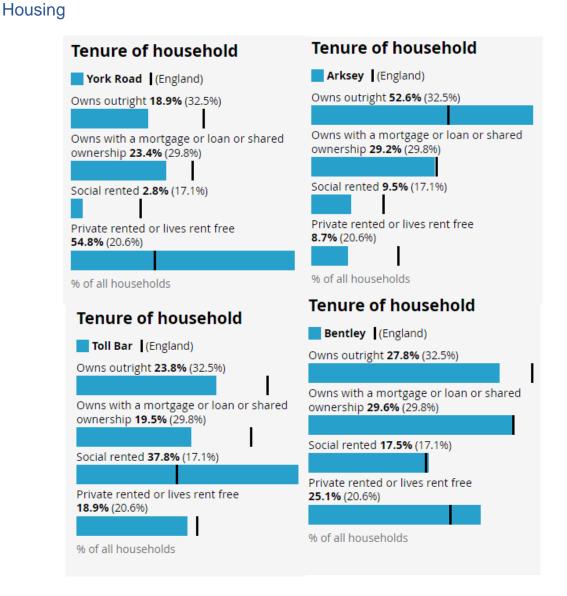

Figure 16. Tenure of Households in York Road, Arksey, Toll Bar and Bentley (ONS, 2021)

A larger proportion of residents own their house outright in Arksey (52.6%), compared to the other communities in the ward and the national average. There are more socially rented properties in Toll Bar (37.8%), which is considerably higher than the rest of Doncaster and England. There are considerably fewer properties that are privately rented in Arksey, whilst York Road and Bentley have significantly more to the rest of Doncaster.

The majority of households comprise of single-family units in Bentley (58.6%), Arksey (66.3%), Toll Bar and Almholme (64.9%) and York Road (54%). However, there is a large proportion of one-person households in Bentley (36.2%) and York Road (42.8%). Whilst Toll Bar (28%) and Arksey (29.8%) have similar rates to the rest of Doncaster. This would suggest social isolation is a priority for Doncaster. Living alone can increase the risk of a number of physical and mental health issues and thus, ensuring these individuals have the support required to live a health and fulfilling life is important.

Anti-Social Behaviour

North locality reported the lowest number of ASB, hate crime and low-level crimes during the first 6 months of 2023/24. Figure 17 shows that Bentley had the second highest rates of crime and ASB across the North Locality.

Figure 17. Number of early interventions, ASB, hate crime and low-level crime issues identified and managed at Locality level (Stronger Communities, Doncaster Council 2023/24)

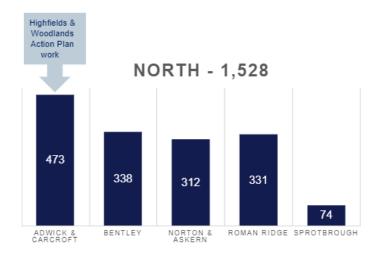

Figure 18. Number of early interventions, ASB, hate crime and low-level crime issues identified and managed at Ward level (Stronger Communities, Doncaster Council 2023/24)

Community Insight

Appreciative Inquiry

The Well Doncaster Team undertake an Appreciative Inquiry within communities to gather insight to support co-designing action plans with the community. The AI questions are structured to pull on the successes of the past and present, to seek new potentials and possibilities and build on those through the Dream and Design stages.

The Appreciative Inquiry will include the following steps:

- 1. **Discovery** This will involve engagement with the residents of Bentley to find out what is working well in the community. Responses will be themed to allow priorities of the community to be established.
- 2. **Dream** Residents and key stakeholders will be invited to attend an initial workshop to discuss what ideas they have for their community and how these will meet the priorities highlighted in the discovery phase.
- 3. **Design** All attendees are invited back for a second workshop to develop an action plan to direct work for the community.
- 4. **Deliver** A collaborative way of working and investing resources in working towards to the actions from the previous phase.

Community insight is captured through community conversations in Bentley, Toll Bar, Arksey, Almholme & York Rd and is an ongoing process throughout the year. Community conversations are had at various community events, meetings and through day-to-day interactions with residents and other key stakeholders in Bentley. A thematic analysis has been undertaken on community conversations had with residents and other key stakeholders of such areas thus far. Response have been developed into a thematic framework for Bentley, including Toll Bar and Almholme, York Road and Arksey. Work is underway in Arksey, Almholme and York Road to fully understand these as communities themselves and develop a thematic framework for each community. All themes identified through this process inform community development and engagement activity moving forward.

Doncaster Talks

In 2019, Doncaster Talks undertook insight across the borough. Responses were separated into wards and thematically analysed. Across Bentley, 136 responses were recorded and the main themes on what people liked about the area, what could be improved, and what the borough should focus on are displayed in the table below:

Locality Plan

Team Doncaster has developed locality plans to look at how we can work together to strengthen communities and improve the lives and opportunities for the residents living there. This plan has been put together with more input and engagement from those living and working in the North locality. Communities have told shared exactly what they want to see change and improve in the areas where they live, and this insight has enabled a workable plan to deliver in conjunction with our communities and partners.

For more information on the North Locality plans, please visit <u>North Locality Plan 2023</u> - <u>Draft Version.pdf (windows.net)</u>

Community Investment

Ward	Total Amount by Ward	Funding Type	Total Amount

Table 6. Community Investment across North Locality (Doncaster Council, 2023)

In the North locality, the sum of investment in community organisations was £804,160.00 as of November 2023 (Power BI, 2023). The main source of grants has been 'Community Wealth Builder Support', followed by 'VCFS Fund and 'Active Communities Grant'.

The top priority for investment in the North was to 'enable positive lifestyle choices including weight management, smoking cessation, physical activity, drug and alcohol misuse', followed by 'children and young people provision', 'support physical activity', and 'community spirit'.

In the Bentley ward, investment totalled £454,900.00 as of November 2023. In total, 22 community organisations have received funding including Bentley Baptist Church and North Doncaster Development Trust. The top priority for investment in the Bentley ward was 'enable positive lifestyle choices including weight management, smoking cessation, physical activity, drug and alcohol misuse'.

Census data 2021

The census is undertaken by the Office for National Statistics every 10 years and gives us a picture of all the people and households in England and Wales.

Build a custom area profile - Census 2021, ONS

Census Maps - Census 2021 data interactive, ONS Public health Data

Public Health Data

Fingertips

This is a new fingertips profile that uses data from Local Health an existing PHE data tool. Local Health is a collection of quality assured health information presented for small geographical areas. By presenting data for small areas, Local Health provides evidence of inequalities within local areas. It supports targeted interventions to reduce such inequalities.

Local Health contains indicators related to:

- Population and demographic factors
- Wider determinants of health
- Health outcomes

It presents data for middle super output areas (MSOA), electoral wards, clinical commissioning groups (CCG), local authorities, and England as a whole.

Please note, as the Local Health tool was designed to allow users to map small area data, a mapping option has not been provided in this profile.

https://fingertips.phe.org.uk/profile/local-health/data#page/0

Local Health - Public Health England - Reports: get a dashboard on a custom area

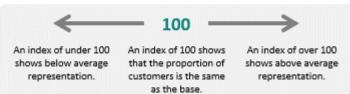

Acorn profiles

Wellbeing Acorn segments the population into 4 groups (Health Challenges; At Risk; Caution; Healthy) and 25 types describing the health and wellbeing attributes of each postcode across the country. By analysing significant social and health related behaviour, it provides precise information and an in depth understanding of upstream issues affected by current lifestyle traits

INTERPRETING THE REPORT

The Wellbeing Acorn profile report helps you understand the underlying demographics, lifestyle and health attributes of your customers and service users by comparing their Wellbeing Acorn profile to a base (e.g. UK population, area or other customer groups).

INDEX

The Wellbeing Acorn Profile contains 12 variables that are indicators of Disability or Infirmity in the population and 9 variables related to unhealthy Behaviours. The average score measured against the base profile of Yorkshire and the Humber is 100. A value above 100 indicates that the area population is overrepresented for this characteristic, below 100 the value is less than the average or underrepresented.

Get Doncaster Moving survey

Mosaic data

Mosaic Public Sector classifies the UK population into one of 66 types and 15 groups through a detailed and accurate understanding of each citizen's demographics, lifestyles, behaviours and location.

The Physically Inactive Population of Doncaster

The Physically Inactive Population of Doncaster

The MOSAIC types who

"Do not exercise" and "Do not take part in Sport" were searched and three priority groups have been identified through work with strategic partners as part of the development of Doncaster's Physical Activity Strategy. The three priority groups are:

- The Inactive
- Families with children and young people
- People living in income deprivation

These groups are cross-referenced against the inactivity list allowing for the identification of MOSAIC types which are both likely to be inactive and living in deprivation as well as inactive and from households with children and young people.
