Community Profile
Well Doncaster

Community
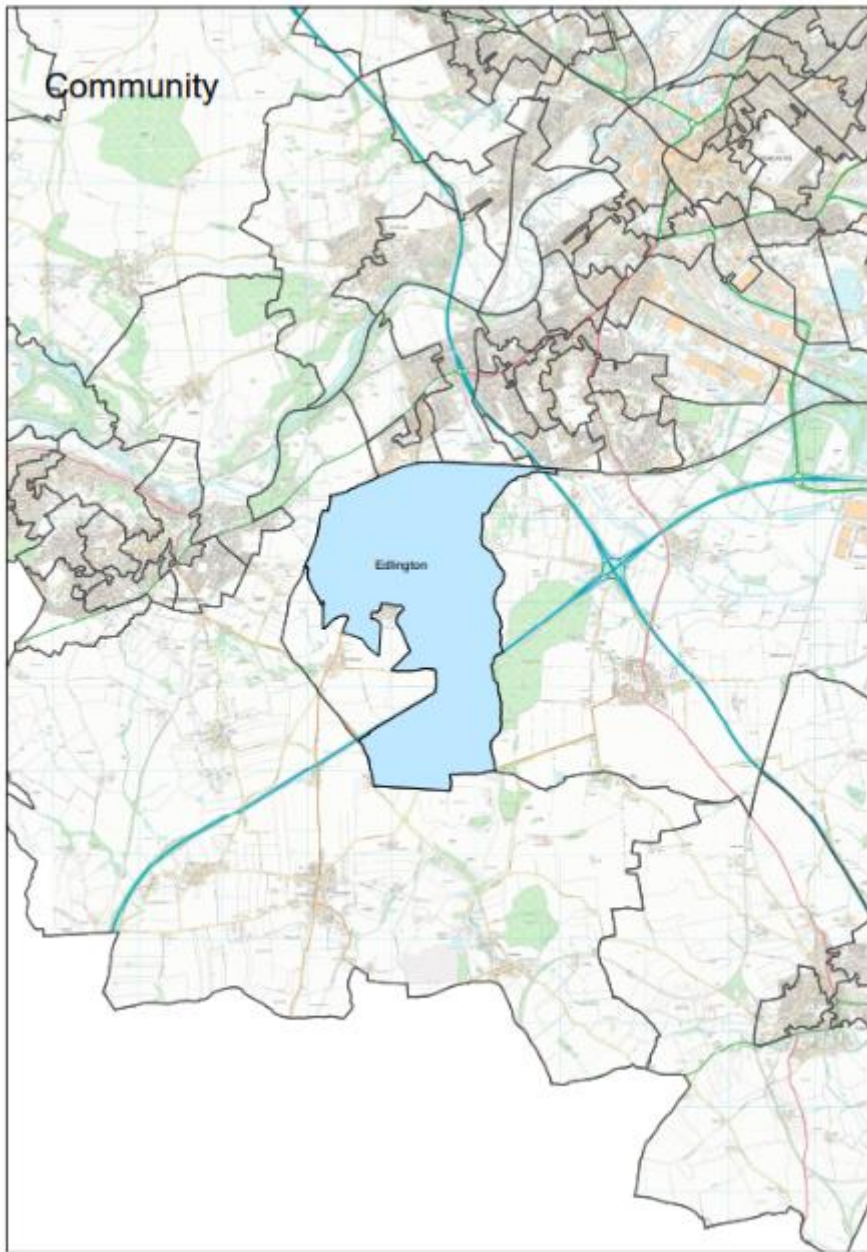

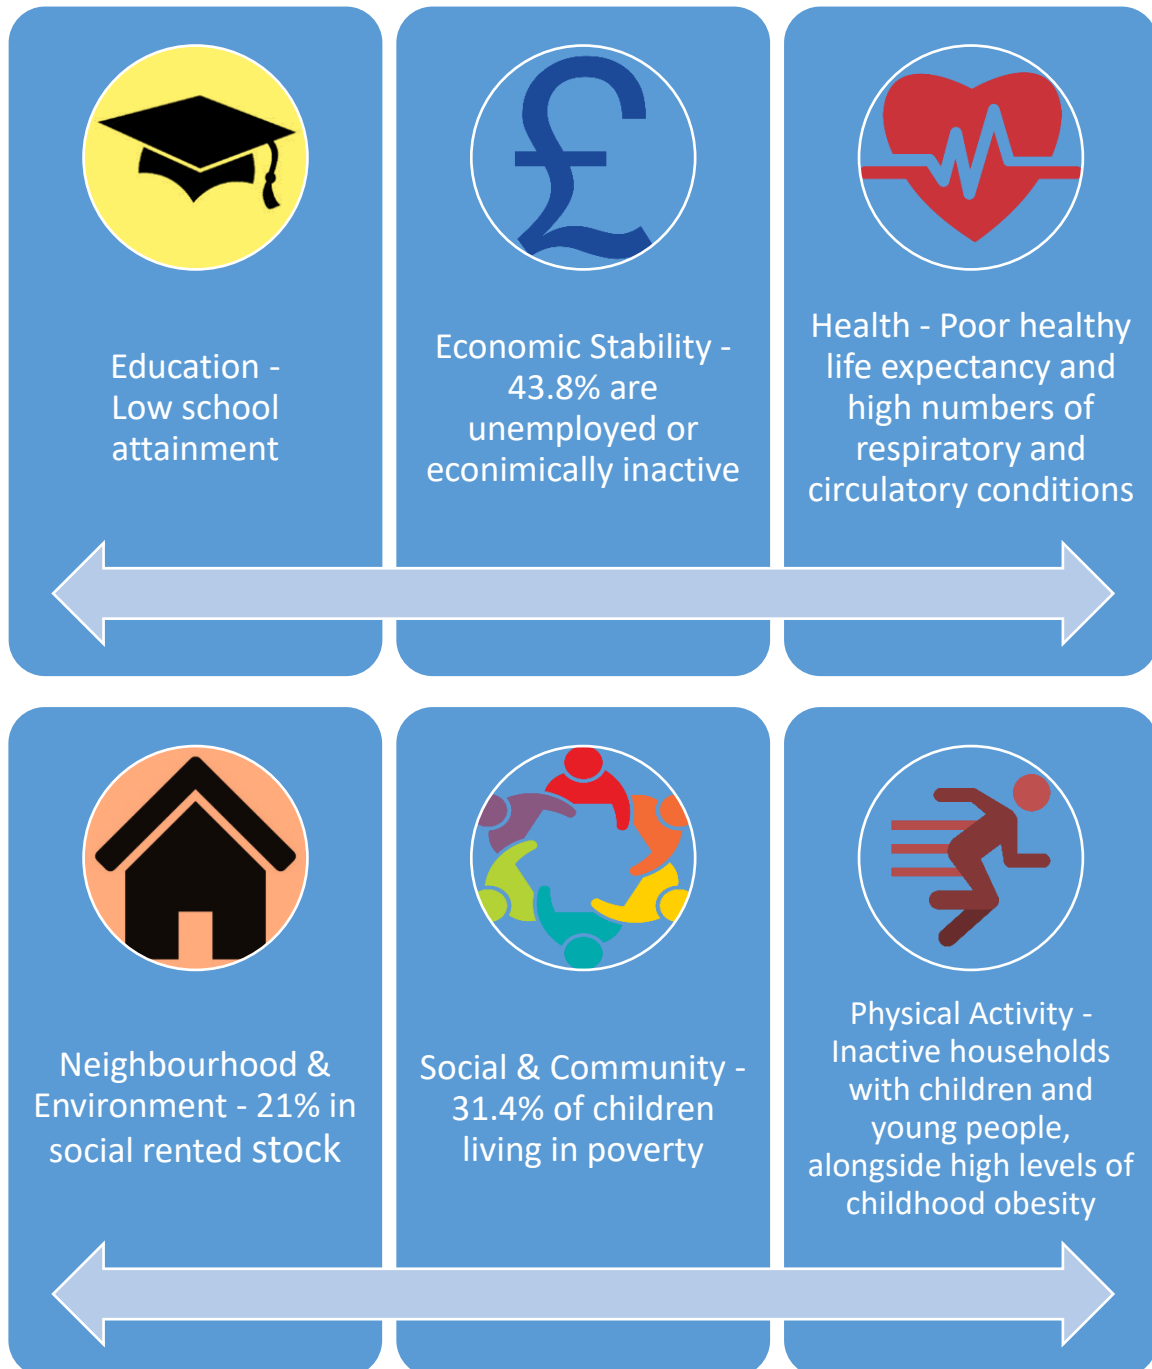

Edlington

This Report

This report focuses on Edlington, which shares an electoral ward with Warmsworth in the South of the borough. The report begins with a one-page summary outlining key information and priorities for the area. This document builds on the initial community profile of 2021 and updated figures have been included where possible. The profile also shows the ongoing conversations with communities, including ward members, community organisations, faith groups, residents and other organisations who work in the area. Communities' knowledge of their own areas enables them to identify their strengths and the assets on which they can build on. This document is shared with the intention of supporting those conversations and sharing information that might not be readily available to local people.

Contents

Edlington

Education - Low school attainment

Economic Stability - 43.8% are unemployed or econimically inactive

Health - Poor healthy life expectancy and high numbers of respiratory and circulatory conditions

Neighbourhood & Environment - 21% in social rented stock

Social & Community - 31.4% of children living in poverty

Physical Activity - Inactive households with children and young people, alongside high levels of childhood obesity

One page Summary

Edlington shares an electoral ward with Warmsworth in the South of the borough and is a distinct community with different levels of need and assets. Edlington is rich in physical assets such as community buildings and has a thriving Third Sector, with a number of large anchor organisations active in the community.

Edlington has a high population of working-age adults and the ward's overall age composition is in line with that of the English population. The community continues to be predominantly White British.

Most of the housing within Edlington are owners with a mortgage or loan or shared ownership (30.3%), Doncaster stands slightly lower at 29.6% and England at 29.8%. Currently socially rented housing stands at 21.8%, which is higher than Doncaster at 17% and the nationally at 17.1%. This tenure composition is significantly different to the Yorkshire and Humber benchmark. The housing stock type is primarily terraced or semi-detached properties, matching the highly dense profile of Edlington.

Poverty and deprivation are significant challenges in Edlington. The Index of Multiple Deprivations (IMD) score Edlington at 32.2, Doncaster as a whole is 30.3 and England is 21.7. Unemployment and long-term unemployment figures are higher than national rates amongst working- age adults. The 2021 census shows those who have never worked in Edlington stands at 31.3% and is significantly higher than Doncaster and England (Doncaster is 27.2% and England is 25.6%). Over a quarter (26.5%) of children are currently living in poverty in Edlington and Warmsworth ward compared to 17.1% in England, and this is likely to be a significant contributing factor of poor child development and lower educational levels.

In Edlington 30.6% of over 16 year olds do not have any qualifications, significantly higher than Doncaster (24.6%) and England (18.1%). However, 43.5% of individuals over 16 years of age have a level 1, 2 or 3 qualifications which is in line with Doncaster (43.1%) and England (39.9%).
Even though a larger percentage of over 16 year old have qualifications in Edlington and Warmsworth, the unemployment rates are still high with 6.6% claiming benefits (Doncaster 6.1% and England 5%). It is vital to consider how poverty can be mitigated through actions that support the community and improve the health of its residents.

People in Edlington have a lower life expectancy and live more years in poor health than the average person. The Office for Health Improvement & Disparities states that 22.2% of people in Edlington who have reported limiting long-term illness or disability. This is in line with Doncaster (21.7%) but is significantly higher than England (17.6%) There are also high levels of feeling low, self-harm and depression. The proportion of people who report their health as bad is significantly higher in Edlington (6.7%) compared to Doncaster (5.3%), and England (4%). The proportion of Edlington with a long-term limiting illness is 22.2%, higher than Doncaster (21.7%) and significantly higher than England (17.6%).

A key health priority for Edlington is the prevalence of respiratory and circulatory conditions. Emergency hospital admissions for chronic obstructive pulmonary disease (COPD) for the ward are nearly two times the figures for England; lung cancer is the

most prevalent cancer and COPD is the leading cause of mortality in the area. Respiratory conditions are largely caused by smoking and smoking prevalence is 22.8%: this number is significantly higher than the borough (19.7%). The high numbers of emergency hospital admissions suggest challenges for patients to self-manage their heart and respiratory conditions.

Key Priorities

Edlington has a range of health priorities, which are as follows:

- Low education attainment and high unemployment
- Poor healthy life expectancy and high rates of respiratory and circulatory conditions
- Effective self-management of long term health conditions and appropriate use of health services
- Inactive and deprived households with children and young people.
- High levels of childhood obesity (particularly as they enter year 6)

Assets

Well Doncaster uses a community-centred approach which allows investment in supporting, working with and empowering communities to facilitate healthier communities. The voice and role of our communities and taking a strength/assets-based approach to work with individuals, families and communities is crucial to the achievement our overall vision.

Asset Maps

Edlington is a relatively rural, former mining community, and its assets are spread throughout the area.

The maps below show different types of assets across Edlington. These have been developed using ward boundaries rather than Middle Layer Super Output Areas (MSOAs). Larger versions of these maps can be accessed in the appendix.

It should be noted that these maps are a starting point in understanding the community and that further work is needed amongst the community to understand all the assets and how they are used.
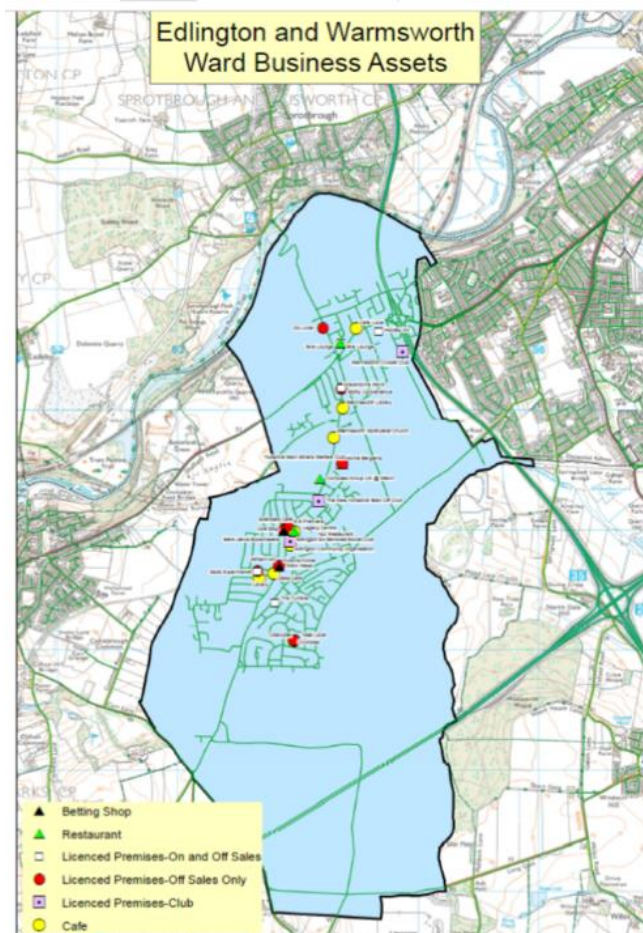

Business Assets

*Figure 1. Business Assets*

Health Assets

Figure 2. Health Assets
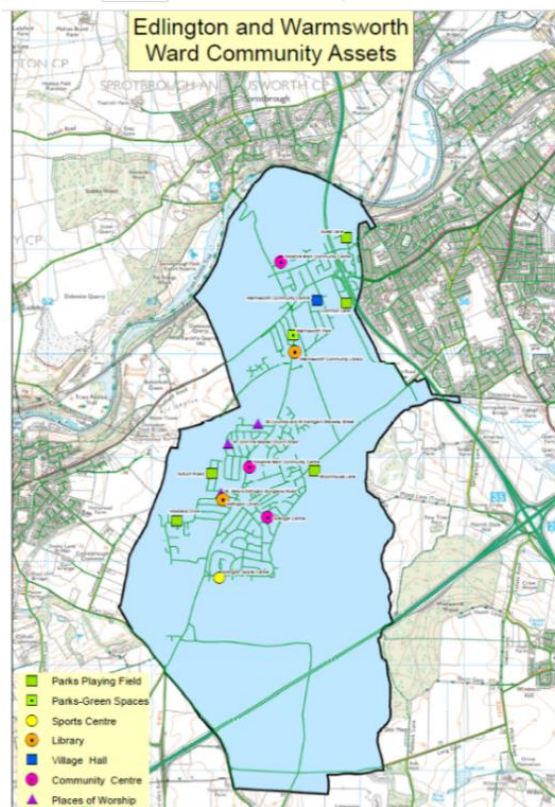

Community Assets

Figure 3. Community assets

It is recognised that work is needed in the community to expand the understanding of who, how and what is accessed in the area. Greater knowledge of the identity of each community/ward will allow a more appropriate and effective response to community needs. Edlington remains a priority area for South Doncaster and ongoing work will continue to support it.

To see an interactive version of these maps please see appendix.

Assets in the Community
Population Health Management
It is vital to understand the effect and direction the pandemic and cost of living crisis is having on community organisations in the ward so that appropriate and targeted support can be offered, and work can be implemented to manage any gaps or risks associated with changes. To support the former, Well Doncaster officers undertake regular population health management insight with community organisations in, identifying their current status and needs, and work with each group and partners to meet their goals. This is a living document and will be updated and adapted as needs are met and change. If you would like more detail on this, please contact welldoncaster@doncaster.gov.uk

As part of a population health management approach, the following assets have been identified and themed around place and people:
Institutions (Schools/colleges etc.)	Physical space (Parks, carparks etc.)	Local Economy (Local profit Businesses)
Schools: • Sir Thomas Wharton Academy • Hill Top Primary School • St Mary's Catholic Primary School • Edlington Victoria Academy • Buttons Nursery Health • Edlington Surgery – PPG • Nayar Surgery – PPG • Weldricks – two stores, one in martin wells and one on high street • Dentist • Edlington Hearing Centre Emergency Services	Green space: • Martinwells Lake – Has many family and children activities as well as outdoor gym • Pit wood • Edlington woods • Edlington Rec • Hilltop playground St Leger communal halls: • St Leger Howbeck drive– 50+, Bingo, tea, coffee, cake and a laugh • St Leger Hilltop crescent – Bingo clubs Centres • Hilltop Centre – Home of Helping Hands • Yorkshire Main Community Centre – Home of ECO & Providing community events, meals for the elderly, drug and alcohol support group, IT training, exercise classes, children's activities • Martinwells centre – Dentist, 2 GP surgeries, library, DMBC adults, children's communities	Food & Beverage: • Fishbits • Wok1 • Better Butties • Ollies Café • Edlington Grill • Edlo Café • Hong Kong Delights • Kezzy Burger Shops/ Supermarkets: • ASDA • Home bargain • Post Office • Cost cutters • Spar • Sewcute Fabrics • Vape Edlington • Boylan's TV Ltd Fitness & Gym facilities: • DCLT Leisure centre • Hargo's Gym • D B Personal Fitness Care homes:

• Edlington Fire Station • Edlington Police Station Other: • Library • Swallow Dale – Assisted Living Religious: • St Johns Church – Family Hub Stay and Play sessions run on Fridays 09:15-10:45 • Saint Marys Catholic Church • The Orthodox Church of Saint Columba and Kentigern	• Grainger Centre – Home of Edlington Town Council and Engage Day Centre Other: • Edlington Cemetery • Edlington Library at Martinwells Centre– runs the following clubs Shared Reading, Children Story Time, Rhymetime, Armed Forces Drop-in, EDIT Computer Class • Royal British Legion - provides lifelong support for the Armed Forces community - serving men and women, veterans, and their families. Has a shop and café that is open 9-5 on Fridays and Saturdays. Bridge Acre Nurseries, Broomhouse Ln, Doncaster DN4 9BW	• Howbeck care home Other: • Poly pipe • Edlington Granby Road WMC • Applegreen petrol station • Edlington Motors • HB Furniture clearance

| INDIVIDUALS (Key Individuals within the community)	ASSOCIATIONS Local Groups/Clubs	STORIES (Good news stories)
• Community Explores • St Johns Priest • Friends of Martinwells Lake • TARA • ECO staff and volunteers. • Helping Hands Staff and volunteers • Growing Together • GDM Community Connector (hosted by ECO) • Inner Sunshine • Bingo Group • MAY • Edlington Town Council • Pitwood community group Professionals • Well Doncaster Team	Support: • ECO – Works in active partnership with the community, substance misuse support, to regenerate Edlington and surrounding areas and improve the quality of life for all. ECO runs food and other prevision to support those in poverty, as well as delivering a range of activities for all ages and a youth club. They currently run the following groups and sessions: Dance on, Crafternoon Club, Family Fun Chill & Chat, Choir, Munch Bunch Kids Breakfast Club, Free Music Session for Adults, over 50 Exercise, Gymnastics, Tai Chi, Zumba, Social Scene, Brownies, Jumble Sale, Food Bank, Circuit Training Exercise Class, Playgroup, Laugh Live Repeat, Street Dance &	**Helping Hands (Hilltop)** *45 food parcels* *12 Smile packs* *30 parent packs* *75 calls* *over 1000 in food donations* *Overview of the last 10 weeks:* *353 households supported with 875 individuals of all ages* *75 regular befriending calls weekly* *174 courtesy calls* *Gifted:* *Over £16000.00 in hygiene products* *over £1600.00 in food from Tesco* *over £1500.00 in food from Food Aware* *over £750.00 in food from Fair Share* *over £1000.00 in food from Morrisons* *over £20000.00 in food from Aldi Supermarket* *over £600.00 in food and cleaning products from the HUB* *Volunteer hours:*

• Family Hub sessions at St Johns Church and Helping Hands Centre • Town Council including Mayor • Ward Councillors • Stronger Communities • PCSOs • Fire Service • St Leger staff Individuals • Rebecca Bewick, Kayleigh Holden and students	Pop Dance, Bingo, Jiu-Jitsu. • Hilltop Centre (Helping Hands) – Helping hands supports the most vulnerable in the community by delivering a range of projects for all ages. Currently running the following groups and sessions, Parent & Tots Group, Bingo, All Together Autism, Craft and Meet, Family History, Knit N Natter, Art Classes. Also has a computer suit which runs daily • Firefly Support – supports cancer patients, driving them to and from hospital appointments • Growing Together CIC – education provision for 18+ for specialised support. A working farm, shop and café. • Edlington Victoria Academy Town Council • Edlington Town Council – monthly town council meetings at Grainger centre Other: • Friends of Martinwells Lake – Maintain green space • Pitwood Community Group • Bingo groups – social group for elderly held at	*1800 hours* *120 Smile packs* *30 parent packs* *100 Easter activity packs* *50 VE packs* *15 Covid Time Capsule packs* *They have supported in the following areas: Edlington, Old Edlington, Warmsworth, Wadworth, Conisbrough, Hexthorpe, Intake, Denaby, Mexborough, Swinton, Wath, Balby, Loversall, Bessacarr, Scawsby.* Children at Edlington Victoria Academy took part in a poster competition. The aim of the posters was for children to show how they would want 'their' Edlington to be. The prize per year group was a scooter. A thematic analysis of the posters was undertaken and informed the community priorities which is influencing investment and support in the community. .

St Leger Howbeck and Hilltop crescent
- Yorkshire Main Commemorative & Heritage Trust - Work within the boundaries of Edlington & the locality to improve the quality of life of local people and promote the Cultural and Historical Heritage of the community, to deliver a living history/heritage project

Sport clubs:
- Edlington White Stars – Under 6s to Under 18s football teams Edlington White Stars FC
- Yorkshire Main RUFC – meet once a week to play rugby
- Storm Taekwondo - Unit 20 Broom House Lane Industrial Estate. Provides Martial Arts classes from ages 4 upwards,
- Edlington Royals WFC
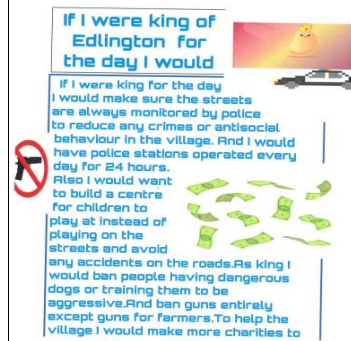

Michael attended a residents meeting at Swallowdale. He then presented to the group that he was going to start a craft club as people were saying there wasn't much to do. Michael also wanted to start the group to combat loneliness.
Well Doncaster and Mindful Activities funded Michael £50 for art supplies and refreshments for the group. On the first meeting, 1 person attended the group, the second session 2 people attended – then the following weeks no one attended.
Michael said he kept reminding himself "give it chance, don't give up".
Michael now has 15 regular attendees each week! People as far as Conisbrough attend the Craft Club.

		Michael said he '"doesn't mind anyone coming as long as they behave themselves. People can be together and class as one big community".

Ward Members

The Edlington and Warmsworth ward has two ward members who were elected in 2021.

Councillor Phil Cole

Edlington and Warmsworth Labour Portfolio Holder for Finance

Councillor Rob Reid

Edlington and Warmsworth Edlington and Warmsworth First

Health and Wealth

Health inequalities are avoidable differences across the population, and between different groups within society. Health inequalities arise from the conditions in which we live, work and play. These conditions influence our opportunities for good health, how we think, feel and act, therefore shaping our health and wellbeing.

Deprivation

Evidence shows that people living in our most deprived areas face the worse health inequalities in relation to health access, experiences, and outcomes. Deprivation covers a range of issues and refers to unmet needs caused by a lack of resources, including but not limited to finances, housing, and education. It is measured in different ways including the Indices of Multiple Deprivation (IMD).

Doncaster is one of the 10% most deprived communities in England. Edlington has a significantly different index of multiple deprivation (32.2) to England (21.7) and Doncaster (30.3). The 2021 Census reports on household deprivation and calculates according to four dimensions: Education, Health, Housing and Employment. The 2021 Census, reports households deprived in one dimension in Edlington is 35.8% compared Doncaster at 34.7% and England of 33.5%. However, the difference between Edlington, Doncaster and England become more significant as it moves into multiple dimensions. Households deprived in two dimensions for Edlington stand 20.5%, (Doncaster 16.7%, England 14.2%). Household deprived in three dimensions for Edlington stands at 6.1% (Doncaster 4.6% and England 3.7%). Households in four dimensions for Edlington is 0.1% (Doncaster 0.2% and England 0.2%). This shows that 62.5% of residents living in Edlington households are living in one or more areas of deprivation, compared to 56.3% in Doncaster and England at 51.6%.

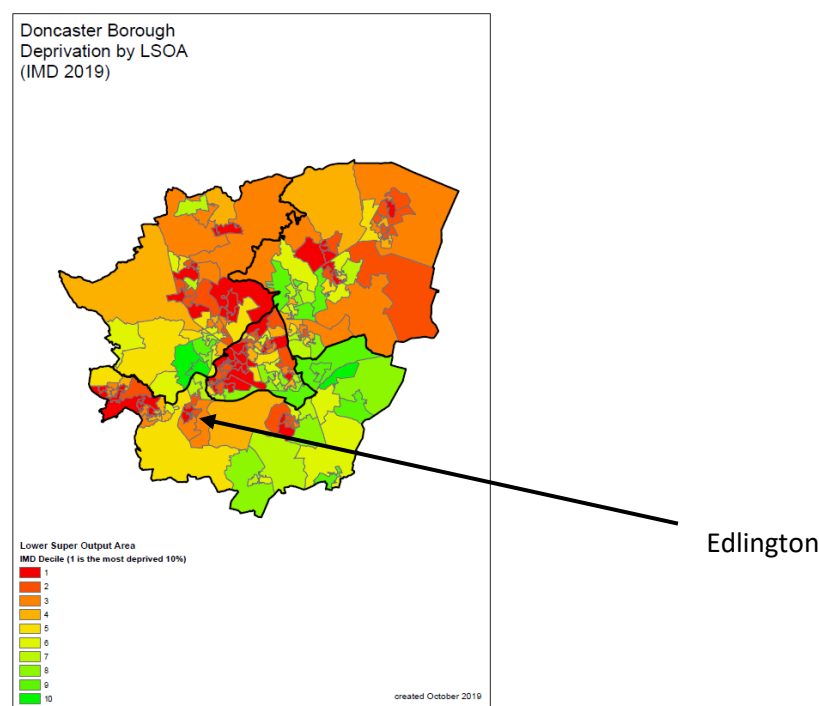

Edlington

18

Figure 4. Doncaster Heat Map of LSOA Deprivation

Wealth Inequalities

A high percentage of people in Edlington and Warmsworth ward (17.6%) are experiencing income deprivation. This is higher than Doncaster and significantly higher than England, (Doncaster 16.6%, England's 12.9%). The impacts of poverty are felt across the life course with 19.3% of children living in poverty; this is significantly higher than England (13.2%). 16% of older people are living in deprivation compared to 14.2% across England and 15.9% in Doncaster.

Figure 5.Deprivation indicators, Ministry of Housing and Local Government, 2019

Within the population in Edlington, 23.6% live in homes eligible for means-tested benefits. 17% of pupils are eligible for free school meals compared to the borough (16%). The percentage of 16-year-olds working full time hours is 62.4% which is in line with Doncaster. A significantly higher percentage are working low skilled jobs; process, plant and machine operatives (Edlington 14.9%, Doncaster 10.3%) and elementary occupations such as manual labour jobs (Edlington 19.7%, Doncaster 16.5%).

Employment

Edlington has a current unemployment rate of 4.1%, which is significantly higher than the borough (3.7%) and England (2.8%). However, it has decreased from 4.3% as reported in the 2019 Doncaster Joint Needs Assessment. Data from the 2021 Census shows that an significantly high percentage of residents in Edlington have never worked (31.3%, Doncaster 27.2%) and have not worked in the last 12 months (Edlington 56.9%, Doncaster 61.6%).

A significantly lower proportion of Edlington, compared to Doncaster, work mainly from home (13.8%, 18.5% respectively). A higher proportion of people aged 16 years and over in Edlington travel less then 10km to work (46.7%) compared to the rest of Doncaster (41.7%). 2021 Census data also shows that there are a higher number of households with no car or van in Edlington (30.1%) compared to Doncaster (24.4%).

The rates in Edlington and Warmsworth Universal Credit claims have reduced, in line with national and local rates and is back to pre-pandemic levels at 4.23%. Edlington and Warmsworth ward have the 10th highest percentage of claimants in the borough.

It is noted that one LSOA has significantly higher numbers of benefit claimants (highlighted by the arrow in Figure 9 below) than the rest of the ward; at the end of February 2018 the number of claimants were four times the number of the lowest area. It would be useful to understand the composition of the population of this area, the conditions affecting people's ability to work and the accessibility to available support. This area is also the most deprived area of the ward.

The 2021 Census reports that qualification attainment is significantly low in Edlington, with 30.6% of people 16 years and over having no qualifications compared to Doncaster (24.6%) and England (18.1%) and the majority having level 1, 2 or 3 qualifications (43.5%) compared to Doncaster (43.1%) and England (39.9%).

Childhood Development

Education

Children in Edlington match the average of the borough for child development at age 5. The Early Years Foundation Stage (EYFS) sets standards for the learning, development and care of children from birth to 5 years old and includes a framework against which to assess child development as children reach the age of five. In 2017, 51.91% of 5-year-olds achieved this standard. However, only 36% of 16-year-olds are achieving 5 A*-C at G.C.S.E level in Edlington compared to the 49.1% across the borough.

At KS2, each pupil is assessed in reading, writing and maths. This shows the percentage of pupils who have reached the expected standard in all three subjects. In 2023, 61 % of pupils in Edlington & 67% in Warmsworth achieved the expected standard in reading, writing, and mathematics at key stage 2; In Edlington it is a drop of 5% since 2022 and drop of 7% since 2022 (74%) in Warmsworth. In both parts of the ward this is higher than across Doncaster as a whole (55%) in the years 2022 & 2023.

At KS4, each pupil is given an Attainment 8 score (a score out of 90) based on their 8 best GCSE grades including English, maths and at least 3 other traditional academic GCSEs (sciences, languages, and humanities). Other qualifications at an equivalent level (e.g. BTECs) can also count towards the score. In 2022, average GCSE attainment 8 score per pupil (out of 90) was 39.5 in Edlington (93 pupils); lower than in Doncaster at 45.2. This was higher in comparison to 2019 (38.7) and across overall Doncaster in 2022 (45.2). In Warmsworth average GCSE Attainment 8 was 50.9 (achieved by 50 pupils). This was higher comparing to Doncaster (45.2) and lower compared to the year 2019 (44.3)

Obesity

At reception in 2021, 12.9% of the children in Edlington and Warmsworth are severely obese and 25.9% are overweight. This has increased since 2018 which reported 10% severely obese and 23.3% are overweight. At year 6, these figures increase to 23.5% and 37%, respectively compared to 21% and 33.3% in 2018.
Figure 6. Prevalence of obesity and overweight children in Reception and Year 6 (National Child Measurement Programme, 2020)

Pupil Lifestyle Survey

The 2022 Pupil Lifestyle Survey for Edlington has 399 responses to questions regarding physical activity. It is important to note that the Pupil Lifestyle Survey is self-reported and was not completed by all schools.

Of children surveyed, 40% walk to school, this is lower than Doncaster which stands at 47%. The survey shows 32% of children undertake physical activity one to two days a week (Doncaster 25%), 23% three to four days (Doncaster 23%) and 40% 5 or more days (49%). The reason for children not enjoying physical activity is due to getting hot and tired (51%) and they just prefer to do other things (50%).

When comparing the data from the 2020 and the 2022 surveys it shows that there has been an increase in children walking to school from 34% to 40%. It also shows that there is a slight increase in children undertaking physical activity on one to two days a week from 30% to 32% and a significant increase of 5 or more days physical activity from 31% to 40%. However, there is a decrease in the number children reporting doing three or four days from 32% to 23% in 2022.

The Doncaster Pupils Lifestyle Survey conducted for the academic year 2020/2021 was completed by 2102 pupils in Doncaster overall. 182 students from Edlington and Warmsworth ward. 52% identified as male and 43% as female. 5% preferred not to say or identified differently. Of these pupils, 87% had a white ethnicity and 10% ethnic minority. Compared with 13% for Doncaster as a while and 81% ethnic minority.

English was a second language for 19% in Edlington and Warmsworth. This was a lower per cent as reported across Doncaster (23%) as a whole. Prevalence of disability was 8% in the line compared to Doncaster 6%. Long-standing illness in pupils was reported at 19%. This's 4% higher than across Doncaster.

Special Educational Needs (SEN) was reported for 10% of pupils from the Edlington and Warmsworth taking part in the survey, which is 1% higher than that reported for Doncaster overall. Of those reporting SEN, over 31%) of pupils received extra help at school. This is lower than the overall percentage for Doncaster (49%).

Sixteen children (Edlington 11 & Warmsworth 5) have been recorded as receiving Elective Home Education. Ten children in the ward (10 in Edlington and 0 in Warmsworth) were recorded as missing education in the ward (City of Doncaster Council, August 2023).

Health Inequalities

Long Term Health Conditions

The proportion of residents self-reporting poorer health in Edlington is considerably higher than the borough and national rates. Approximately 22% of the population reported living with a limiting illness or a long-term health condition.

A key health priority for Edlington is the prevalence of respiratory and circulatory conditions. Emergency hospital admissions for chronic obstructive pulmonary disease (COPD) for the ward are nearly two times the figures for England; lung cancer is the most prevalent cancer and COPD is the leading cause of mortality in the area. Respiratory conditions are largely caused by smoking and smoking prevalence is 22.8%: this number is significantly higher than the borough (19.7%). The high numbers of emergency hospital admissions suggest challenges for patients to self-manage their heart and respiratory conditions.

Figure 7. Causes of Death-All Ages, Edlington, 2015-19 (ONS, 2021)

Circulatory conditions, including coronary heart disease, are the leading cause of premature death in Edlington. When looking at the risk factors associated with heart conditions, 25.9% of adults binge drink and there are significantly higher hospital admissions for alcohol-related harm. Further, 30.3% of adults are obese and only 16.7% engage in healthy eating. Edlington also has significantly high rates of cholesterol and high blood pressure.

The prevalence of health conditions and poor health may be impacting on the economic opportunities of residents in Edlington with 2.4% providing 20-49 hours of unpaid care, significantly higher than England's 1.8% and slightly higher then Doncaster's 2.2%. This pattern continues with 3.5% providing over 50 hours of unpaid care (England 2.6% and Doncaster, 3.4%).

A large percentage of residents live with conditions related to poor lifestyle choices such as coronary heart disease which is greatly associated to obesity. Edlington's

obesity rates are significantly higher for children and adults, and there are low levels of people of all ages engaging in physical activity.

Edlington & Warmsworth the emergency hospital admissions for COPD and Coronary Heart Disease (CHD) are significantly higher than Doncaster and England indicating poor self management and appropriate use of emergency services.
Figure 8. Emergency Hospital Admissions

Loneliness and Isolation

There is a high level of older people living alone in Edlington (33%) in comparison to 31% across Doncaster and England. Whilst this does not necessarily imply loneliness and/or isolation, it is an indicator to be considered alongside local intelligence.

Doncaster	274681	49332	17.96%

According to NHS England in 2023 ((NHS England Quality and Outcomes Framework 2022-2023), there are 54584 patients older than 15 years registered patients with Doncaster South Primary Network (PCN) in of Doncaster. 9298 of those are registered as smokers. Making up 17.03% of registered patient smokers across south of Doncaster. This per centage is slightly lower than across Doncaster (17.96%).

The Nayar Practice & Edlington Health Centre Practice are in Edlington. In the Nayar Practice there are registered as smoker 23.15% (979 out of total registered patients of 4229). In Edlington Health Centre Practice there are 21.87% registered as smokers (877 patients out of 4010). Both per centages are significantly higher compared to Doncaster and the GP with the lowest number of registered patients as smokers (8.51%). This is likely to contribute to the higher levels of respiratory disease and relatable Hospital Admissions as shown above. Edlington ward has the prevalence of respiratory and circulatory condition. Respiratory conditions are largely caused by smoking. Emergency hospital admissions for chronic obstructive pulmonary disease (COPD) for the ward are nearly two times the figures for England; lung cancer is the most prevalent cancer and COPD is the leading cause of mortality in the area.

It must be noted that data is taken from self-reported measures when signing up to a GP. Residents registered at GPs do not necessarily reside in that community. This may not truly reflect the prevalence of smoking in specific communities. The data relies on individuals self-reporting.

Life Expectancy

People living in Edlington and Warmsworth ward have a lower life expectancy and live more years in poor health in comparison to Doncaster and England. Life expectancy for men is significantly lower in Edlington at 76.9yrs (England 79.7yrs) and has decreased by 8 months since the last data reported in 2021 (Edlington 77.7yrs).Life expectancy for women in Edlington was 81.9yrs, in 2021, data shows this is now reduced by 9 months to 81yrs which is lower than England (83.2yrs).

Both men and women in Edlington and Warmsworth are experiencing significant inequalities in terms of their healthy life expectancy, the number of years living in good health. Men are expected to develop a health condition at aged 56 and women aged 57, therefore decreasing the opportunity of living in better health by 6.9 years and 7 years, respectively.

Health expectancies, compared to England, years, 2009-2013

Legend: Significantly better than England | Not significantly different | Significantly worse than England | England

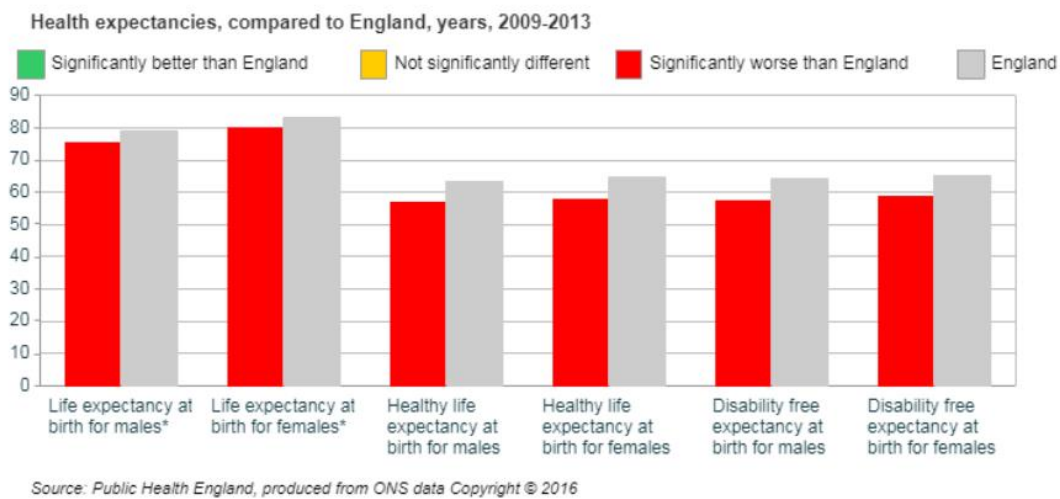

Figure 10. Health Life expectancy in Edlington and Warmsworth

Physical activity

Levels of physical activity in Edlington are low compared to the rest of the borough as seen in the map below which identifies the areas with the highest number of inactive households:

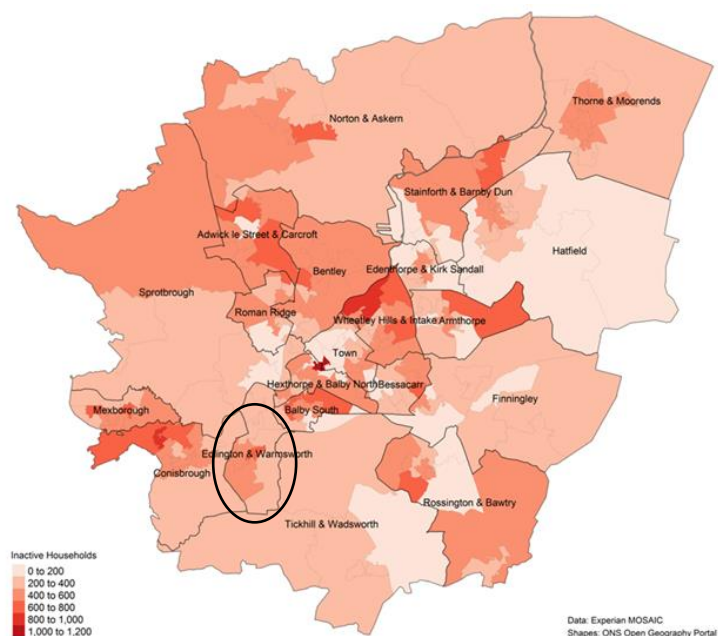

Figure 16. Levels of Inactivity across Doncaster

Edlington has 667 households that are likely to have high levels of inactivity. This data has been matched with the number of children and young people and with deprived, inactive households. The former data positions Edlington as an area of focus and priority for the Get Doncaster Moving Strategy. The table below shows the number of households in the priority areas of inactive, low incomes and households with children and young people:

Table 2. Get Doncaster Moving table for inactive households include those on low income and children and young people.

Name	Inactive	Low Incomes	C&YP	Total
Adwick le Street	883	877	920	2680
Denaby	951	913	514	2378
Wheatley Park & Wheatley Hills	802	885	667	2354
Bentley	883	692	773	2348
Edlington	667	858	726	2251
New Rossington	673	823	749	2245
Intake	651	781	668	2100
Skellow & Carcroft	594	892	563	2049
Stainforth	618	738	676	2032

Thorne	747	817	367	1931

Sheffield Hallam University and The University of Manchester were commissioned by Get Doncaster Moving at City of Doncaster Council to analyse and evaluate the current levels of physical activity in the community, which were previously identified as low. A face-to-face household survey was completed in 2018 and collated in 2019 by 1,120 respondents across Doncaster using a questionnaire designed to (i) assess levels of physical activity in accordance with Sport England classifications and (ii) explore key issues around engagement in physical activity utilising the robust COM-B behavioural science approach (Michie et al., 2011).

In Edlington, 131 responses were collected from different households. The mean amount of time adults reported being active each week was 244 minutes which was the third highest level out of the eight communities. The physical activity classifications for Edlington are presented below.

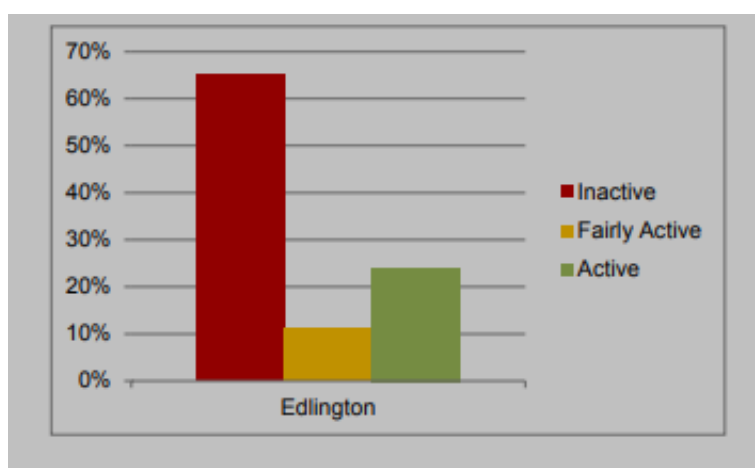

Figure 17. Physical activity rates in adults across Edlington

In Edlington, the mean reported sitting time for participants was 243 minutes on a working day. On a non-working day, it was 364 minutes which was the 5th lowest level of sedentary behaviour out of the eight communities

In Edlington, 41 households reported having young people and the mean reported for physical activity time outside of school was 162 minutes a week. This was the 44th lowest amount of young people's activity over the eight communities analysed.

COM-B results below, present the Capability, Opportunity, and Motivation scores for participants based on the physical activity classification they are in. In Edlington, participants who were active rated their capability, opportunity and motivation as being higher than those who were fairly active and inactive. Participants in Edlington who were inactive gave particularly low ratings to automatic motivation (indicating that they did not have habits or routines for physical activity), reflective motivation (indicating that they had lower intentions to be physical active), and physical capability (indicating that they perceived fewer skills and/or less stamina to be physically active). These might be particular areas to focus on in terms of future interventions.
Figure 28. COM-B scores for participants in each physical activity classification for Edlington

Active Travel

In Edlington, 41 participants reported being employed or in education, 14 of those participants reported active travelling to their place of work or study. The mean time spent active travelling each day was 19 minutes a day, which accounted for 85% of their commute.

Green Spaces and Parks

There are green space assets for the whole Edlington and Warmsworth ward available, and in close proximity to the communities of New Edlington, Old Edlington & Warmsworth. Old Edlington is adjacent to open countryside and has access to countryside footpaths, open spaces and has the benefit of being a conservation area with three listed buildings.

Table 3. Green spaces in Edlington

	Green Space	
Asset	Name	Postcode
Play Park	Howbeck Drive	DN12 1PW
	Guest Lane	DN4 9NT
	Common Lane	DN4 9JY
	Broomhouse Lane	DN12 1EW
	Auburn Road	DN12 1DP

Park	Warmsworth Park	DN4 9LS
Green Space	Edlington Pitwood	DN12 1ES
	Martin Wells Lake	DN12 1PP

Martin Wells Lake (DN12 1PP) and Edlington Pitwood (DN12 1ES) provide the main form of green Spaces in the Edlington ward. Both are important assets to the community that can be used to promote health improvement. Martin Wells Lake has many children and family activities and it has outdoor gym as well. It can enhance community cohesion and is overseen by Friends of Martin Wells Lake. Edlington Pitwood has been named as one of the Future Parks in which a £1.8m investment from Sport England has been launched to maximise opportunities from the Local Delivery Pilot (LDP) to enhance green spaces in Doncaster.

The playgrounds and play parks consist of multi-use games area, toddler and junior play areas, outdoor gym equipment and playing fields.

Community Information

Population and Diversity

Edlington Population: 8400

Edlington has a population of 8,400 with 5493 people of working age in 2021. This has increased very slightly from 7,786 with 4,106 people of working-age in 2011.

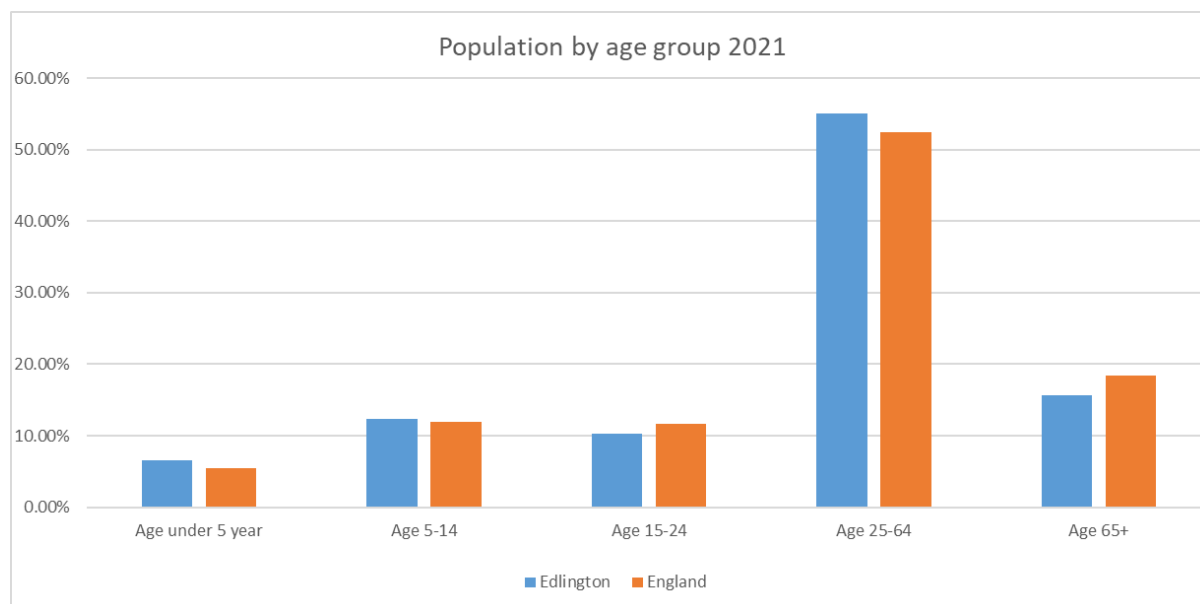

Figure 19. Population of Edlington (CNS, 2021)

Edlington is predominantly White British (96%), this is higher than the national make up (81%). 4% of the population are from a Black, Asian & Minority Ethnic (BAME) group. (Asian/Asian British/Asian Welsh 0.9%, Black, Black British/Black Welsh, Caribbean or African 1.3%, Mixed/Multiple ethnic groups 1%, Other ethnic 0.8%). The 2021 Census data reports that 11.7% of the population were born outside of the UK, slightly higher than Doncaster at 10.4%. in the 2021 Census, 91% reported English as their main language, slightly lower than Doncaster (92.8%). 1.6% reported not speaking English well (Doncaster 1.4%) and 0.2% reported they cannot speak English (Doncaster 0.2%).

Housing

Housing conditions and the surrounding environment can have profound impacts upon residents' health and exacerbate health inequalities. Housing data for the LSOAs that make up Edlington is available. This data explores several variables to analyse the housing stock.

The majority of housing within Edlington is owned with a mortgage, loan or shared ownership (30.3%). This tenure composition is significantly different to the Doncaster benchmark, for owning outright where Edlington has significantly lower numbers of outright home owner (Edlington 25.3%, Doncaster 33.6% and England 32.5%) and significantly more social renters (Edlington 21.8%, Doncaster 17% and England

17.1%). There are 3,600 households in Edlington, the majority living in 3 bedroomed houses (59.8%), however the majority of those households are 1 person (31.9%) and 2 people (33.7%). This means that residents are living in bigger households than they need, this could lead to high levels of deprivation, fuel poverty and larger bills.

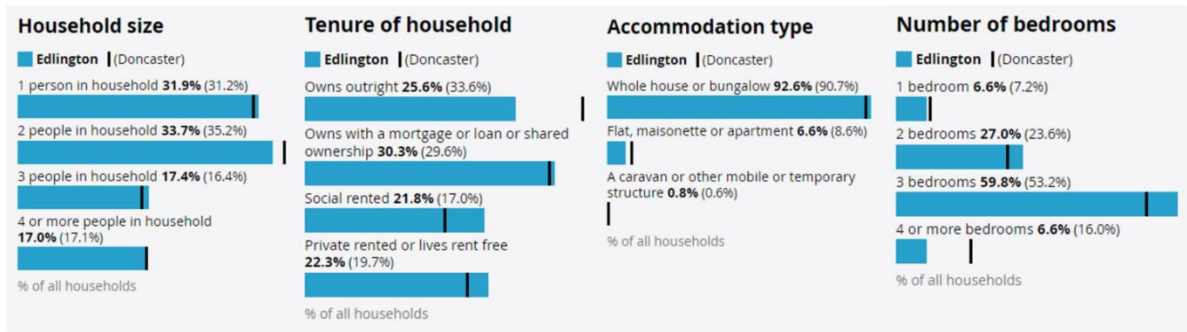

Figure 20. Housing status in Edlington compared to Doncaster (CNS, 2021)

Community Insight

Appreciative Inquiry

The Well Doncaster Team undertake Appreciative Inquiry (AI) within communities to gather insight to inform co-designed action plans with the community. Armstrong (2020) suggests in 'A changing world, again. How Appreciative Inquiry can guide our growth' that reframing the questions in light of a crisis like Covid-19 and drawing on strengths and assets from past positive experience will help participants as they restructure their community. The AI questions are structured to pull out the successes of the past and present, to seek new potentials and possibilities and build on those through the Dream and Design stages.

The Appreciative Inquiry will include the following steps:

1. **Discovery Phase** – This will involve engagement with the residents of Hyde Park to find out what is working well in the community. Responses will be themed to allow priorities of the community to be established.
2. **Dream** – Residents and key stakeholders will be invited to attend an initial workshop to discuss what ideas they have for their community and how these will meet the priorities highlighted in the discovery phase.
3. **Design** – All attendees are invited back for a second workshop to develop an action plan to direct work for the community.
4. **Destiny** – A collaborative way of working and investing resources to meet the actions from the previous phase.
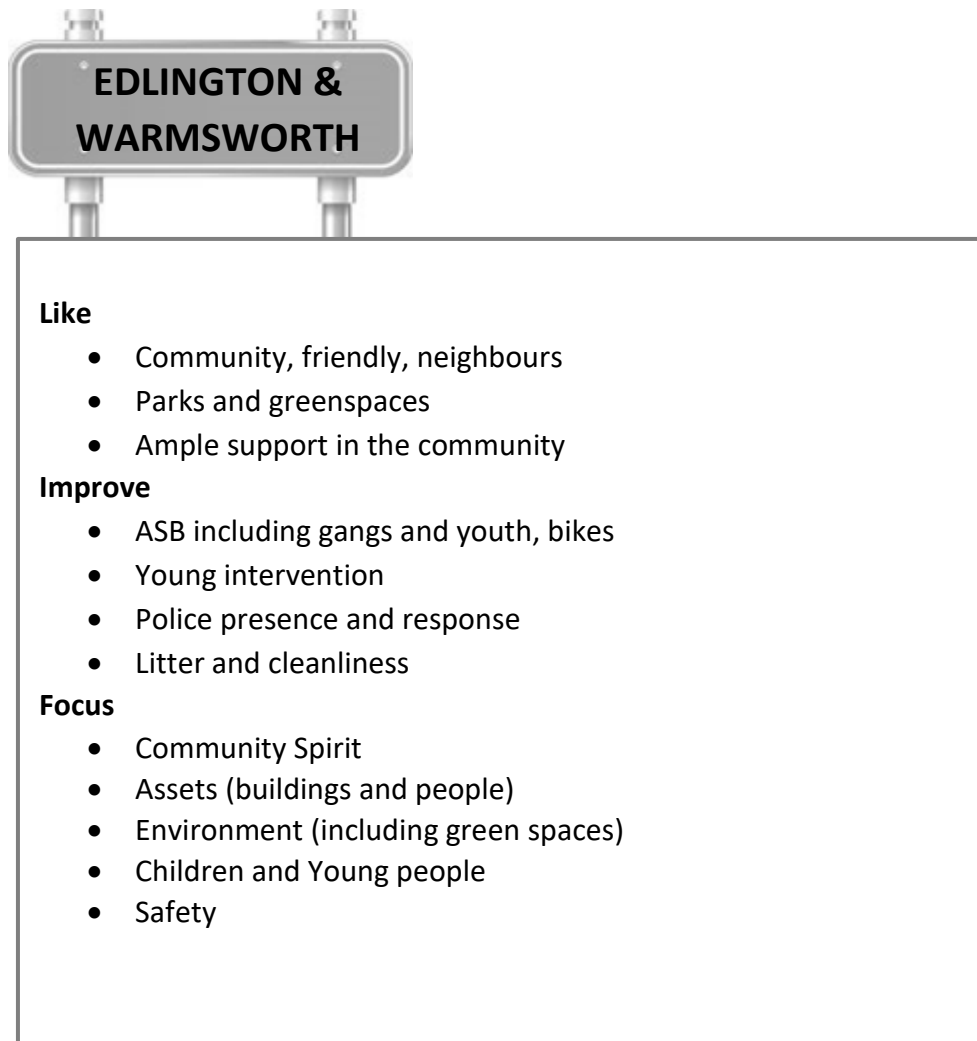

Well Doncaster has been working in Edlington since 2019. The themes from the past Appreciative Inquiries are as follows:

- Community Spirit
- Environment and cleanliness
- Safety
- Physical activity
- Green Space
- Young people

Doncaster Talks

In 2019 Doncaster Talks undertook insight across the borough of Doncaster. Responses were separated into wards and thematically analysed. Across Edlington and Warmsworth ward, 188 responses were received (1.59% of the Ward) and the main themes on what people liked about the area, what could be improved, and what the borough should focus on are displayed in the table below. These responses have been included in the AI approach and the insight matches that of the AI conversations.

EDLINGTON & WARMSWORTH

Like
- Community, friendly, neighbours
- Parks and greenspaces
- Ample support in the community

Improve
- ASB including gangs and youth, bikes
- Young intervention
- Police presence and response
- Litter and cleanliness

Focus
- Community Spirit
- Assets (buildings and people)
- Environment (including green spaces)
- Children and Young people
- Safety

Mosaic Data
Mosaic Public Sector classifies the UK population into one of 66 types and 15 groups through a detailed and accurate understanding of each citizen's demographics, lifestyles, behaviours and location.

The Physically Inactive Population of Doncaster

The MOSAIC types who "Do not exercise" and "Do not take part in Sport" were searched and three priority groups have been identified through work with strategic partners as part of the development of Doncaster's Physical Activity Strategy. The three priority groups are:

The Inactive

Families with children and young people

People living in income deprivation

These groups are cross-referenced against the inactivity list allowing for the identification of MOSAIC types which are both likely to be inactive and living in deprivation as well as inactive and from households with children and young people.

Acorn profiles

Wellbeing Acorn segments the population into 4 groups (Health Challenges; At Risk; Caution; Healthy) and 25 types describing the health and wellbeing attributes of each postcode across the country. By analysing significant social and health related behaviour, it provides precise information and an in depth understanding of upstream issues affected by current lifestyle traits.

INTERPRETING THE REPORT

The Wellbeing Acorn profile report helps you understand the underlying demographics, lifestyle and health attributes of your customers and service users by comparing their Wellbeing Acorn profile to a base (e.g. UK population, area or other customer groups).

INDEX

← 100 →

| An index of under 100 shows below average representation. | An index of 100 shows that the proportion of customers is the same as the base. | An index of over 100 shows above average representation. |

The Wellbeing Acorn Profile contains 12 variables that are indicators of Disability or Infirmity in the population and 9 variables related to unhealthy behaviours. The average score measured against the base profile of Yorkshire and the Humber is 100. A value above 100 indicates that the area population is over represented for this characteristic, below 100 the value is less than the average or under represented.

Public Health Data
Fingertips

This is a new fingertips profile that uses data from Local Health an existing PHE data tool. Local Health is a collection of quality assured health information presented for small geographical areas. By presenting data for small areas, Local Health provides evidence of inequalities within local areas. It supports targeted interventions to reduce such inequalities.

Local Health contains indicators related to:

- Population and demographic factors
- Wider determinants of health
- Health outcomes

It presents data for middle super output areas (MSOA), electoral wards, clinical commissioning groups (CCG), local authorities, and England as a whole.

Please note, as the Local Health tool was designed to allow users to map small area data, a mapping option has not been provided in this profile.
