Community

This Report

This report focuses on the Norton and Askern ward in the North of Doncaster and consists of three smaller communities as LSOA level; The report begins with a one-page summary outlining key information and priorities about Fishlake, Fosterhouses and Sykehouse. The document builds on the initial community profile of 2021 and updated figures have been included where possible. This report shows the initial conversations with communities, including ward members, community organisations, faith groups, residents and other organisations who work in the area. Communities' knowledge of their own areas enables them to identify their strengths and the assets on which they can build on. This document is shared with the intention of supporting those conversations and sharing information that might not be readily available to local people.

The residents of Fishlake, Fosterhouses and Sykehouse have a higher level of Level 1,2 and 3 qualifications at 42.2% higher than England at 39.9%.

30.9% have properties with 4 or more bedrooms compared to England at only 21.9%.

The residents living in the Askern and Norton Ward have significantly high levels of Respiratory diseases, and higher rates of lung Cancer than in England.

52.6% of residents in Fishlake, Fosterhouses and Sykehouse own the property they live in outright, this figure is much higher than the average for England at only 32.5%

Residents of Fishlake, Fosterhouses and Sykehouse are less likely to live alone (21.7%) on average than in the rest of England at 30.1%

The residents of Fishlake, Fosterhouses and Sykehouse are less likely to travel to work on foot 1.8% compared to 7.6% in England. However this is most likely to be due to the rural location.

One page Summary

Fishlake, Fosterhouses and Sykehouse are rural villages and hamlets that fall within the Norton and Askern Ward of the City of Doncaster. However due to their unique rural location a lot of the Ward level data is not typically representative of this area. The area was brought to the attention of mainstream media during the Floods of November 2019, this report has been written four years after the flood, and highlights many of the advantages of living within these close-knit communities.

The area I have been able to snapshot data from is based on a population of 1400 people. The figures show an ageing population as of much of England however the data for Fishlake, Fosterhouses and Sykehouse shows that there is a significantly higher percentage of people age between 50 and 54 (the tallest column in the graph below) at 9.8% compared to England at only 6.9%.

Key Health Priorities

- Hospital admissions for those living with limiting illnesses or health conditions largely associated with poor lifestyle choices including CHD, Myocardial Infarctions, Stroke and COPD.
- Obesity levels amongst school aged children and reception and year 6
- Alcohol intake and hospital admissions associated with alcohol consumption

Assets

Well Doncaster uses community centred approaches that support investment in supporting, working with and empowering communities to facilitate a healthy community. The voice and role of our communities and taking a strengths/assets-based approach to work with individuals, families and communities is crucial to the achievement of our overall vision.

Asset Maps

The maps below show different types of assets across the communities of all 3 communities.

Sykehouse

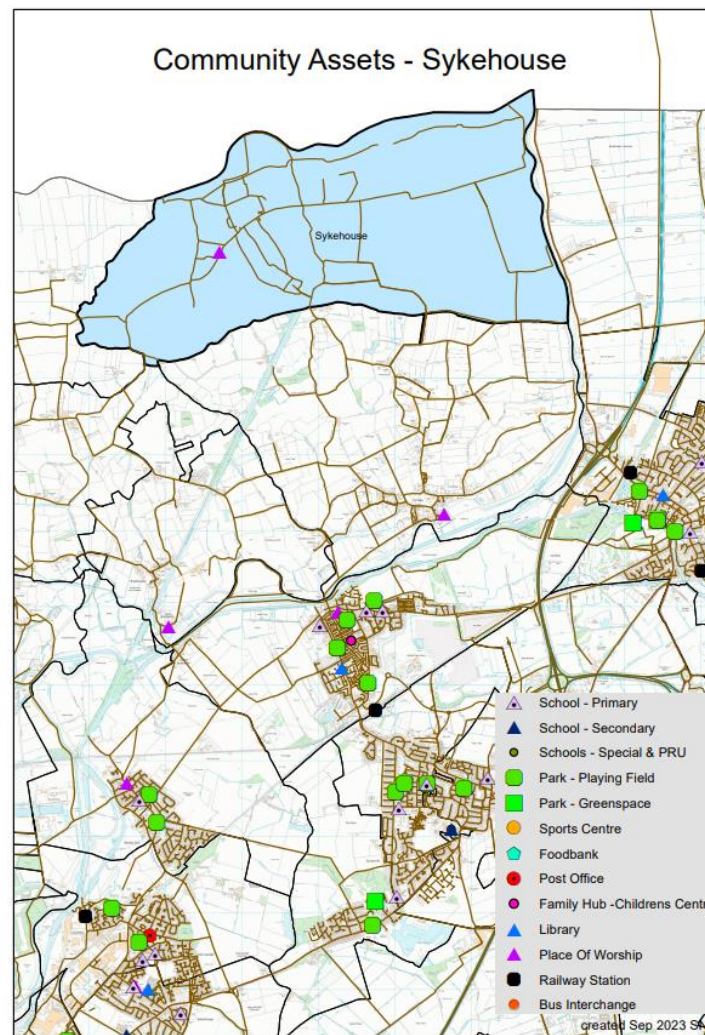

Figure 1. Community Assets in Sykehouse

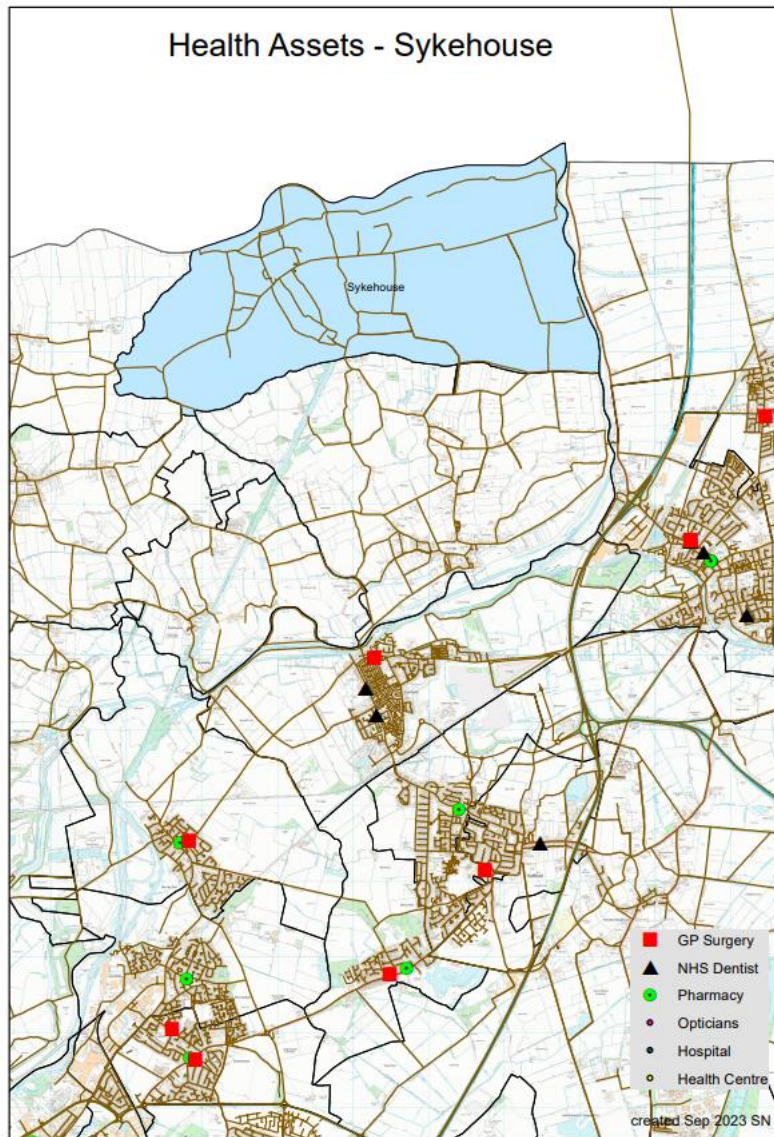

Figure 2. Health Assets in Sykehouse

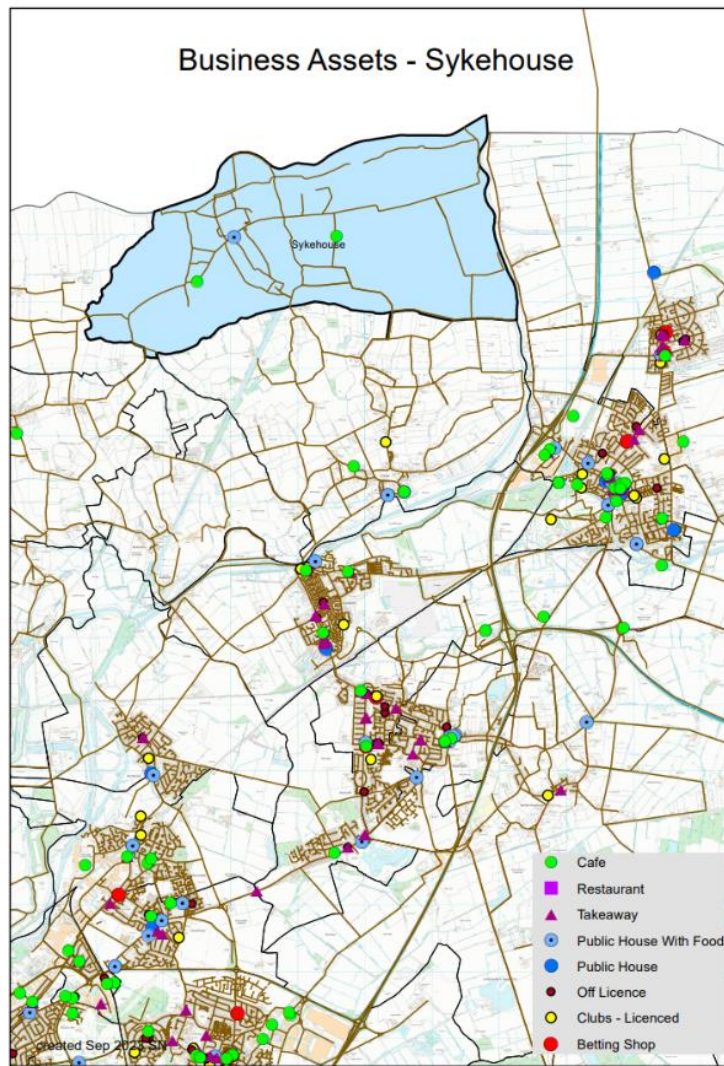

Figure 3. Business Assets in Sykehouse

Fishlake and Fosterhouses

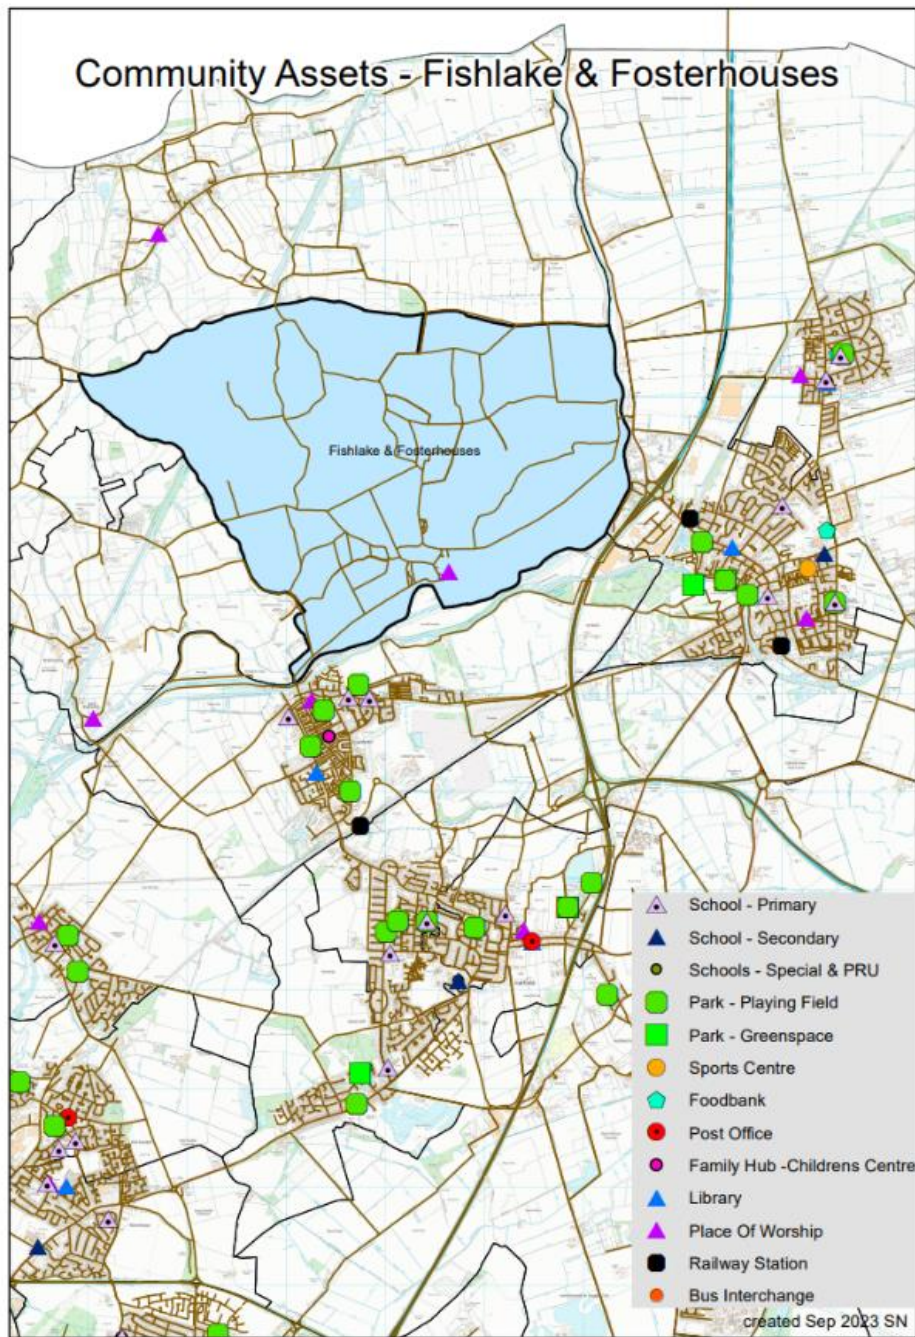

Figure 4. Community Assets in Sykehouse

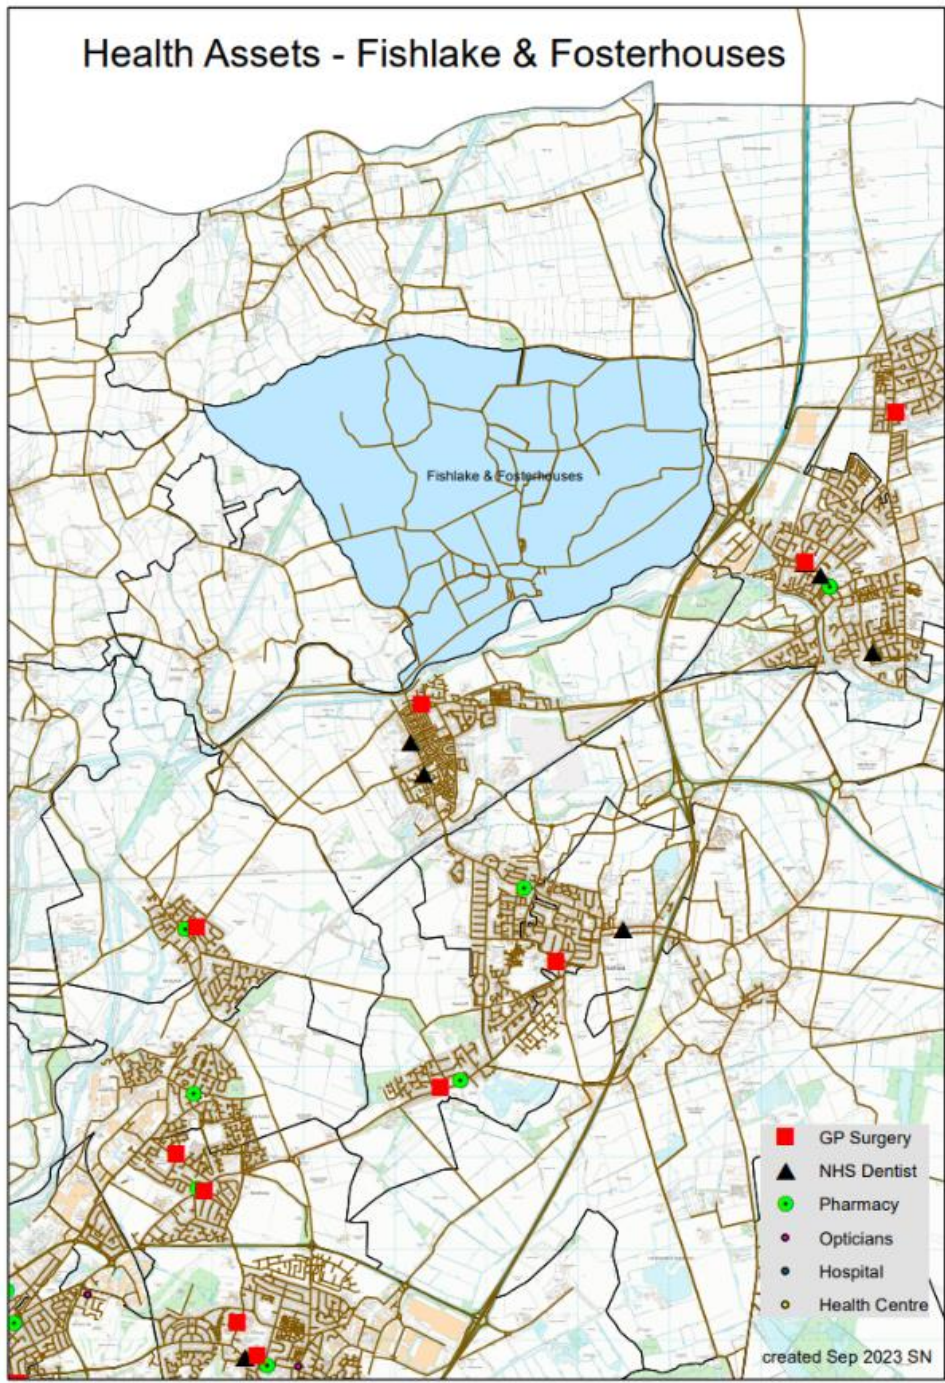

Figure 5. Health Assets in Sykehouse

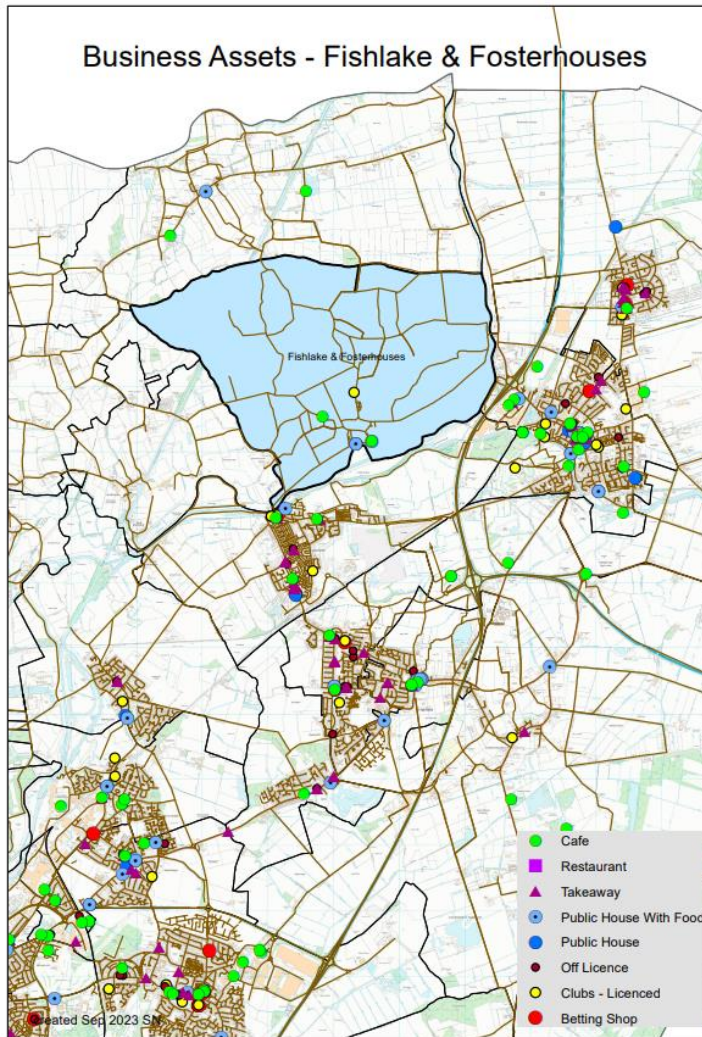

Figure 6. Business Assets in Sykehouse

It is recognised that work is needed in the community to expand the understanding of who, how and what is accessed in the area. Greater knowledge of the identity of each community/ward will allow more appropriate and effective responses to community needs. Hexthorpe remains a priority area for Central Doncaster and ongoing work will continue to support it.

Assets in the Community

Population Health Management

As part of a population health management approach, the following assets have been identified and themed around places and people for all 3 communities.

Health and Wealth

Health inequalities are avoidable differences across the population, and between different groups within society. Health inequalities arise from the conditions in which we live, work and play. These conditions influence our opportunities for good health, how we think, feel and act, therefore shaping our health and wellbeing.

Deprivation

Evidence shows that people living in our most deprived areas face the worse health inequalities in relation to health access, experiences, and outcomes. Deprivation covers a range of issues and refers to unmet needs caused by a lack of resources, including but not limited to finances, housing, and education. It is measured in different ways including the Indices of Multiple Deprivation (IMD).

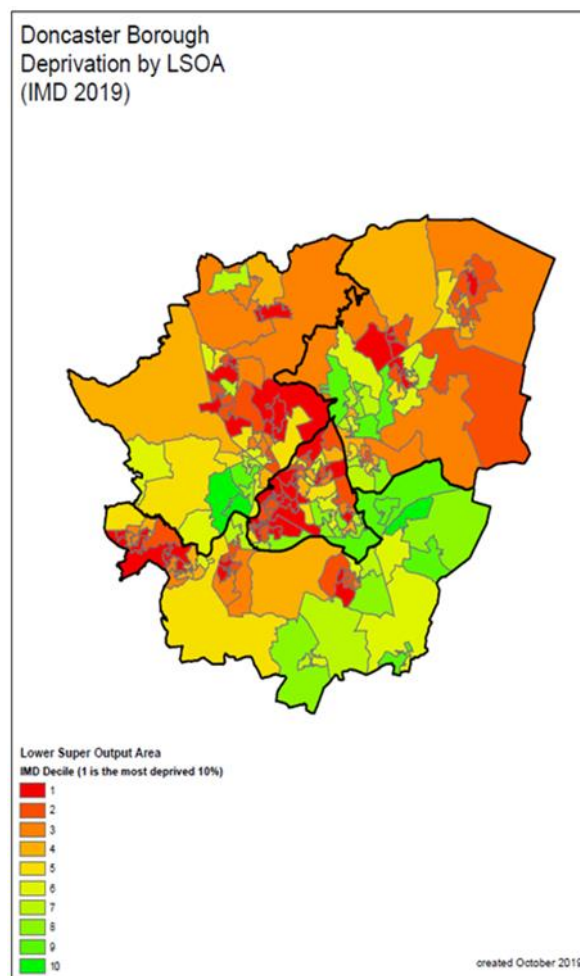

Figure 7. Deprivation Doncaster Borough Wide

The dimensions of deprivation used to classify households are indicators based on four selected household characteristics.

Wealth Inequalities

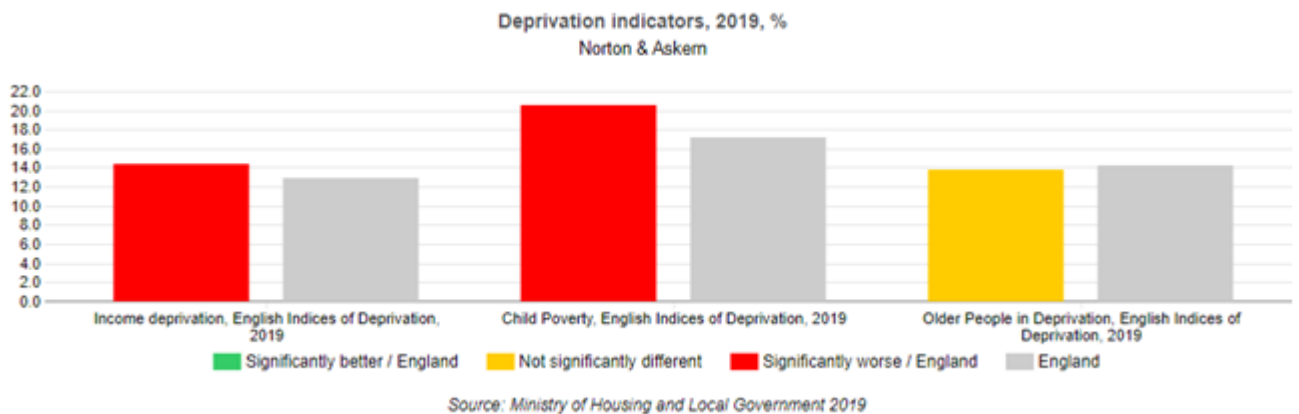

Figure 8. Deprivation Indicators Norton and Askern in comparison to England

Figure 8 shows that Askern and Norton have higher levels of income deprivation and child poverty when compared to England. However, this is not representative for Fishlake, Fosterhouses and Sykehouse, which has smaller pockets of deprivation (figure 9).

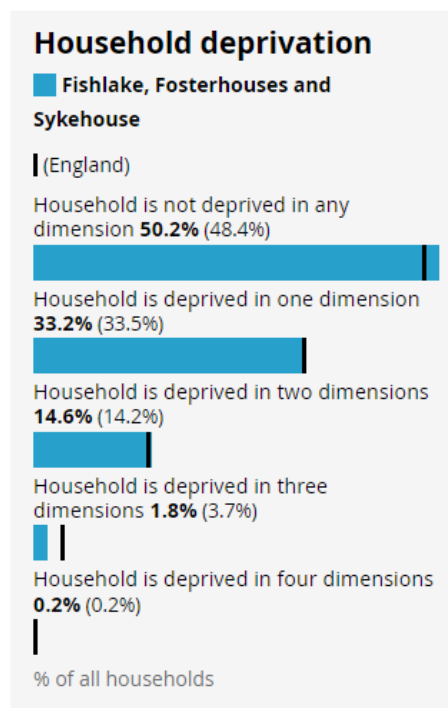

Figure 9. Household deprivation in Fishlake, Fosterhouses and Sykehouse

There is only 0.2% households within this specific geographical area that is classed as being deprived in four dimensions which aligns with the rate for England. However, there are slightly more households that are not deprived in any dimension than that of England.

Public Health England data shows there is a higher proportion of residents in Askern, Norton and Campsall ward (16.7%) living in deprivation due to low income compared to the Doncaster (16.6%) and national average (12.9%). It should be noted that this data reflects levels of both unemployment rates and working-age adults on low earnings.

Fuel Poverty

Table 1. Rates of Fuel Poverty at LSOA level in Norton & Askern ward (Office of National Statistics, 2022)

LSOA Code	LSOA Name	Community Name	Number of households	Number of households in fuel poverty	Proportion of household's fuel poor (%)
E01007469	Doncaster 005B	Skellow Hall Area	539	71	13.2
E01007487	Doncaster 002A	Campsall	718	107	14.9
E01007488	Doncaster 002B	Moss and Kirk Bramwith	716	115	16.1
E01007489	Doncaster 002C	Askern Town North	957	162	16.9
E01007490	Doncaster 002D	Burghwallis	720	123	17.1
E01007491	Doncaster 002E	Instoneville	682	195	28.6
E01007492	Doncaster 002F	Askern Town South	747	151	20.2
E01007493	Doncaster 002G	Norton	735	95	12.9
E01007625	Doncaster 004A	Fishlake & Forsterhouses	616	86	14

Many residents are also living in fuel poverty. Fuel poverty is defined as a household living on a lower income that is not deemed reasonable enough to warm a home sufficiently. According to fuel poverty by Parliamentary constituency, North Doncaster has the highest rates of fuel poverty (19.1%) in comparison to Don Valley (15.4%) and Central Doncaster (18.1%). According to the National Office of Statistics (2022), Instoneville has the highest percentage of households living in fuel poverty when compared to other LSOA areas within the ward.

Older People living in Poverty (IDAOPI)

Older people living in poverty in the Askern and Norton Ward are lower at 13.8% than for that of Doncaster at 15.9% and England at 14.2%.

Employment

Most people in Fishlake, Fosterhouses and Sykehouse are economically active. This is shown in the heat map below showing very low levels when compared to neighbouring Thorne.

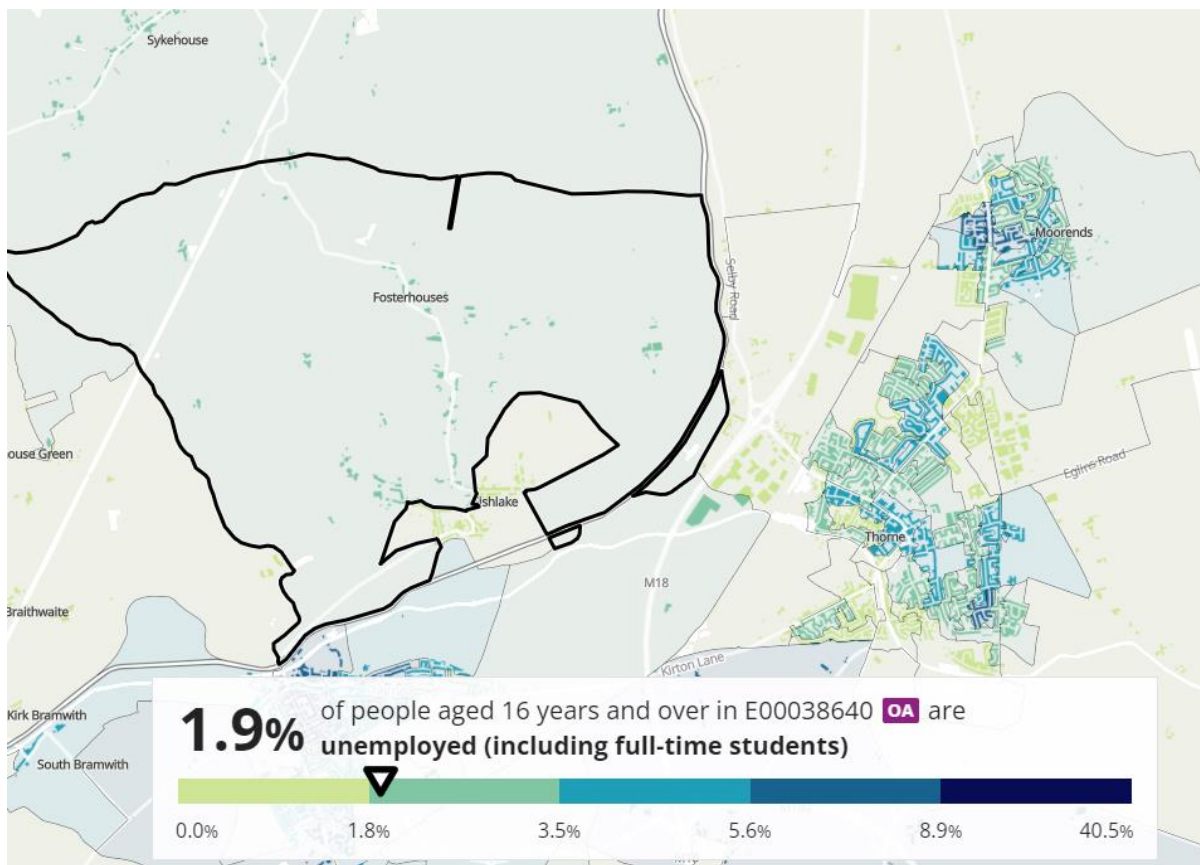

Figure 10. Unemployed residents over the age of 16 in Fosterhouses

However, when looking at the next graph the figures shown are slightly lower than that of the average for England, this is likely to reflect a higher number of people who choose not to work, as official unemployment figures are low.

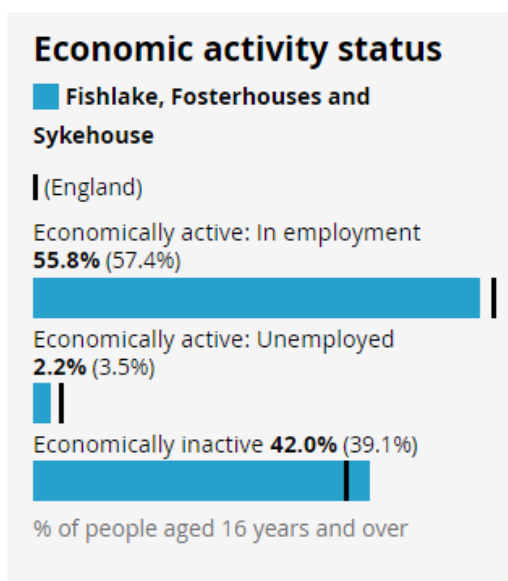

Figure 11. Economic activity status in Fishlake, Fosterhouses and Sykehouse

Other interesting data shows that high numbers of people in Fishlake, Fosterhouses and Sykehouse work from home.

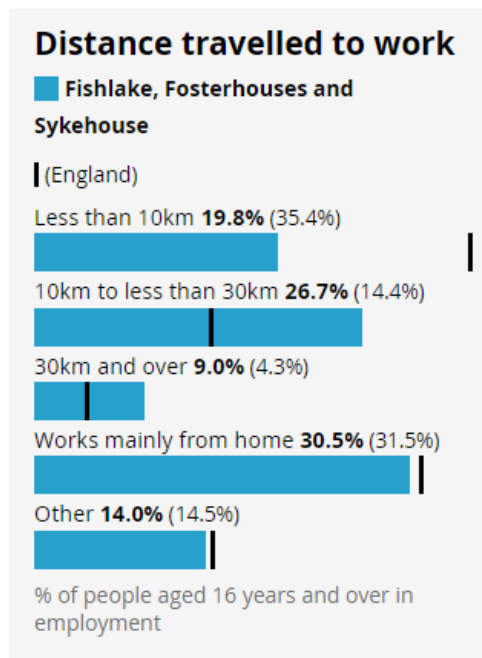

Figure 12. Distance travelling to work from Fishlake, Fosterhouses and Sykehouse

Citizens Advice Doncaster Borough

Citizen’s Advice Doncaster Borough (CADB) are an independent charity and part of the Citizens Advice Network across England and Wales. They provide free, confidential, and impartial advice and campaign on money, benefit, housing or employment issues affecting people’s lives. There are 89 residents living in Norton and Askern currently accessing CADB. During the 2023/24 fiscal year, Norton and Askern has the 4th highest number of interactions with CADB in the North of Doncaster. Benefits and tax credits, debt, utilities and communications, benefits and universal credits and housing issues are the top 5 issues when seeking support.

Figure 13. number of interactions with Citizens Advice Doncaster Borough (CADB) during fiscal year 2023/24

Alcohol Intake

Admissions associated with alcohol incidences and myocardial infarctions (heart attacks) in Norton and Askern are a cause for concern, with higher rates than Doncaster and England. Alcohol misuse and self-management of long-term poor lifestyle choices should be considered during preventative work to reduce the risk of such incidences.

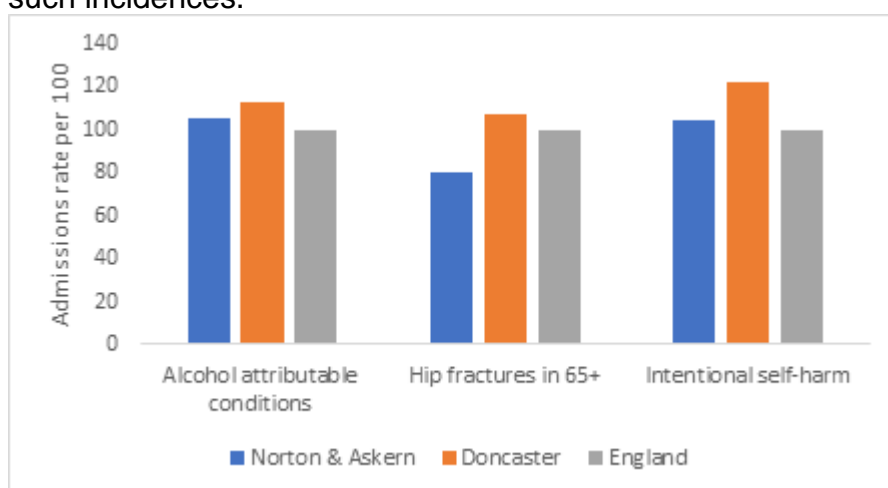

Figure 14. Comparison of hospital admissions across 2016/17-20/21

More specifically, Figure 13 shows data taken at LSAO level and highlights discrepancies across communities when relating to alcohol incidences. There are considerably more issues related to alcohol in Campsall (137 per 100) than Norton and Askern. Campsall has the second highest rate of alcohol related incidences in

North Doncaster. The lowest incidences are reported for Fishlake, Fosterhouses and Sykehouse.

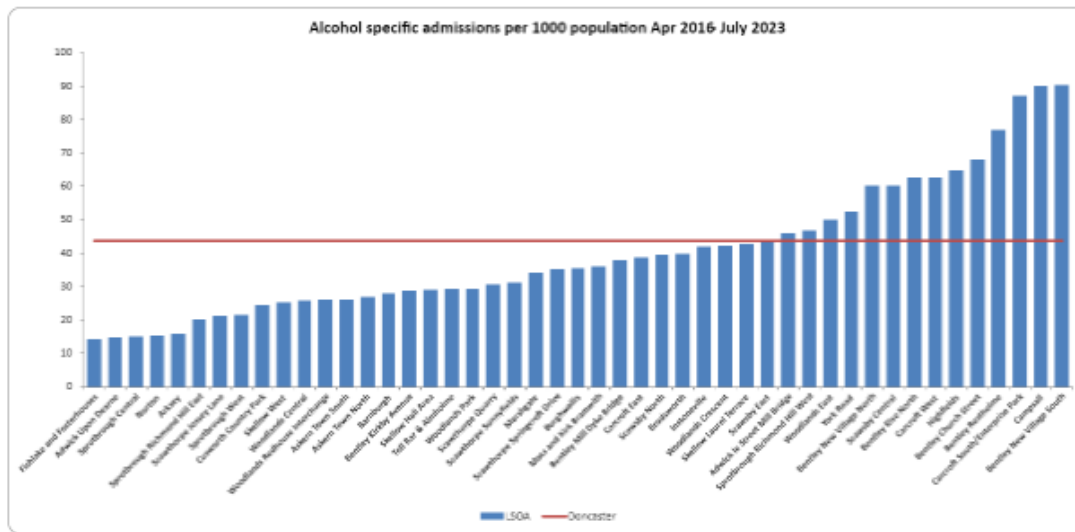

Figure 15. Alcohol Specific Admissions per 1000 population April 2016-2023

Smoking

Using data from the nearby Field Road Surgery when registering as a patient 20.60% of patients aged over 15 reported to be smokers, this is higher than the Doncaster Average of 17.96%. As explained previously this data may not represent the communities of Fishlake, Fosterhouses or Sykehouse. But it is relevant when considering the leading cause of death in the Askern and Norton Ward Data is shown to be respiratory diseases.

Food Poverty

There are 8 active foodbanks in the North locality of Doncaster, however due to the location the Foodbanks in Thorne and Moorends in the East are closest to Fishlake, Fosterhouses and Sykehouse. The Cost-of-Living Crisis, Low income, Benefit Changes, Debt and Benefit delays are the top 5 reasons for residents accessing support from foodbanks across Doncaster. Figure 5 shows demand for food support has increased since April 2022 across North of Doncaster. An average of 164 adults are supported by food parcels every month in North of Doncaster, whilst 97 children are supported by food parcels every month. It must be noted that this data does highlight where residents are accessing support, and therefore it is unknown where food poverty is more prevalent.

Figure 16. Number of Adults and Children accessing foodbanks in North of Doncaster (2023)

Health Inequalities

Long-Term Health Conditions

The proportion of residents with poor health in Norton and Askern is considerably greater than the national average. OHID reported 23% of residents as having a limiting health condition or disability compared to an average of 17.6% across England. In addition to this, residents have self-reported that their health is poorer than across Doncaster and England. That is, 20.5% of Norton residents, 24.3% of Askern residents and 21.8% of Campsall residents reported their health as fair, bad or poor whilst a total of 65.4% of residents are registered disabled under the Equality Act across Norton, Askern and Campsall.

Hospital admissions for those living with limiting illnesses or health conditions largely associated with poor lifestyle choices are significantly higher across Askern and Norton ward. Figure 12 shows the number of emergency admissions to hospital per 100 people for Chronic Obstructive Pulmonary Disease (COPD), Myocardial Infarction, Strokes and Chronic Heart Disease (CHD).

Figure 17. Comparison of hospital admissions across 2016/17-20/21

Life expectancy

The figures shown are for the Ward of Askern and Norton and are not significantly different to that of England but are higher than the ages for Doncaster.

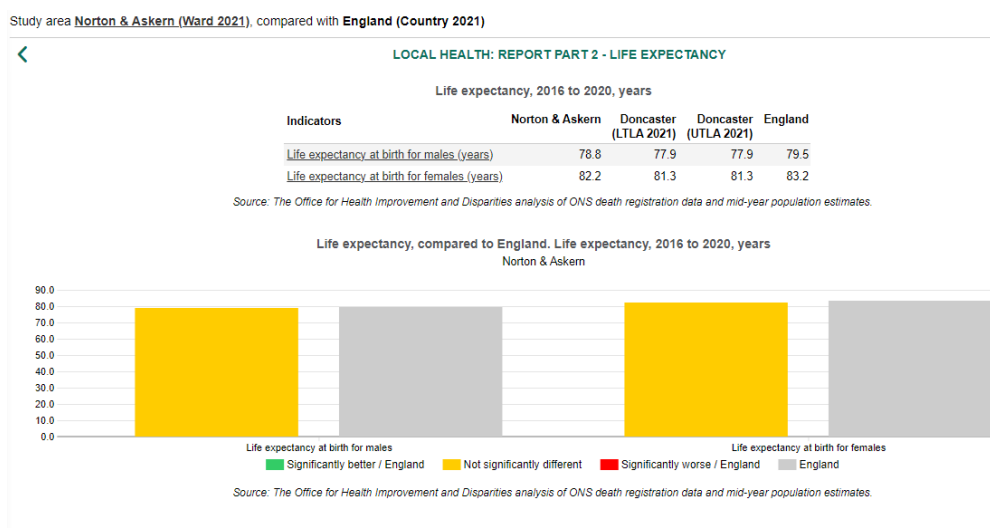

Figure 18. Life expectancy between Norton, Askern, Doncaster, and England

Childhood Development

A child's early experiences are vital in providing the foundations for children to develop healthily and happily. Children being born into deprivation and living amongst deprivation in their early years are more likely to experience a wide range of health problems, fall behind their peers and face employment problems in adult life. The quality of early experiences is important as children develop, providing opportunity for motor (physical), intellectual (language and communication), cognitive and socio-emotional development.

Childhood Obesity

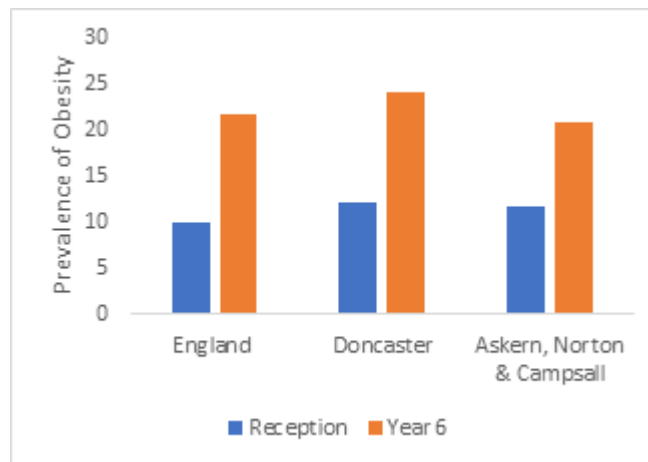

Figure 19. Childhood obesity in England, Doncaster, Askern, Norton and Campsall

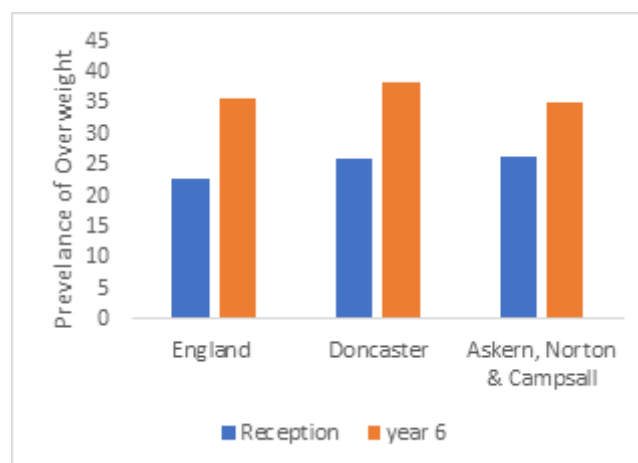

Figure 20. Prevalence of overweight children in England, Doncaster, Askern, Norton and Campsall

Children classified as overweight (including obese) in reception are more prevalent in Askern and Norton ward (26.3%) compared to the average of Doncaster (22.6%). This trend continues into year 6, where a significantly higher proportion of children are

reported to be overweight, obese, or severely obese (35.2%). The longevity and early onset of such health risks suggests public health interventions need to target families and children at a much earlier age to educate them on healthy lifestyle choices and the impact of poor choices on their health.

Data over the last 12 months does suggest school aged children do consume some form of healthy foods during the week. That is, 65% children reported to have eaten fruit and/or vegetables most or every day of the week in 2021. There is also a smaller proportion of pupils reported to consume takeaways most or every day of the week (9%) compared to Doncaster's 13% average. More specifically, public health interventions may need to focus on educating school aged children and parents on food choices and eating balanced meals, incorporating fruit and vegetables.

OHID data shows the rate of A&E admissions and emergency admissions in under 5s are both significantly lower in Askern and Norton ward (94.7 per 1000) than England (140.7 per 1000). However, the rate of emergency hospital admissions for ages 15 to 24 are significantly higher in Askern and Norton ward (164.8 per 1000) than figures reported for England (127.9 per 1000) and slightly higher for Doncaster (161.6 per 1000).

Physical Activity

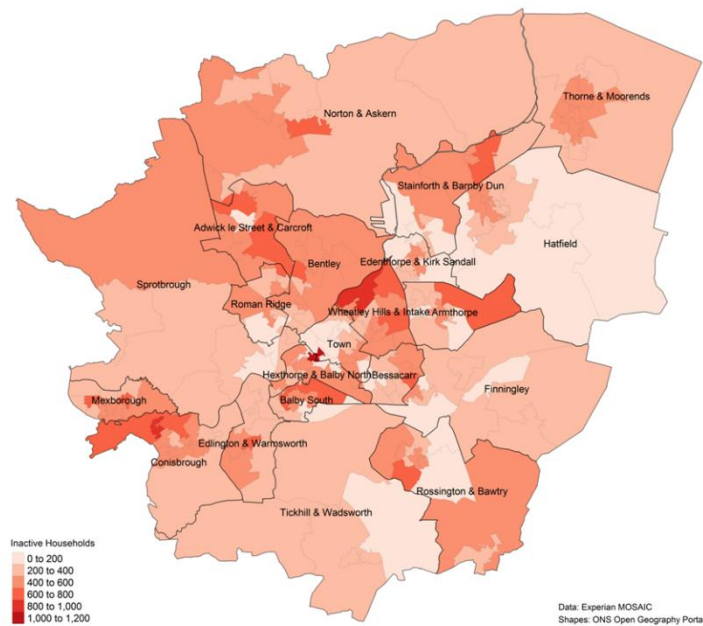

Figure 21. Inactive households in Doncaster

Mosaic data shows that a percentage of Norton and Askern residents do engage in enough physical activity but there still remains a large proportion who are inactive.

Green Spaces and Parks

The residents of Fishlake have access to a playing field as well as toddler and junior play areas at Pinfold Lane Play Area.

Community Information

Population

Population Size

Age Profile

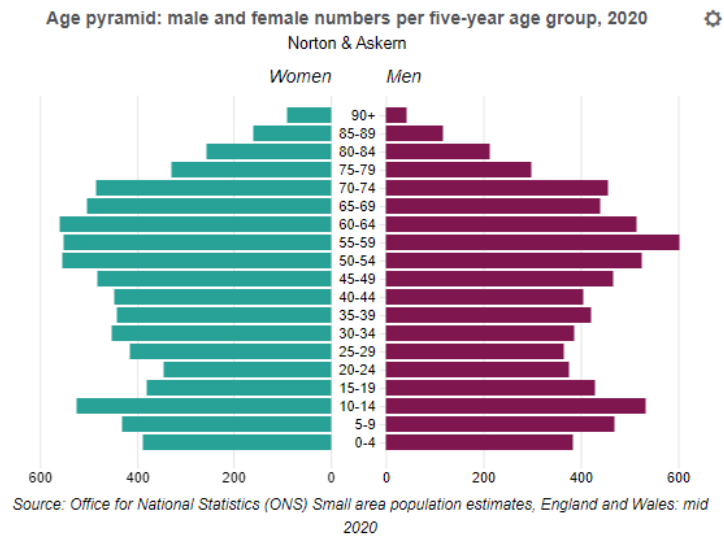

Figure 22. Age Profile

Ethnicity and Language

Using data from the 2021 Census it shows that 99.2% of the population of Fishlake, Fosterhouses and Sykehouse consider themselves to be white this compares to 81% in England.

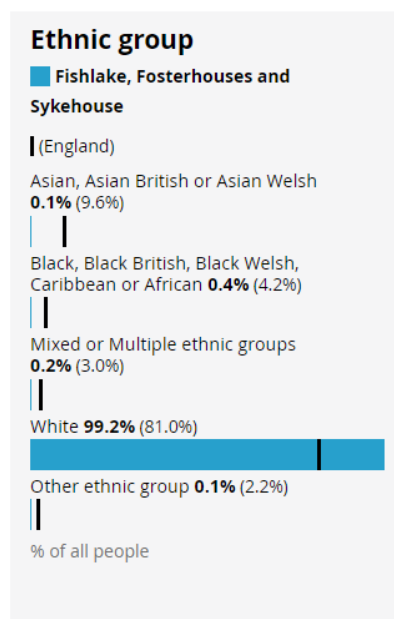

Figure 23. Ethnic groups within Fishlake, Fosterhouses and Sykehouse

Data shows that the majority of people living in Fishlake, Fosterhouses and Sykehouse own their property (52.6%) outright the figures are significantly higher than for England

(32.5%) as shown in the graph below. The graph also shows a very low level of Social Housing, and a lower than average figure of homes in the private rental sector.

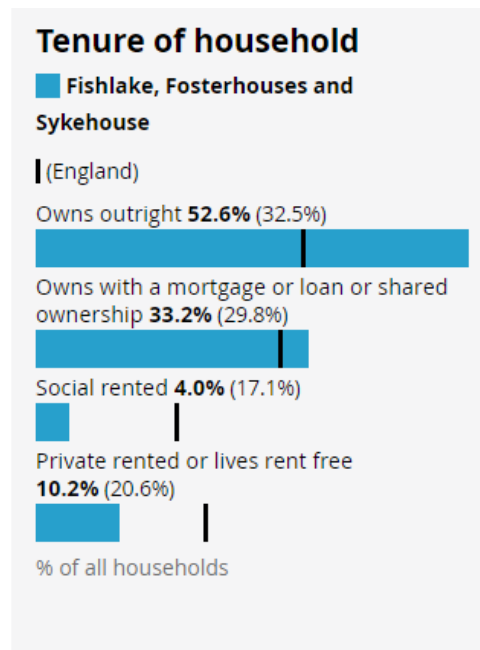

Figure 24. Tenure of households in Fishlake, Fosterhouses and Sykehouse

Crime/ Antisocial Behaviour (ASB)

North locality reported the lowest number of ASB, hate crime and low-level crimes during the first 6 months of 2023/24. Figure 25 shows that Norton and Askern had one of the lowest rates of crime and ASB across the North Locality.

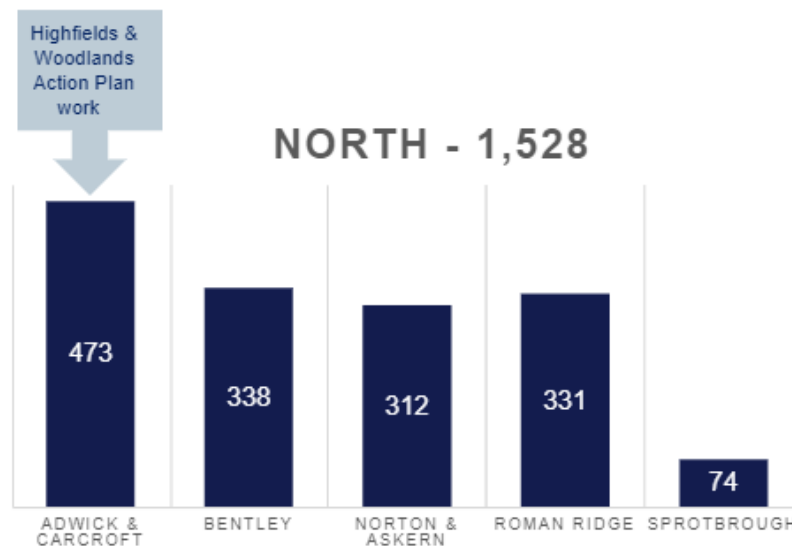

Figure 25. Number of early interventions, ASB, hate crime and low-level crime issues identified and managed at Locality level (Stronger Communities, Doncaster Council 2023/24)

Community Insight

Appreciative Inquiry

The Well Doncaster Team undertake an Appreciative Inquiry within communities to gather insight to support co-designing action plans with the community. The AI questions are structured to pull on the successes of the past and present, to seek new potentials and possibilities and build on those through the Dream and Design stages.

The Appreciative Inquiry will include the following steps:

1. **Discovery** – This will involve engagement with the residents of Norton and Askern Ward to find out what is working well in the community. Responses will be themed to allow priorities of the community to be established.
2. **Dream** – Residents and key stakeholders will be invited to attend an initial workshop to discuss what ideas they have for their community and how these will meet the priorities highlighted in the discovery phase.
3. **Design** – All attendees are invited back for a second workshop to develop an action plan to direct work for the community.
4. **Deliver** – A collaborative way of working and investing resources in working towards to the actions from the previous phase.

This is a key reason as to why they choose to live in these communities. Some residents feel that this feeling of safety is closely linked with having such a close-knit community.</p>

		<p>'My children are safe here. And can socialise with their friend as they live close by.'</p> <p>AN1265</p> <p>'Nice local pub to socialise.'</p> <p>AN1265</p>	
Places of interest	Askern lake	"I love Askern, Askern Lake, Askern library" AN11	Askern has a number of community assets that are of interest to most residents. These assets are both indoors and outdoors and offer an array of services. Residents feel strongly about Askern Lake and the positive effect it can have on people.
	Green spaces	"Green spaces, Askern Lake, outdoor places" AN27	
Amenities	Shakers	"My son loves the parks we have a good variety of parks" AN14	
	Library	"Askern Lake, shakers, shops, bike routes" "Shakers is fantastic" AN7 'Local amenities are great, Nice local pub to socialise' AN1265	
Outdoor activities	Fishing	"Fishing is something I do in my down time to chill out" AN3	Within Askern and Norton villages residents are able to access outdoor activities. These activities have health and social benefits which make them so important to the local community. Fishing is important to residents and is an activity that a number of residents regularly take part in. Walking routes and places to walk are easily accessible for residents in Askern, with access to Campsall country park and Askern Lake fairly easy.
	Walking	"The lake has an array of things to do." AN4 "I don't drive so can't get about further" AN21	

It should be noted that insight is captured as 'Norton and Askern Villages' and data may include the seven outer lying villages. Well Doncaster continue to capture insight to fully understand Fishlake, Fosterhouses and Sykehouse as a community.

Community investment

Table 2. Community Investment across North Locality (Doncaster Council, 2023)

Ward	Total Amount by Ward	Funding Type	Total Amount by Locality
Norton & Askern	£104,900.00	VCFS, Ward Members, Barrier Buster, Community Booster, Active Communities Grant, Community Wealth Builder Support (X4), Locality Commissioning, Holiday Activity Fund, LSCIF Round Two, Community Investment Fund, Community Wealth Builder Grants, Dragon's Den, Ward Members	£804,160.00
Adwick Le Street & Carcroft	£93,710.00		
Sprotbrough & Cusworth	£104,840.00		
Roman Ridge	£45,810.00		
Bentley	£454,900.00		

In the North locality, the sum of investment in community organisations was £804,160.00 as of November 2023. The main source of grants has been 'Community Wealth Builder Support', followed by 'VCFS Fund and 'Active Communities Grant'. The top priority for investment in the North was to 'enable positive lifestyle choices including weight management, smoking cessation, physical activity, drug and alcohol misuse', followed by 'children and young people provision', 'support physical activity', and 'community spirit'.

In the Norton and Askern ward, investment totalled £104,900 as of November 2023. A total of 13 community organisations have received funding including Askern CRY foodbank, Breaking Beats Ltd and The Young Folk Foundation. The top priority for investment in the Norton and Askern ward was 'children and young people provision'.

Locality Plans

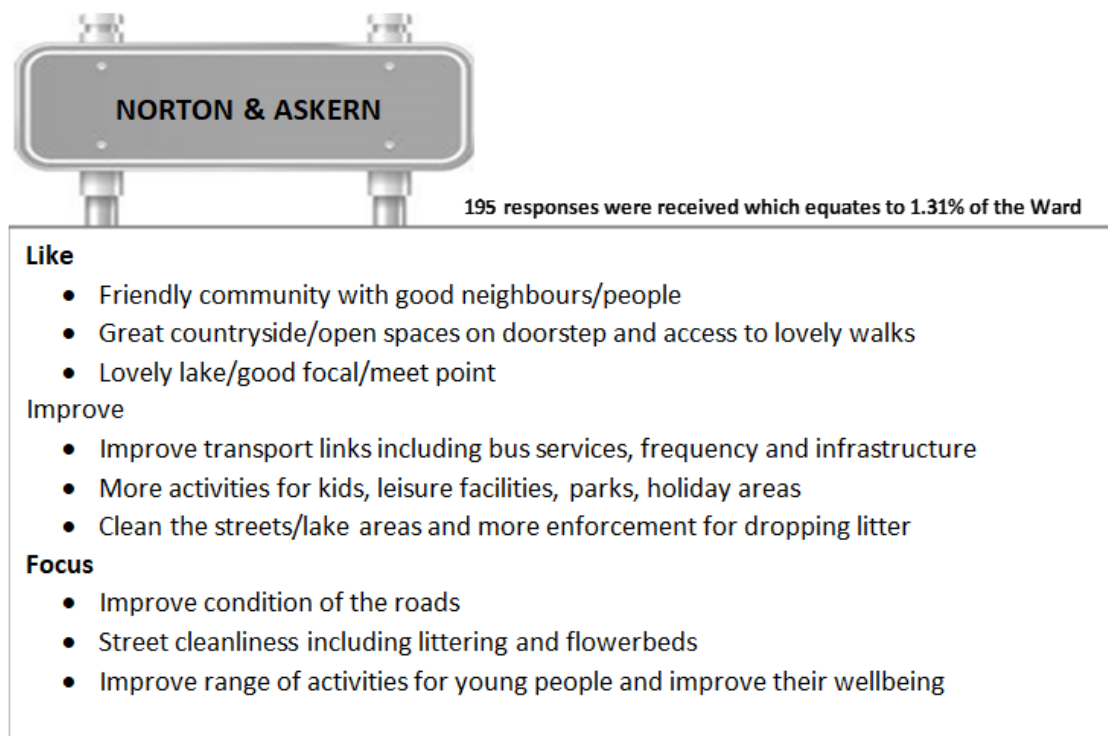

Locality plans have been developed by Team Doncaster to look at how we can work together to strengthen communities and improve the lives and opportunities for the residents living there. This plan has been put together with more input and engagement from those living and working in the North locality. Communities have told shared exactly what they want to see change and improve in the areas where they

live, and this insight has enabled a workable plan to deliver in conjunction with our communities and partners.

For more information on the North Locality plans, please visit [North Locality Plan 2023 - Draft Version.pdf \(windows.net\)](#)

Doncaster Talks

In 2019, Doncaster Talks undertook insight across the borough. Responses were separated into wards and thematically analysed. Across Norton and Askern 195 responses were recorded and the main themes on what people liked about the area, what could be improved, and what the borough should focus on are displayed in the table below:

Appendix <https://getdoncastermoving.org/uploads/behavioural-insight-phase-one-summary-report.pdf?v=1644581925>

[Census Maps - Census 2021 data interactive, ONS](#)

Public health Data

Public Health Data

Fingertips

This is a new fingertips profile that uses data from Local Health an existing PHE data tool. Local Health is a collection of quality assured health information presented for small geographical areas. By presenting data for small areas, Local Health provides evidence of inequalities within local areas. It supports targeted interventions to reduce such inequalities.

Local Health contains indicators related to:

- Population and demographic factors
- Wider determinants of health
- Health outcomes

It presents data for middle super output areas (MSOA), electoral wards, clinical commissioning groups (CCG), local authorities, and England as a whole.

Please note, as the Local Health tool was designed to allow users to map small area data, a mapping option has not been provided in this profile.

<https://fingertips.phe.org.uk/profile/local-health/data#page/0>

[Local Health - Public Health England - Reports: get a dashboard on a custom area](#)

Acorn profiles

Wellbeing Acorn segments the population into 4 groups (Health Challenges; At Risk; Caution; Healthy) and 25 types describing the health and wellbeing attributes of each postcode across the country. By analysing significant social and health related behaviour, it provides precise information and an in depth understanding of upstream issues affected by current lifestyle traits

INTERPRETING THE REPORT

The Wellbeing Acorn profile report helps you understand the underlying demographics, lifestyle and health attributes of your customers and service users by comparing their Wellbeing Acorn profile to a base (e.g. UK population, area or other customer groups).

INDEX

The Wellbeing Acorn Profile contains 12 variables that are indicators of Disability or Infirmary in the population and 9 variables related to unhealthy Behaviours. The average score measured against the base profile of Yorkshire and the Humber is 100. A value above 100 indicates that the area population is overrepresented for this characteristic, below 100 the value is less than the average or underrepresented.

Get Doncaster Moving survey

<https://getdoncastermoving.org/uploads/behavioural-insight-phase-one-summary-report.pdf?v=1644581925>

Mosaic data

Mosaic Public Sector classifies the UK population into one of 66 types and 15 groups through a detailed and accurate understanding of each citizen's demographics, lifestyles, behaviours and location.

The Physically Inactive Population of Doncaster

The Physically Inactive Population of Doncaster

The MOSAIC types who “Do not exercise” and “Do not take part in Sport” were searched and three priority groups have been identified through work with strategic

partners as part of the development of Doncaster's Physical Activity Strategy. The three priority groups are:

- The Inactive
- Families with children and young people
- People living in income deprivation

These groups are cross-referenced against the inactivity list allowing for the identification of MOSAIC types which are both likely to be inactive and living in deprivation as well as inactive and from households with children and young people.
