This Report

This report covers the communities of the village of Old Edlington and part of “new” Edlington. The combined areas fall within the boundary of the Lower Super Output Area (LSOA) 034E, which in turn shares the electoral ward with the whole of Edlington & Warmsworth in the South of Doncaster borough. Data on the village of Old Edlington is limited and has been added where available, but overall the statistics are skewed by the much larger, and very different population of the Tait Avenue area. The resulting data and statistics are therefore very similar to the larger Edlington area.

The report begins with a one-page summary outlining key information and priorities for the area. This document shows the initial conversations with communities, including ward members, community organisations, faith groups, residents and other organisations who work in the area. Communities’ knowledge of their own areas enables them to identify their strengths and the assets on which they can build on. This document is shared with the intention of supporting those conversations and sharing information that might not be readily available to local people.

Edlington

One page Summary

Ward of Edlington & Warmsworth

Edlington, Warmsworth and the village of Old Edlington are distinct communities with different levels of need and population size. This report is produced as an addendum to the Edlington Community Profile and will focus specifically on Old Edlington and the Tait Avenue area. The ward is rich in physical assets such as community buildings and a thriving third sector with a number of large anchor organisations active in the community. Old Edlington/Tait Avenue has access to these assets but being largely rural/agricultural has few local assets.

Most of the housing within Edlington is social rented stock. This tenure composition is significantly different to the Yorkshire and Humber benchmark. The housing stock type is primarily terraced or semi-detached properties, matching the highly dense profile of Edlington. Housing within Warmsworth and Old Edlington comprises predominantly owner occupier semi and detached houses.

Poverty and deprivation are significant challenges in Edlington, and observations clearly indicate significant difference in Old Edlington and Warmsworth. Despite Edlington's high population of working-age adults, unemployment and long-term unemployment figures are higher than national rates amongst the predominantly white British community. Many children are currently living in poverty, and this is likely to be a significant contributing factor of poor child development and lower educational levels. It is vital to consider how poverty can be mitigated through actions that support the community and improve the health of its residents.

Edlington's population has a lower than average life expectancy and live more years in poor health with high levels of feeling low, self-harm and depression. Compared to Doncaster and England there is a high number of people who report their health as bad, or very bad, or who have a long-term limiting illness. There are low levels of people of all ages engaging in physical activity, significantly high levels of obesity, and a high percentage of residents living with conditions such as coronary heart disease which can be linked to poor lifestyle choices.

Old Edlington/Tait Avenue

The first records of the village of Old Edlington date to the 11th century when it was mentioned in the Domesday Book of 1086. The original village centred around the Norman Church of St Peter, which stands at a crossroads on the B6376. Today it consists of approximately 50 mainly detached properties, and there are no specific statistics on current population size. The area covered by this addendum (i.e. LSOA 034E) incorporates part of Edlington that was built in the 1950s to extend New Edlington and accommodate an influx of migrant mineworkers. Incorporation of the two disparate areas results in the statistics reflecting those of the newer area rather than the smaller original old village.

The combined population is 1,665 and is currently integrated in the ward of Edlington & Warmsworth. It has a high number of working-age adults. The community is predominantly White British with households containing lone parents being more prevalent than in other areas of the borough. Almost half of the population has an income less than £20k. 59% of the tenure are semi-detached. Most of the housing is social rented.

Key Priorities

The following data has been taken from Public Health Fingertips which can be found in the [appendix](#). Edlington as a whole has a range of health priorities, which are as follows:

- Poverty is a key issue with 26.5% of children living in poverty and levels of unemployment are high (4.3%).
- Low school attainment, particularly at secondary school.
- Poor healthy life expectancy - it would be important to consider risk factors for respiratory and circulatory conditions such as high levels of smoking and alcohol consumption.
- Inactive and deprived households with children and young people.
- High levels of childhood obesity (particularly as they enter year 6) and adult obesity.

Key Health Insight of Old Edlington/Tait Avenue

- About 28% more than in other areas will have felt downhearted and depressed in the past 4 weeks.
- Approximately 25% considers themselves have poor general health.
- Incidents of stroke are 19% more likely than in comparable areas.
- Issues such as chronic bronchitis are about 26% above the base average.

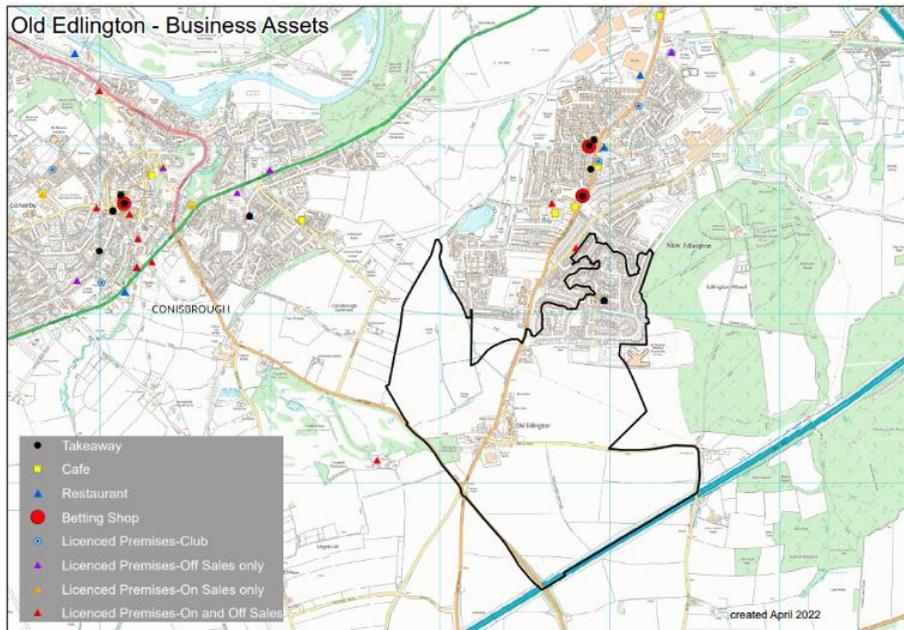

Assets

Old Edlington/Tait Avenue is a largely rural, former mining community. It has few assets within the specific area but has access to assets in the wider community of Edlington. It should be noted that these maps are a starting point in understanding the community and that further work is needed amongst the community to understand all the assets and how they are used.

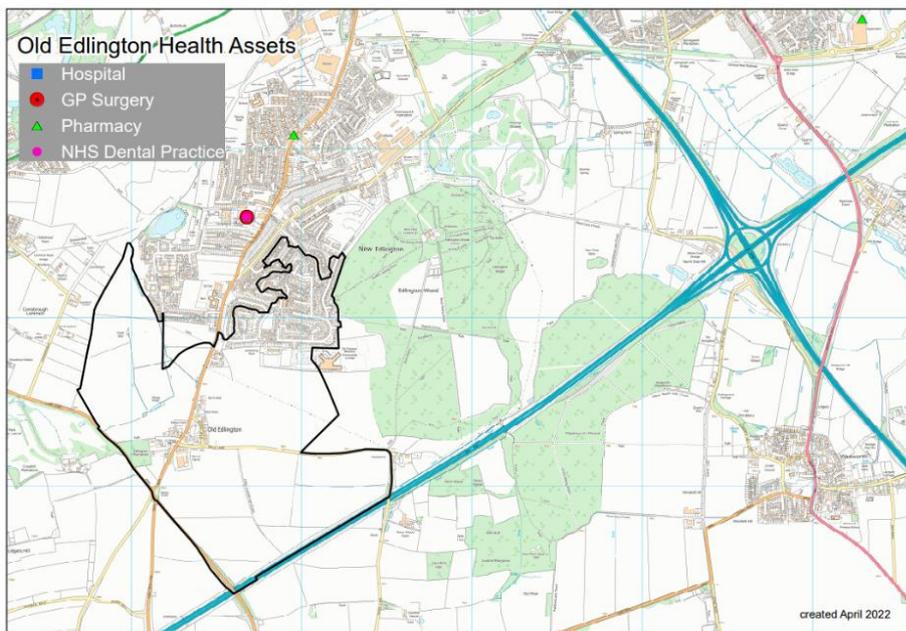

The following maps show different types of assets across Edlington with specific emphasis on Old Edlington/Tait Avenue. The maps have been developed using ward boundaries rather than Middle Layer Super Output Areas (MSOAs). Larger versions of these maps can be accessed in the [appendix](#).

Business Assets

Business Assets of Old Edlington/Tait Avenue

Health Assets

Table of Health Assets in the ward of Edlington & Warmsworth:

Health Assets		
Asset	Name	Postcode
Dentist	Dental Suite, The Martinwells Centre	DN12 1JD
GP	Field Road Surgery	DN12 1JD
	The Edlington Practice	DN12 1JD
	The Nayar Practice	DN12 1JD
Health Centre	Martin Wells Centre	DN12 1JD
Pharmacy	H I Weldricks	DN12 1BU
	H I Weldricks	DN12 1JD
	J M McGill Ltd	DN4 9LS

There are no health assets in the specific Old Edlington/Tait Avenue area but the above are available, and in close proximity to the community.

Health Assets in Old Edlington/Tait Avenue

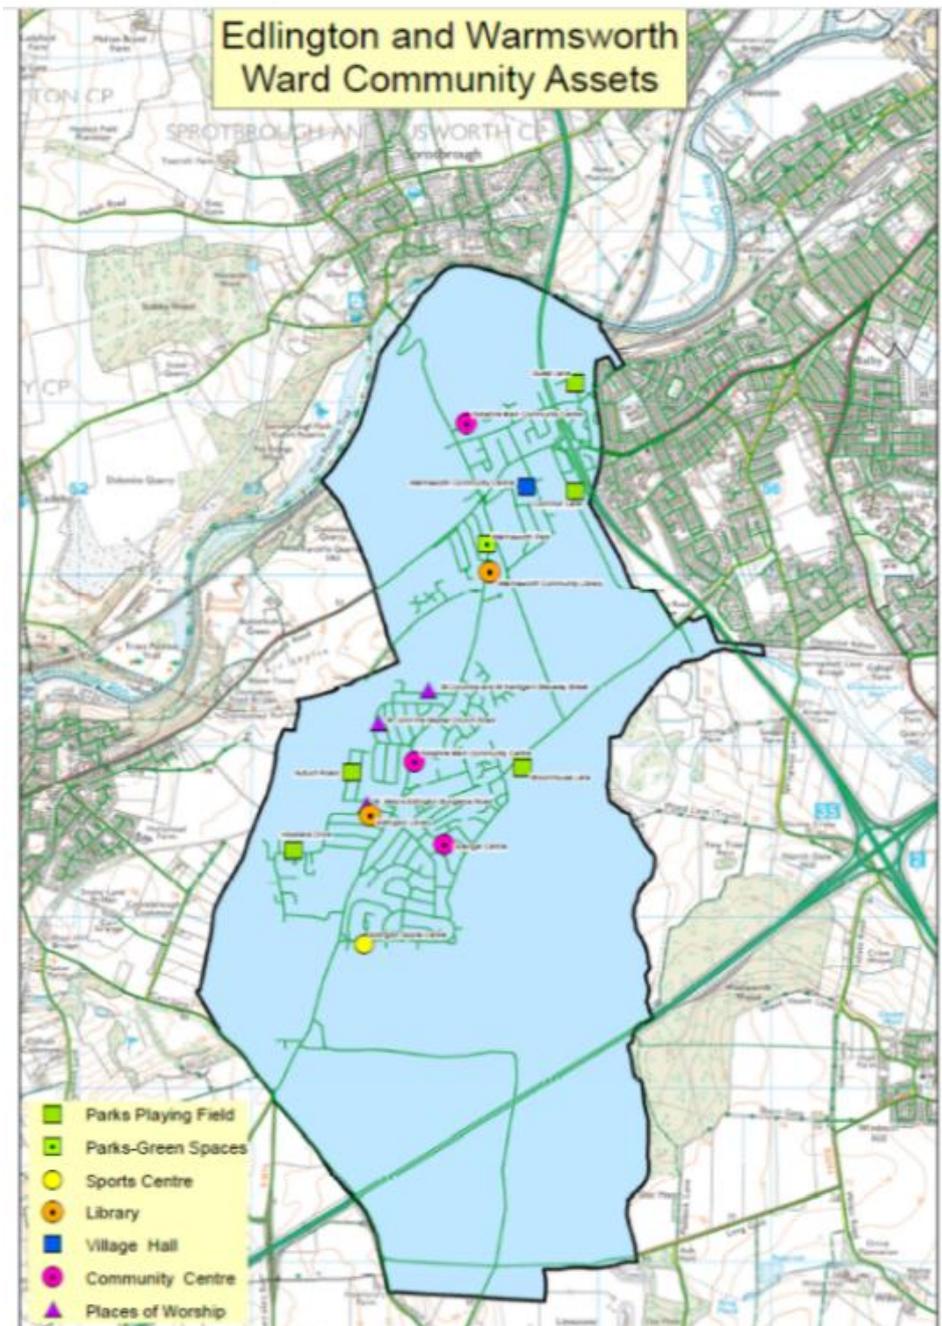

Green Space Assets

There are no green space assets in the Old Edlington/Tait Avenue, but as with all other ward assets the green space assets for the whole Edlington and Warmsworth ward are available and in close proximity to the community. Old Edlington/Tait Avenue is adjacent to open countryside and has access to countryside footpaths and open spaces. Old Edlington village also has the benefit of being a conservation area with three listed buildings.

Table of Green Space Assets within the Edlington and Warmsworth Ward:

Green Space		
Asset	Name	Postcode
Play Park	Howbeck Drive	DN12 1PW
	Guest Lane	DN4 9NT
	Common Lane	DN4 9JY
	Broomhouse Lane	DN12 1EW
	Auburn Road	DN12 1DP
Park	Warmsworth Park	DN4 9LS

	Martin Wells Lake	DN12 1PP

Community Assets

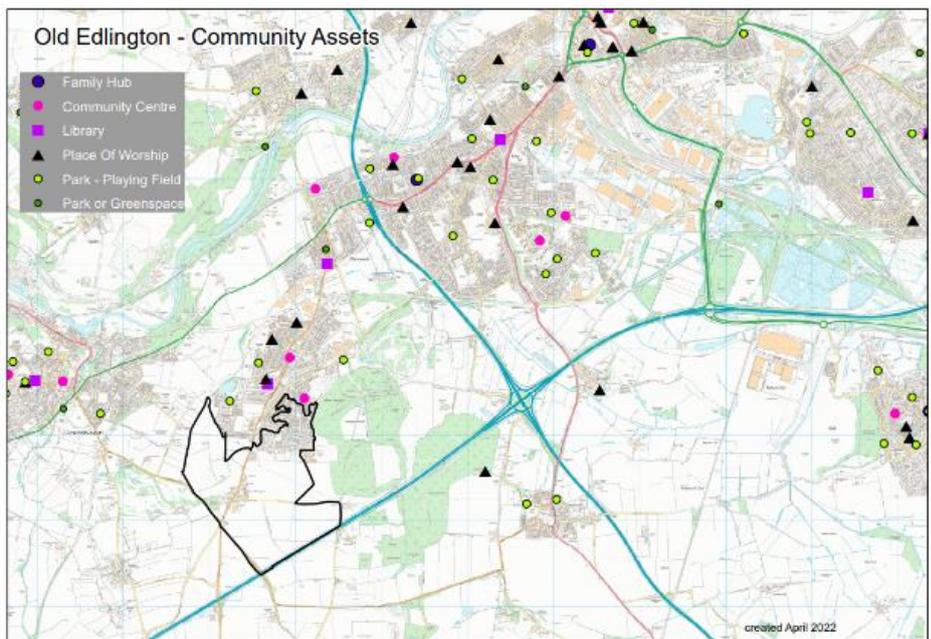

Edlington & Warmsworth Ward Community Assets

Table of Community Assets within the Edlington and Warmsworth Ward:

Community Assets		
Asset	Name	Postcode
Community Centre	Yorkshire Main Community Centre	DN4 9RP
	Yorkshire Main Community Centre	DN12 1AB
	Doncaster Metropolitan Borough Council	DN12 1JN

	Edlington Ex-Services Social Club	DN12 1AB
	The New Yorkshire Main Off Club	DN12 1BZ
	Warmsworth Cricket Club	DN4 9JY
	Yorkshire Main Miners Welfare Club	DN12 1DA
Places of Worship	St. John the Baptist	DN12 1AX
	St. Mary's Edlington	DN12 1DL
	St Columba and St Kentigern	DN12 1BW
Village Hall	Warmsworth Community Centre	
Library	Edlington Library	DN12 1JD
	Warmsworth Community Library	DN4 9LW

It is recognised that work is needed in the community to expand the understanding of who, how and what is accessed in the area. Greater knowledge of the identity of each community/ward will allow a more appropriate and effective response to community needs. Edlington remains a priority area for

*Old Edlington/Tait Avenue
Community Assets*

South Doncaster and ongoing work will continue to support it.

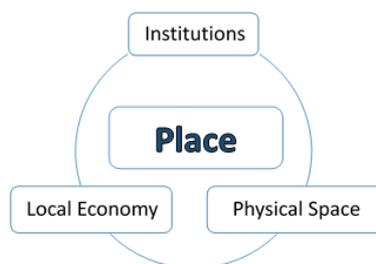

*Old Edlington Conservation Area

To see an interactive version of these maps please see appendix.

Population Health Management

Covid-19 has had a huge impact on communities. It is vital to understand the effect and direction the pandemic has had on community organisation in the ward so that: 1) support can be offered and 2) work can be implemented to manage any gaps or risks associated with changes. To support the former, Well Doncaster officers undertake regular population health management insight with community organisations in Edlington identifying their current status and needs, and work with each group to meet their goals. Although not specifically targeted to Old Edlington/Tait Avenue, it encompasses the whole of the Edlington and Warmsworth Ward. This is a living document and will be updated and adapted as needs are met and change. If you would like more detail on this please contact welldoncaster@doncaster.gov.uk. As part of a population health management approach, the following assets have been identified and themed around people and place:

Institutions (Schools/colleges etc.)	Physical space (Parks, carparks etc.)	Local Economy (Local profit Businesses)

Health and Wealth

Health inequalities are avoidable differences across the population and between different groups within society. Health inequalities arise from the conditions in which we live, work and play. These conditions influence our opportunities for good health, how we think, feel and act, therefore shaping our health and wellbeing.

Evidence shows that people living in our most deprived areas face the worse health inequalities in relation to health access, experiences and outcomes. Deprivation covers a range of issues and refers to unmet needs caused by a lack of resources, including but not limited to finances, housing and education. It is measured in different ways including the Indices of Multiple Deprivation (IMD).

Doncaster is one of the 10% most deprived communities in England. The Edlington and Warmsworth ward has a significantly different index of multiple deprivation (32.2) to England (21.7) and Doncaster (30.3). There will be significant differences within the ward, but unfortunately there are no statistics to enable assessment of Edlington, Warmsworth and Old Edlington individually.

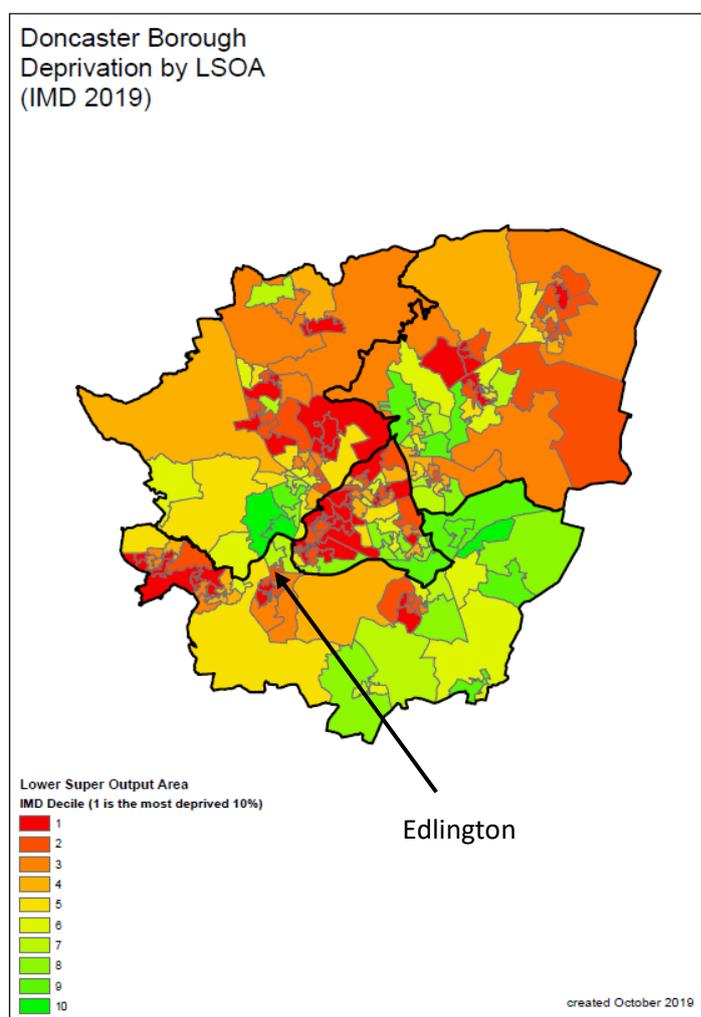

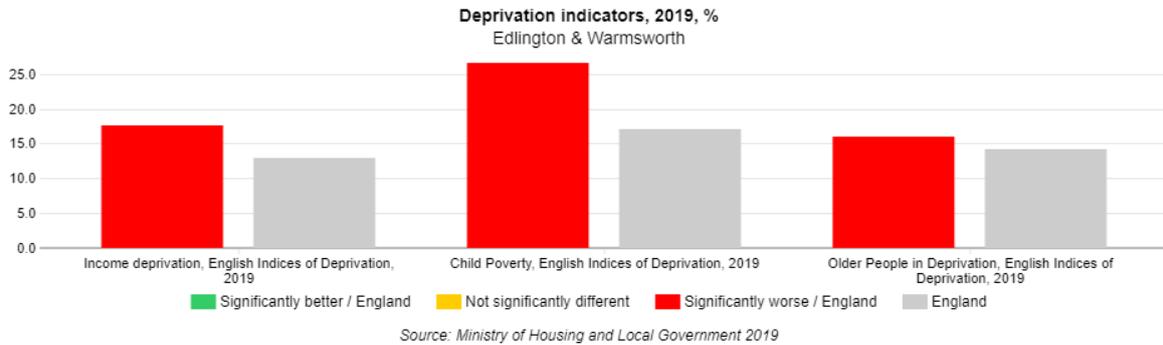

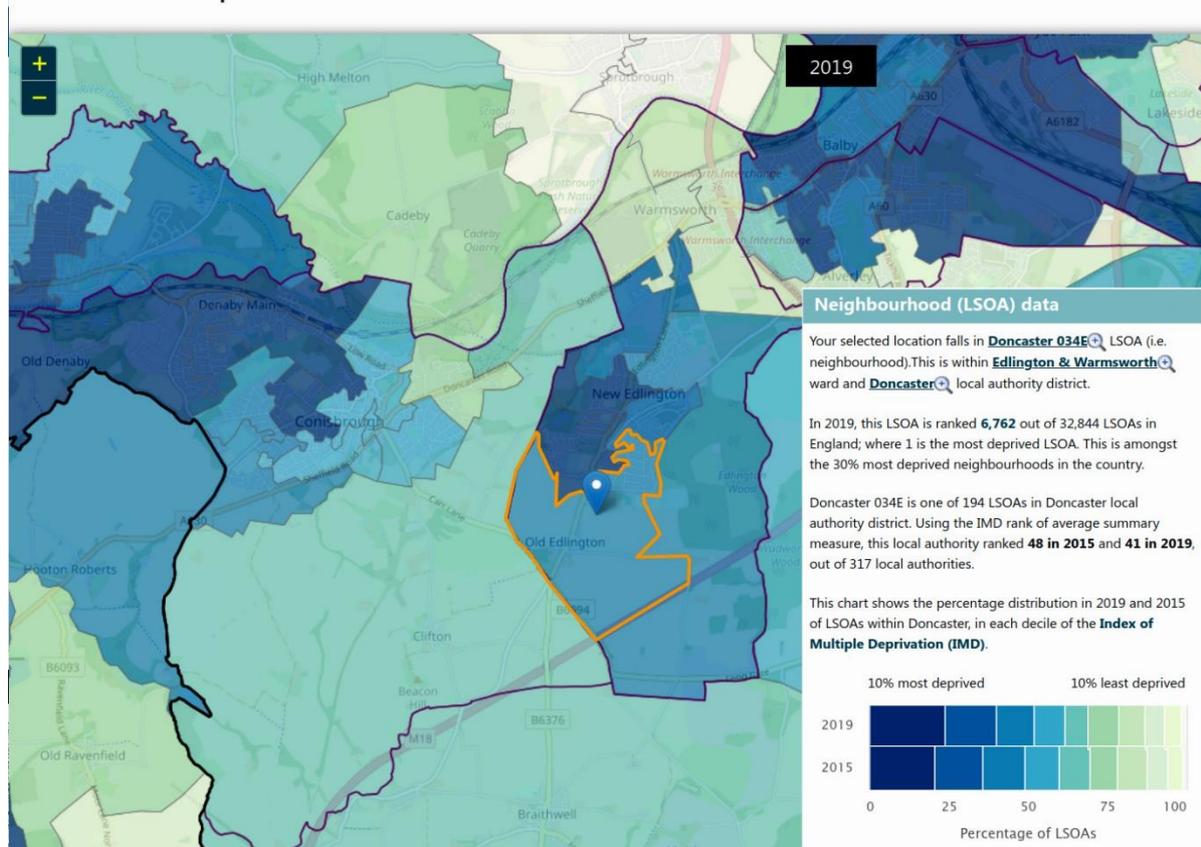

Figure 13 - Doncaster Heat Map of LSOA Deprivation

Poverty

A significantly high percentage of people in Edlington (17.6%) are experiencing income deprivation, compared to England’s rate of 12.9%. The impacts of poverty are felt across the life course with 26.5% of children living in poverty; this is significantly higher than the average of England (17.1%) and the borough (22.7%). Also, 16% of older people are living in deprivation compared to 14.2% across England and 15.9% in Doncaster.

Indices of Deprivation: 2019

Deprivation Indices for Old Edlington/Tait Avenue

(Source: dclgapps.communities.gov.uk – Indices of Deprivation 2019 explorer)

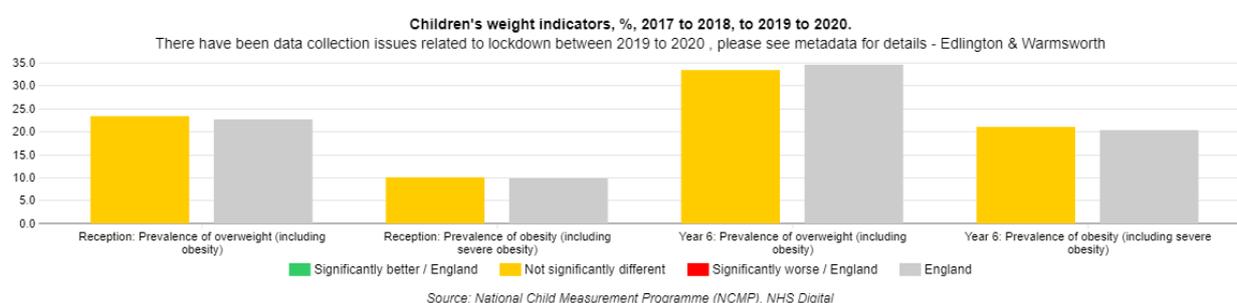

The foregoing chart illustrates the deprivation disparity across the Edlington and Warmsworth Ward, however Edlington as a whole has 23.6% of the population living in homes eligible for means-tested benefits. More children in the area are living in workless households in comparison to the rates in

Doncaster and 17% of pupils are eligible for free school meals compared to the borough average of 16%.

Health priorities

Child Development

Children in Edlington match the average of the borough for child development at age 5. The Early Years Foundation Stage (EYFS) sets standards for the learning, development and care of children from birth to 5 years old and includes a framework against which to assess child development as children reach the age of five. In 2017, 51.91% of 5 year-olds achieved this standard. However, only 36% of 16 year-olds are achieving 5 A*-C at G.C.S.E level in Edlington compared to the borough's average of 49.1%. At reception, 10% of the children are severely obese and 23.3% are overweight. At year 6, these figures increase to 21% and 33.3%, respectively and is not significantly different to England.

The 2017 Pupil Lifestyle Survey for Edlington has responses from primary schools and indicated that 20% of respondents engaged in physical activity that caused them to get out of breath and/or sweaty in the week before the survey, compared to 28% that said they did not engaged in any. This is 8% higher than the borough average. It is important to note that the Pupil Lifestyle Survey is self-reported and was not completed by all schools.

Long Term Health Conditions

The proportion of residents self-reporting poorer health in Edlington is considerably higher than the borough and national averages. Approximately 22.2% of the population reported living with a limiting illness or a long-term health condition compared to 21.7% for Doncaster and 21.7% for England.

The following chart shows the percentage of the population in Old Edlington/Tait Avenue with a diagnosis of different health conditions.

Old Edlington/Tait Avenue Health

Obesity, residents with BMI >30 creates the highest health concern in Old Edlington/Tait Avenue. High Blood Pressure is prevalent at 21.3%. 18.8% of the population in takes medication for cholesterol. The preceding data shows that incidents of stroke are 21% more likely in this area than compared to the base. 13.3% of residents have asthma. Issues related to chronic bronchitis are 26% above the comparable average. 24.7% of residents also reported having general poor health, this is 2.3% higher than Edlington as a whole.

In Old Edlington/Tait Avenue, 22.5% of the residents are likely to be cigarette smokers. This is 23% above the base average. Around 7% smoke 20+ cigarettes per a day. 10% are likely to say they never eat fruit. 47% never do moderate intensity sports, which is 26% above the base. Full fat milk is likely to be drunk by approximately 19% of the residents.

Causes of deaths - all ages, 2015 to 2019, Standardised Mortality Ratios (SMR)
Edlington & Warmsworth

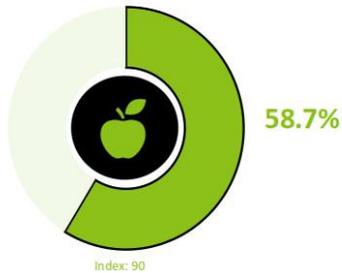

Source: Public Health England, produced from Office for National Statistics (ONS) data

Causes of death-all ages in Edlington, 2015-19

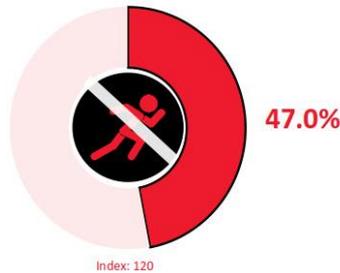

Circulatory conditions, including coronary heart disease, are the leading cause of premature death in Edlington. When looking at the risk factors associated with heart conditions, 25.9% of adults binge drink and there are significantly higher hospital admissions for alcohol-related harm. Further, 30.3% of adults are obese and only 16.7% engage in healthy eating. Edlington also has significantly high rates of cholesterol and high blood pressure.

BEHAVIOURS

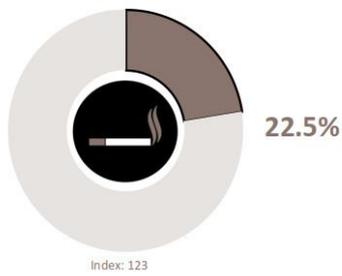

Eats Fruit >3 Days Per Week

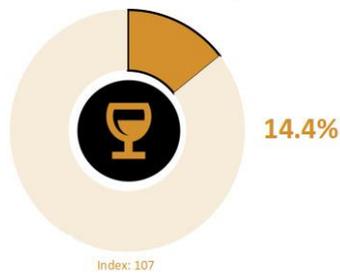

NEVER Does Moderate Intensity Sports

Current Cigarette Smoker

> 5 Alcoholic Drinks Per Day

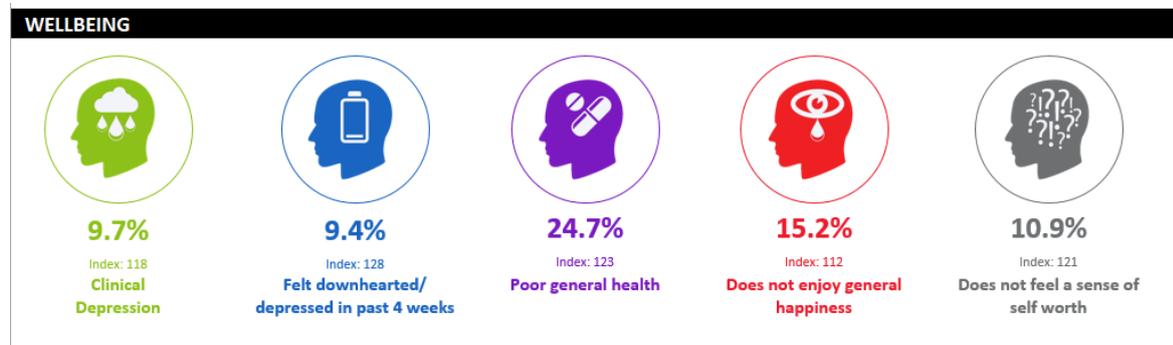

KEY INSIGHTS

- About 22% are likely to be current cigarette smokers. This is 23% above the base average.
- Circa 7% smoke 20+ cigarettes per day, which is 30% above the base.
- 10% are likely to say they never eat fruit and 47% never do moderate intensity sports, which are 26% above and 20% above the base average respectively.
- Full fat milk is likely to be drunk by approximately 19%, 25% above the base average, with white bread being eaten by about 38%, which is 20% above.

Old Edlington/Tait Avenue Behaviours (Source: ONS LSOA)

Loneliness and Isolation

21% of the population of Old Edlington/Tait Avenue are aged over 65 years old. The average age of the population in the households is older when compared to other areas. Out of the whole population, approximately one quarter consider themselves to have poor general health with 24.7%. This is 23% above the base.

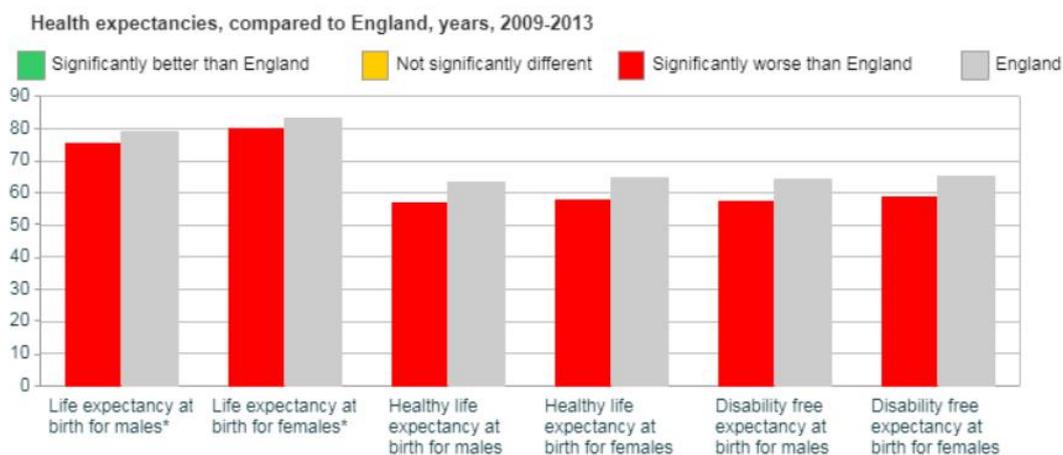

Old Edlington/Tait Avenue (Source: ONS LSOA)

9.4% report as feeling downhearted and depressed in the past 4 weeks. 15.2% does not enjoy general happiness. 10.9% does not feel a sense of self-worth and 9.7% has clinical depression. These figures could relate to an aging population, the number of residents living alone, or poor lifestyle choices.

Life Expectancy

People living in Edlington as a whole have a lower life expectancy and live more years in poor health in comparison to the averages of Doncaster and England. Life expectancy for men is significantly lower in Edlington (77.7yrs) then England (79.7yrs). Life expectancy for women in Edlington (81.9yrs) is in line with England (83.2yrs)

Men are likely to develop a health condition at aged 56 and women aged 57, therefore decreasing the opportunity of living in better health by 6.9 years and 7 years, respectively. The following chart shows the differences in life expectancy and health life expectancy (how long it is expected to live in good health).

Source: Public Health England, produced from ONS data Copyright © 2016

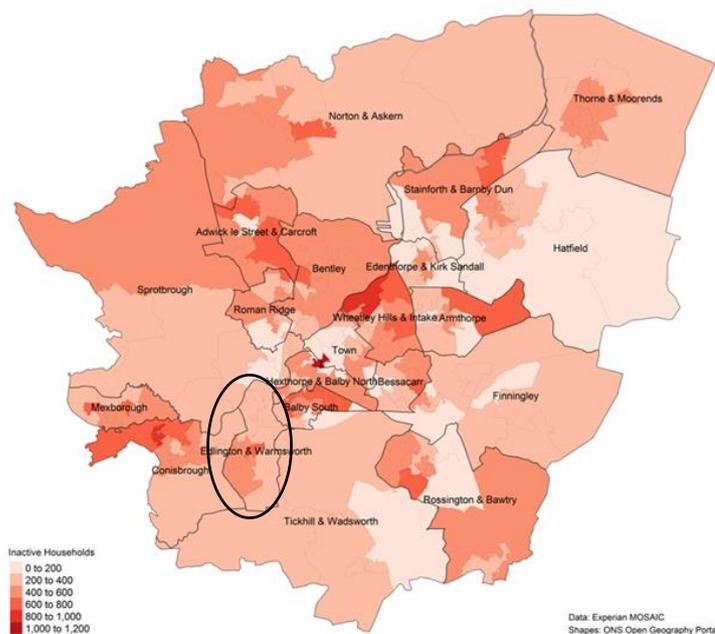

Life expectancy compared to England

Physical activity

Most of the information in this section is taken from Mosaic data and more information about Mosaic can be found in the [appendix](#).

Levels of physical activity in Edlington are low compared to the rest of the borough as seen in Figure 25 which identifies the areas with the highest number of inactive households:

Mosaic map of physical activity levels in Doncaster

Edlington has 667 households that are likely to have high levels of inactivity. This data has been matched with the number of children and young people and with deprived, inactive households. The former data positions Edlington as an area of focus and priority for the Get Doncaster Moving Strategy. The table below shows the number of households in the priority areas of inactive, low incomes and households with children and young people:

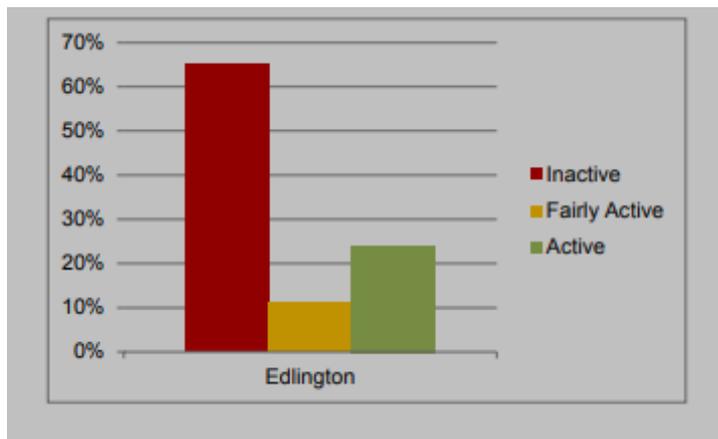

Name	Inactive	Low Incomes	C&YP	Total
Adwick le Street	883	877	920	2680
Denaby	951	913	514	2378
Wheatley Park & Wheatley Hills	802	885	667	2354
Bentley	883	692	773	2348
Edlington	667	858	726	2251
New Rossington	673	823	749	2245
Intake	651	781	668	2100
Skellow & Carcroft	594	892	563	2049
Stainforth	618	738	676	2032
Thorne	747	817	367	1931

Get Doncaster Moving table for inactive households include those on low income and children and young people.

Sheffield Hallam University, The University of Manchester and Get Doncaster Moving provided an analysis and evaluation of the current levels of physical activity in the community which were previously identified as low. A face-to-face household survey was completed in 2018 and collated in 2019 by 1,120 respondents across Doncaster using a questionnaire designed to (i) assess levels of physical activity in accordance with Sport England classifications and (ii) explore key issues around engagement in physical activity utilising the robust COM-B behavioural science approach (Michie et al., 2011).

Adults Physical Activity

In Edlington, 131 responses were collected from different households. The mean amount of time adults reported being active each week was 244 minutes which was the third highest level out of the eight communities. The physical activity classifications for Edlington are presented in Figure 23.

Percentage of adults in each physical activity classification in Edlington

Specifically in Old Edlington/Tait Avenue almost half of the population never does moderate intensity sport. The percentage is higher compared to other areas of Doncaster. This may be related to the relatively high incidence of poor health conditions and an ageing population, but it might also be partly the cause of some health issues known to be related to poor lifestyle choices.

NEVER Does Moderate Intensity Sports

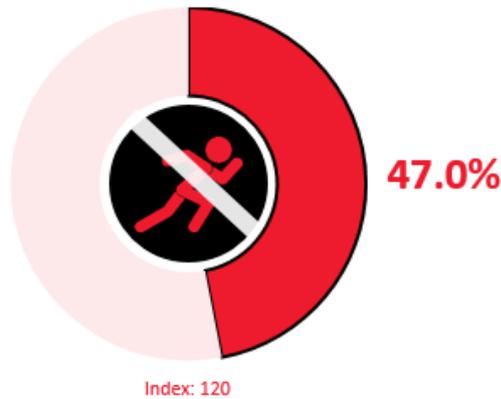

Figure 25 - Old Edlington/Tait Avenue (Source: ONSLSOA)

Sedentary Behaviour

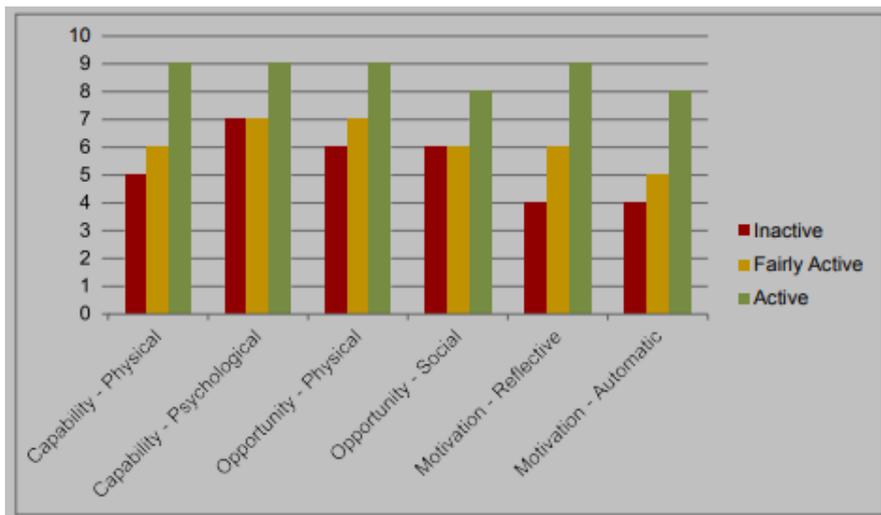

In the Edlington and Warmsworth Ward the mean reported sitting time for participants was 243 minutes on a working day. On a non-working day it was 364 minutes which was the 5th lowest level of sedentary behaviour out of the eight communities.

Active Travel

In the Edlington and Warmsworth Ward 41 participants reported being employed or in education, 14 of those participants reported active travelling to their place of work or study. The mean time spent active travelling each day was 19 minutes a day, which accounted for 85% of their commute.

Young People Physical Activity

In the Edlington and Warmsworth Ward 41 households reported having young people and the mean reported for physical activity time outside of school was 162 minutes a week. This was the 44th lowest amount of young people's activity over the eight communities analysed.

The COM scores for participants in each physical activity classification for the Edlington and Warmsworth Ward

COM-B Results presents the Capability, Opportunity, and Motivation scores for participants based on the physical activity classification they are in.

In Edlington as a whole, participants who were active rated their capability, opportunity and motivation as being higher than those who were fairly active and inactive. Participants who were inactive gave particularly low ratings to automatic motivation (indicating that they did not have habits or routines for physical activity), reflective motivation (indicating that they had lower intentions to be physical active), and physical capability (indicating that they perceived fewer skills and/or less stamina to be physically active). These might be particular areas to focus on in terms of future interventions.

Prevention and Control

Vaccination

Residents were able to get their vaccination at vaccination centres or at their GP. Below are the details of the vaccine uptake in the Edlington and Warmsworth Ward, which was lower than the rest of the borough.

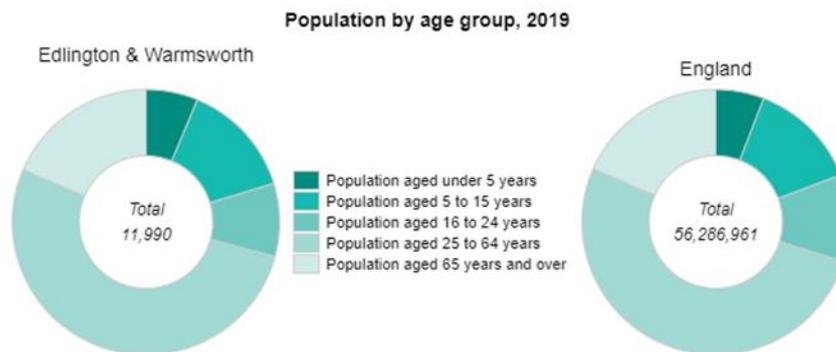

Recovery

The Coronavirus pandemic had a huge impact on the communities and work continues to focus on the recovery stage of the pandemic. As a part of the recovery approach, Well Doncaster have secured funding from the Ministry of Housing Communities and Local Government for Third Sector organisations across the borough to employ Community Connectors. Their role comprises understanding the barriers and work with residents to create solutions that increase vaccination uptake in disadvantaged groups. They also encourage and support those most affected by COVID-19 and engage them in community events and services. For the South of Doncaster, the Connector is continuing to engage with residents through face-to-face conversations.

Community Information

Population and Diversity

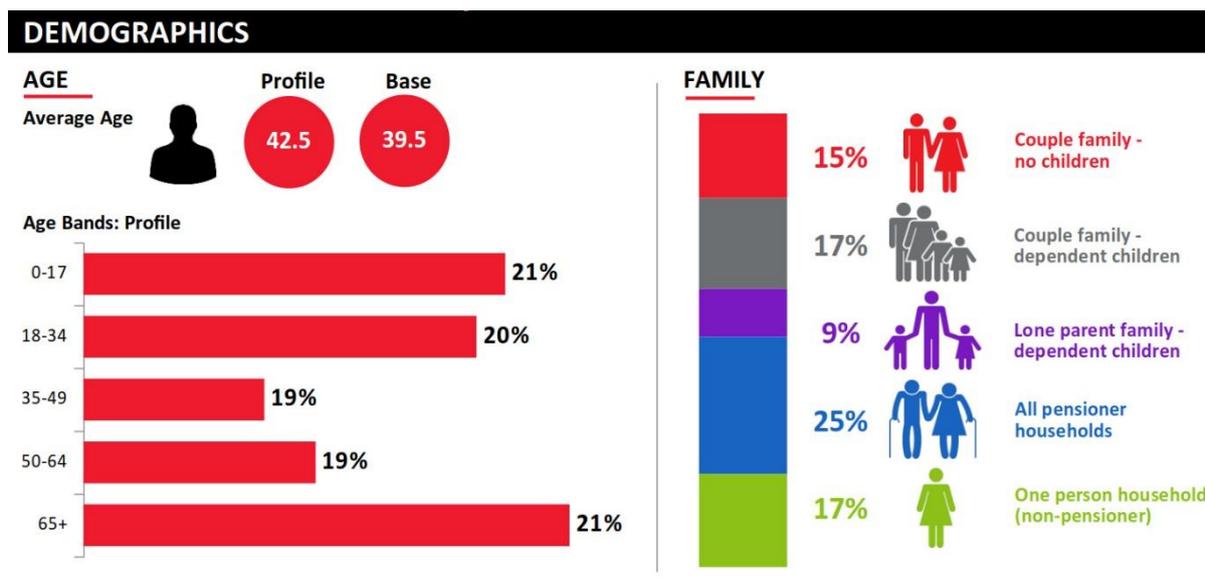

Old Edlington/Tait Avenue is located in the South of the borough and is in the same electoral ward as Warmsworth, 5325 of which are working-age (25–64 years old). The ward's overall age composition is in line with that of the English population. The community continues to be predominantly White British, with only 2.2% of the population from a Black, Asian & Minority Ethnic (BAME) group. This percentage is half the average of the borough.

Population of Edlington and Warmsworth Ward

Old Edlington/Tait Avenue

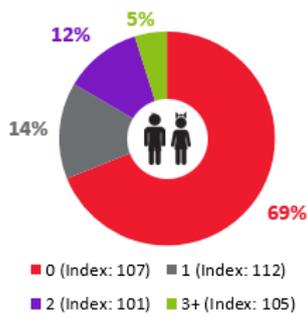

Old Edlington/Tait Avenue has 1,665 residents. 52.4% (872) are females, 47.6% (793) are males. 98.7% of the population are white and 97.8% are English Welsh/Scottish/Northern Irish/British. 77.5% of the residents identifies themselves English/British. 97.5% of the residents are born British. 68.8% of the population in Old Edlington/Tait Avenue has some religion with 67.8% of Christians.

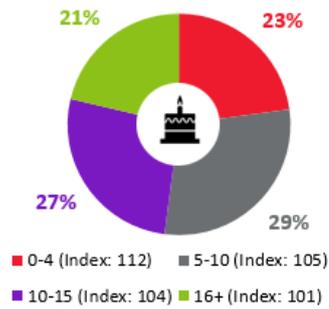

Old Edlington/Tait Avenue Demographics (Source: ONS LSOA)

Households containing lone parent families with dependent children occur more in Old Edlington/Tait Avenue than in other areas. 69% of the households are adults without dependent children. 14% households are with one child and 12% with two children. Almost half of the population is likely to be living in households with an income less than £20 000. This may relate to the demographics of higher age population.

Housing

Housing conditions and the surrounding environment can have profound impacts upon residents' health and exacerbate health inequalities. Housing data for the Lower Super Output Areas (LSOA) that make up Edlington is available. This data explores several variables to analyse the housing stock.

The majority of housing within the Edlington and Warmsworth Ward are social rented stock, with owned properties comprising only 27% of households. This tenure composition is significantly different to the Yorkshire and Humber benchmark. The housing stock type in Edlington is primarily terraced or semi-detached properties, the housing stock for Old Edlington/Tait Avenue is slightly different with the small Old Edlington village being primarily detached.

Old Edlington/Tait Avenue

The majority of housing in Old Edlington/Tait Avenue, 36% are social rented. 28% of property are owned outright and 25% owned with mortgages. 10% of housing are privately rented. 59% of houses are semi-detached and 17% terraced houses. 57% of the housing are 3-bedrooms. 36% of the residents are households of 2 people, but 9% of the households are 5+ people, which is higher than in comparable areas.

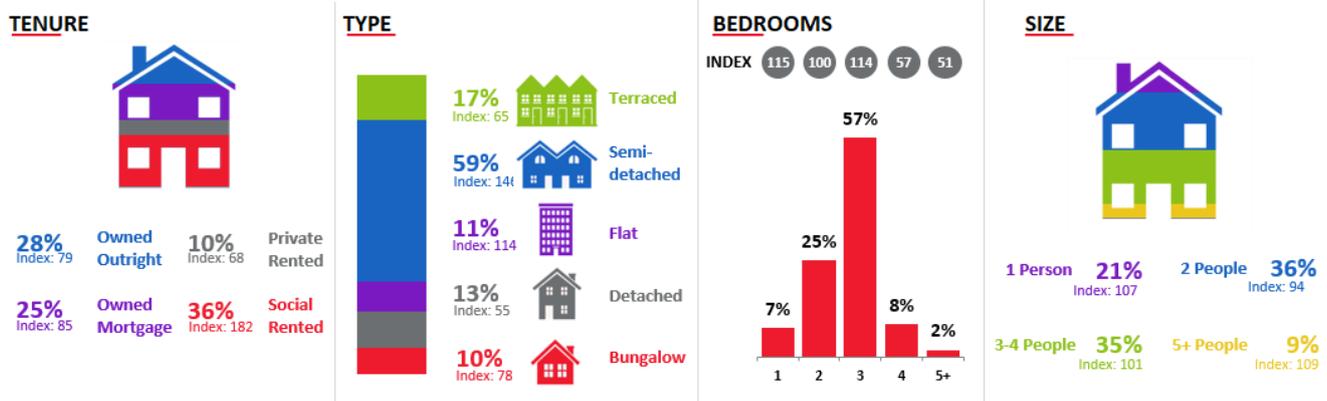

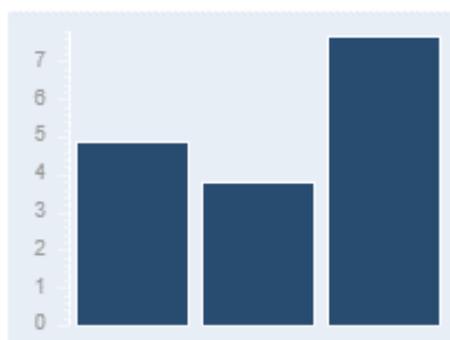

Figure 321 - Old Edlington/Tait Avenue (Source: LSOA)

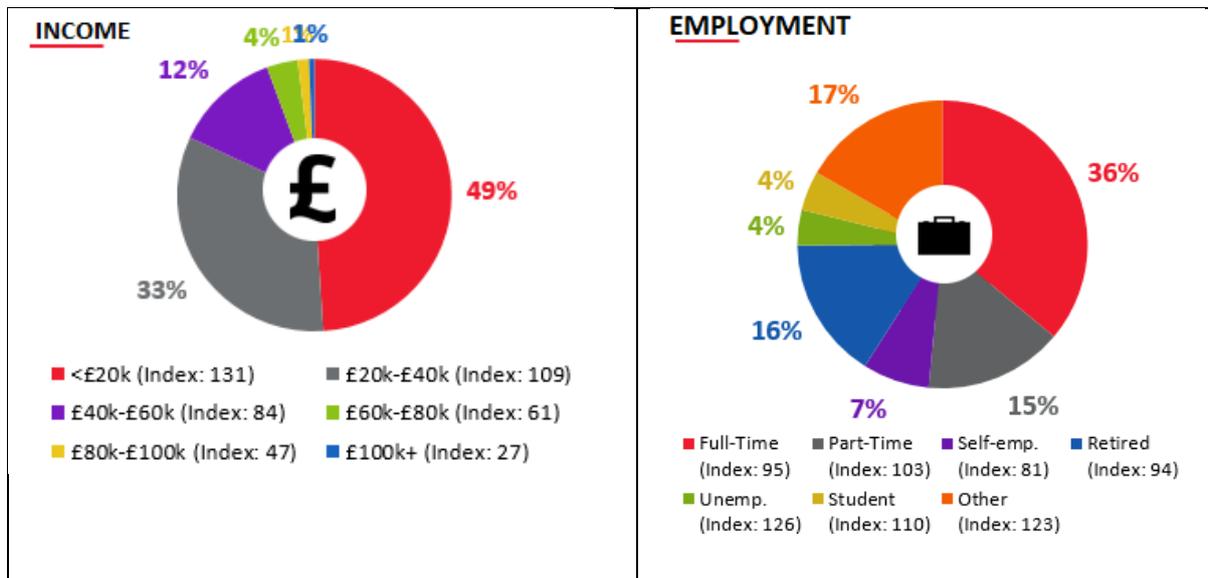

Employment

The Universal Credit claimant rate for the Edlington and Warmsworth Ward has changed over time and has increased as seen in the graph below. It is currently 7.7%. The number of claimants has fluctuated over the last three years but remains consistently high across the ward and at LSOA level. Individual LSOA data can be found in the [appendix](#).

Universal Credit Claimant rates in August 2015, 2019 & 2020

Old Edlington/Tait Avenue contains 10% households of lone parents, which occurs more than in other areas. There is 36% of the population working full time and 15% of the population working part time in Old Edlington. 47.4% of the population live in households with income less than £20K. The dominant social grade is C2 and the most over-represented is E. 9% of the households with more than 5 people, which is higher than in comparable areas.

Employment and income, Old Edlington/Tait Avenue Source – LSOA, 2021

With only 36% of residents in full time employment and a relatively high number of part-time, retired or lone parent households, the high percentage of low income households is perhaps understandable but still a cause for concern, and a contributing factor to deprivation.

Community Insight

Appreciative Inquiry

The Well Doncaster Team undertake Appreciative Inquiry (AI) within communities to gather insight to support code signing action plans with the community. Armstrong (2020) suggests in ‘A changing world, again. How Appreciative Inquiry can guide our growth’ that reframing the questions in light of a crisis like Covid-19 and drawing on strengths and assets from past positive experience will help participants as they restructure their community. The AI questions are structured to pull out the successes of the past and present, to seek new potentials and possibilities and build on those through the Dream and Design stages.

The Appreciative Inquiry will include the following steps:

1. **Discovery Phase** – This will involve engagement with the residents of Hyde Park to find out what is working well in the community. Responses will be themed to allow priorities of the community to be established.
2. **Dream** – Residents and key stakeholders will be invited to attend an initial workshop to discuss what ideas they have for their community and how these will meet the priorities highlighted in the discovery phase.

3. **Design** – All attendees are invited back for a second workshop to develop an action plan to direct work for the community.
4. **Destiny** – A collaborative way of working and investing resources to meet the actions from the previous phase.

Well Doncaster has been working in the Edlington and Warmsworth ward since 2019 via 6 Community Explorers and 24 interviews. The themes from the past Appreciative Inquiries are as follows:

- Access to facilities for physical activity
- Environment and cleanliness
- Safety
- Physical activity

In 2020, an online Appreciative Inquiry was undertaken, from this the following themes were identified:

- Environment
- Activities
- Community Spirit
- Economy
- Safety
- Green Space
- Youth Provision

Youth Provision was the top theme from the AI in 2020, however, a gap analysis from younger people was identified. To gather more insight from this group around their experience living in Edlington, an art competition ran in two primary schools across all year groups. The responses were themed as follows:

- Play/Greenspace
- Services
- Humanitarian
- Environment
- Safety
- Economy
- Events
- Infrastructure
- Health

Further investment in activities aimed at young people that could allow them to play safely in their community was an identified need.

Doncaster Talks

In 2019 Doncaster Talks undertook insight across the borough of Doncaster. Responses were separated into wards and thematically analysed. Across Edlington and Warmsworth ward, 188

responses were received (1.59% of the Ward) and the main themes on what people liked about the area, what could be improved, and what the borough should focus on are displayed in the table below.

EDLINGTON & WARMSWORTH

Like

- Community, friendly, neighbours
- Parks and greenspaces
- Quiet

Improve

- ASB including gangs and youth, bikes
- Police presence and response
- Litter and cleanliness

Focus

- Investment in local economy, jobs, town centre and business diversity
- Police on streets
- Crime and ASB
- Youth services and opportunity

More information about how Well Doncaster has been meeting outcomes and objectives can be found in past and present annual reports:

<https://welldoncaster.wordpress.com>

Mosaic Data

Mosaic Public Sector classifies the UK population into one of 66 types and 15 groups through a detailed and accurate understanding of each citizen's demographics, lifestyles, behaviours and location.

The Physically Inactive Population of Doncaster

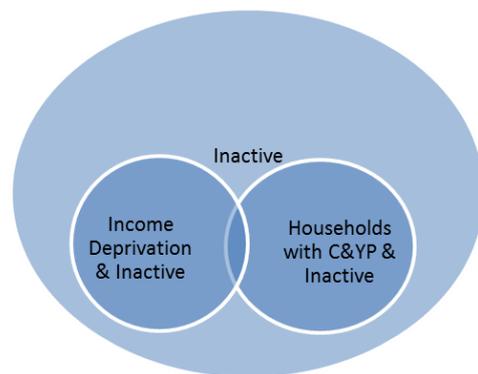

The MOSAIC types who "Do not exercise" and "Do not take part in Sport" were searched and three priority groups have been identified through work with strategic partners as part of the development of Doncaster's Physical Activity Strategy. The three priority groups are:

The Inactive

Families with children and young people

People living in income deprivation

These groups are cross-referenced against the inactivity list allowing for the identification of MOSAIC types which are both likely to be inactive and living in deprivation as well as inactive and from households with children and young people.

Acorn profiles

Wellbeing Acorn segments the population into 4 groups (Health Challenges; At Risk; Caution; Healthy) and 25 types describing the health and wellbeing attributes of each postcode across the country. By analysing significant social and health related behaviour, it provides precise information and an in depth understanding of upstream issues affected by current lifestyle traits.

INTERPRETING THE REPORT

The Wellbeing Acorn profile report helps you understand the underlying demographics, lifestyle and health attributes of your customers and service users by comparing their Wellbeing Acorn profile to a base (e.g. UK population, area or other customer groups).

INDEX

The Wellbeing Acorn Profile contains 12 variables that are indicators of Disability or Infirmary in the population and 9 variables related to unhealthy behaviours. The average score measured against the base profile of Yorkshire and the Humber is 100. A value above 100 indicates that the area population is over represented for this characteristic, below 100 the value is less than the average or under represented.

Public Health Data

Fingertips

This is a new fingertips profile that uses data from Local Health an existing PHE data tool. Local Health is a collection of quality assured health information presented for small geographical areas. By presenting data for small areas, Local Health provides evidence of inequalities within local areas. It supports targeted interventions to reduce such inequalities.

Local Health contains indicators related to:

- Population and demographic factors
- Wider determinants of health
- Health outcomes

It presents data for middle super output areas (MSOA), electoral wards, clinical commissioning groups (CCG), local authorities, and England as a whole.

Please note, as the Local Health tool was designed to allow users to map small area data, a mapping option has not been provided in this profile.
