

"One elderly lady who used the viewing area has since commented it was one of the best days of her life"
Royal British Legion (Thorne Branch)

"One client stated that she really enjoyed participating in a more structured group, learning new skills, making friends and becoming part of a wider community supporting events and activities that she wouldn't have taken part in before. She stated that her mental health is improving as she feels part of something bigger."

1. Introduction

1.1 Background

The UCI Microgrant Scheme was introduced off the back of the successful Tour De Yorkshire 2019 Microgrant Scheme.

In 2018, Doncaster Council (Leisure Services) commissioned a social impact assessment for their section of the Tour de Yorkshire 2018 route through their status as a Sport England Local Delivery Pilot. Leeds Beckett University was chosen to carry out this research / assessment.

The overall aim was to use an evidence-led approach to develop insight around understanding the social impacts of sports events on local communities and their levels of physical activity and use TDY as an opportunity to pilot a new and innovative practical approach to assessing and monitoring the social outcomes of future major sporting events in Doncaster.

Findings were then used to make practical recommendations on interventions that could be made for using future TDY events to maximise local benefits and act as a catalyst/'sparkler' to

encourage people to live a more active lifestyle. The final report from this research can be found at: <https://getdoncastermoving.org/uploads/social-impact-of-events-and-decay-curve-research-tdy-2018.pdf>

One of the recommendations identified was to implement a Micro Grant Scheme, which gives Communities the opportunity to apply for a small pot of money, which they can utilise to deliver their events / activities and promote the event within their community. It was believed this approach would contribute to communities' senses of pride and ownership, engaging a wider audience in the event, further boosting social impact.

The Scheme would also fit into the **Get Doncaster Moving project**, which aims to get more people active in Doncaster. The Get Doncaster Cycling part of the Scheme is a programme of activities aimed at promoting cycling as a recreation, sport and a mode of transport to Doncaster residents.

As a result, Doncaster Council (Leisure Services) put aside **£3000** to allow applicants to apply to the fund for a maximum of **£200**.

In order to ensure the scheme was set up effectively, the team approached Doncaster Councils Communities Team to receive advice and guidance on how they delivered their effective **SEEDS** Fund within Communities. This fund enables local people/informal groups to come together to look at whether they would like to develop and expand their activities and how they would like to do this by utilising a small fund.

A number of their recommendations were taken into consideration when setting up the Micro Grant Scheme, including allowing informal networks / groups to apply even if they

were not a constituted group. This was important to the Micro Grant as it was identified that a number of groups actually only came together as a result of TDY coming to their communities and therefore were not at the stage of becoming constituted.

Another recommendation was for the items / services applied for would be purchased by Doncaster Council (Leisure Services). This ensured that applicants did not require a bank account to transfer funds and also meant they were not required to keep receipts and provide proof of purchases.

The final recommendation was to ensure that the application process including the application form was as simple and straightforward as possible to ensure applicants would not be put off applying by being required to complete numerous types of paperwork.

The idea was to make the Scheme as easy as possible for applicants. All they had to do was fill in a short application form, which identified the following: -

- What Items / Services they would like
- Where they could be purchased from (Including costs)
- How the items / services would be utilised
- Who would benefit from the items / services within their community

Doncaster Council (Leisure Services) were keen on receiving applications from those who would be able to assist in achieving a number of the other recommendations identified via the Leeds Beckett Research. Therefore, applicants were advised that the team were “particularly interested” in (although not exclusively) applications that: -

- Would engage communities along the route
- Demonstrate an ability to sustain engagement following the initial support provided for the event; this may relate to physical activity/sport and/or volunteering
- Applications that targeted, although not exclusively:
 - BAME populations
 - 16-25 year olds
 - 60+ year olds
- Applications that could evidence “match funding.”

As part of the Scheme, applicants were advised they would be required to complete a small Monitoring form after the event and also allow their details to be shared with Leeds Beckett University to assist them in carrying out further research on the effectiveness of the Scheme.

The scheme went live on **18th January 2019** and applicants were asked to ensure their applications were submitted by **8th March 2019**. This timeframe ensured the team had plenty of time to process applications, purchase items, have them delivered and ensure they were handed over to the applicants to utilise in the run up to the event.

The Scheme received **21** Applications to the Microgrant Fund, of which **18** were successful.

The TDY 2019 Microgrant Scheme was deemed to be a huge success by Leisure Services and the applicants. A monitoring report for the scheme was produced which can be found at:- [https://getdoncastermoving.org/uploads/final-tdy-19-microgrant-monitoring-report-\(002\).pdf](https://getdoncastermoving.org/uploads/final-tdy-19-microgrant-monitoring-report-(002).pdf)

1.2 Lessons Learned

During the process of delivering the TDY 19 Microgrant scheme, Leisure Services were already planning their section of the next international cycling event – The UCI Road World Championships 2019.

The intention during the planning and delivery process of the TDY 19 Microgrant was to use it as a pilot scheme in order to determine how Communities responded to it. The team were keen on carrying out monitoring of the scheme to ensure that any lessons learnt were incorporated into the UCI Road World Championship Microgrant Scheme.

A full list of Lessons learnt / Recommendation's from the TDY 19 Microgrant and how the Team incorporated them into the UCI 19 Scheme can be seen below:-

Lessons learnt / Recommendation's	How incorporated into the UCI 19 Micro Grant Scheme
Application forms and promotions will specify further in detail and prominence that the fund is not open to Businesses.	<ul style="list-style-type: none"> • Specific wording within the application form advising Businesses could not apply. • Specific emphasis placed on eligibility in community meetings and email communications promoting the scheme
Discuss the possibility of opening up the Scheme for schools to apply.	<ul style="list-style-type: none"> • The team discussed the possibility but decided that due to the large number of schools eligible, the potential for having too many bids to support would be difficult to manage. • Schools would be supported in other methods not available to the community in order to deliver events / activities and take part in the event.
Ensure hard copies of the Application form are available at roadshows, meetings and key locations within the Community.	<ul style="list-style-type: none"> • Hard Copies were made available at all Community meetings and roadshows. • Hard Copies were made available at a number of businesses and local libraries. • Hard Copies given to DMBC Stronger Communities Team Officers to take with them on community meetings and site visits.
More emphasis on breakdown of costs being accurate and complete.	<ul style="list-style-type: none"> • Wording added in red and bold to the cost breakdowns section – “Please ensure the prices include postage and packaging” • Specific emphasis placed on ensuring costs correct in community meetings and email communications promoting the scheme
Replacement items double-checked with applicant before purchasing.	<ul style="list-style-type: none"> • All replacement items discussed with applicant with agreements made before going ahead with purchases.
Emphasise to applicant on timescales of purchases and check this will not affect the delivery of their event.	<ul style="list-style-type: none"> • Specific emphasis placed on ensuring applicants were aware of timescales relating to their items being received. • Leisure Services went through applications as they came in and many applicants who matched the criteria were authorised as being successful prior to the deadline date,

	allowing purchases of items / services being made even earlier.
Provide Applicants with a copy of the Micro Grant Monitoring form prior to the event.	<ul style="list-style-type: none"> • Specific emphasis placed on communications with potential applicants regarding what detail the monitoring process would consist of. • Monitoring forms submitted to applicants on confirmation of their applications success.
Include section for applicant to add numbers at side of each demographic.	<ul style="list-style-type: none"> • Added in section of monitoring form where applicants could breakdown their total numbers of people who may have benefited from their event / activity into specific demographic categories.
Emphasise monitoring content to be as detailed as possible.	<ul style="list-style-type: none"> • Specific emphasis of detail required added to email and phone correspondence regarding monitoring.
Consider using Leeds Beckett Research additional questions in monitoring form.	<ul style="list-style-type: none"> • All three of the additional questions added to the monitoring form.

1.4 Criteria

As can be seen in the lessons learned section, the team placed more emphasis on Businesses not being eligible for the Microgrant. They also discussed, but did not add schools to the list of those eligible to apply. Other criteria for potential applicants remained unchanged.

Therefore, the criteria for this scheme identified that the team were **particularly** interested in (although not exclusively) applications that: -

- **Will engage Communities along the route: -**
 - > Bessacarr
 - > Intake
 - > Wheatley Hills
 - > Edenthorpe
 - > Dunsville
 - > Hatfield
 - > Thorne + Moorends
- **Demonstrate an ability to sustain engagement following the initial support provided for the event; this may relate to physical activity/sport and/or volunteering**
- **Applications that target, although not exclusively:**
 - > BAME populations
 - > 16-25 year olds
 - > 60+ year olds
- **Applications which can evidence “match funding”, where the applicant will match funds requested to purchase similar or different items for their event / activity.**

A copy of the application form can be found in **Appendix 12.1**.

1.5 Scheme Launch

The scheme went live on **5th June 2019** and the deadline for applications was set for **9th August 2019**. This timeframe was similar to the one used for the TDY 19 Scheme and ensured the team had plenty of time to process applications, purchase items, receive them and ensure they were handed over to the applicants to utilise in the run up to the event date.

The Scheme was once again promoted through the Community engagement process delivered by Leisure Services Contract and Event Officer Darren Simpson. It was also heavily promoted via TDY Community roadshows.

In addition to this, Doncaster Council Communications Team ensured the scheme was promoted on Doncaster Councils website and Social Media Accounts. Social Media promotion also included paid targeted ads on Twitter and Facebook to ensure the audience reached was relevant to the types of applicants that were being sought.

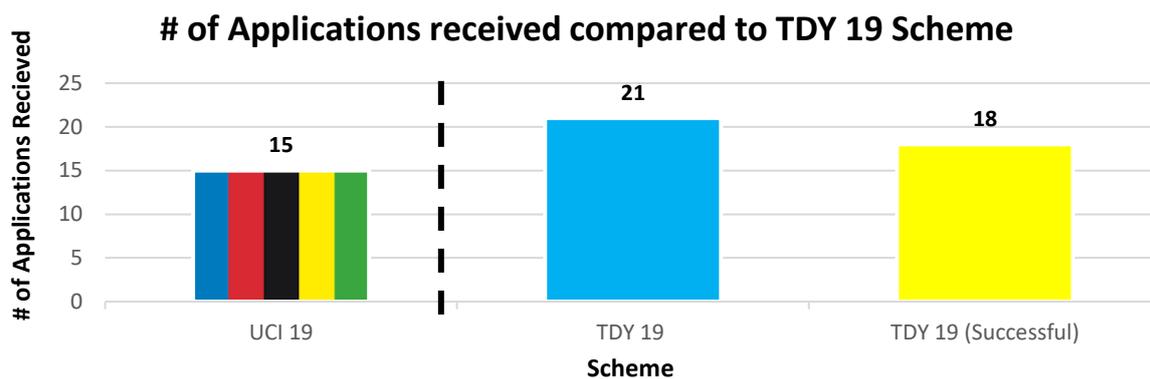

The below table shows the reach that the Social Media Ads had within the Community during the period they were live:-

ADVERT	STARTED	FINISHED	TOTAL REACH
UCI Micro Grant (#1)	02/07/2019	09/07/2019	18,852
UCI Micro Grant (#2)	15/07/2019	22/07/2019	12,519
UCI Micro Grant (#3)	02/08/2019	09/08/2019	11,607

2. Applicants

In total, there was **15** Applications received for the UCI 19 Micro-Grant Scheme. All of the applications that were submitted, were successful and granted.

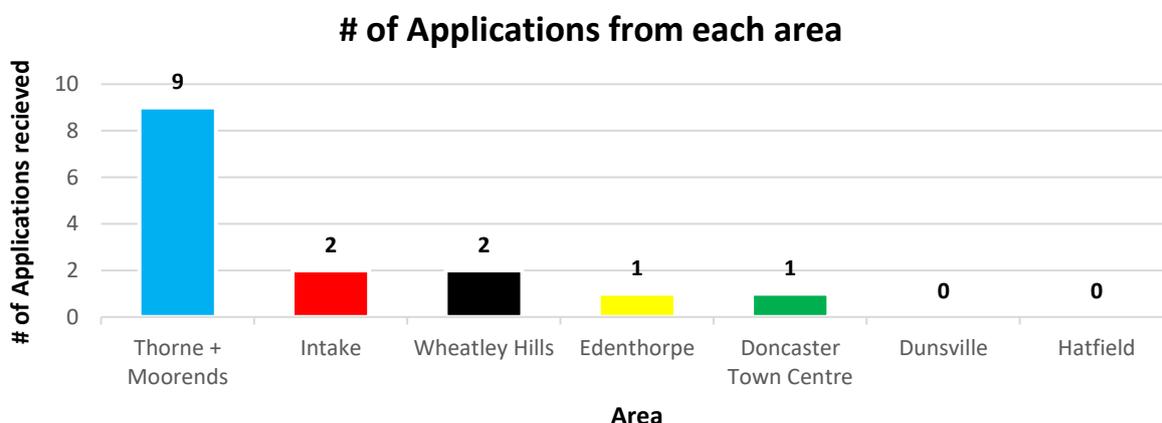

In comparison, the TDY Scheme received **21** Applications, however only **18** were successful due to a number of reasons. The reasons why these applications were unsuccessful were emphasised more prominently to potential applicants in this scheme. This may have had an impact on the types of applications being received and the lack of those which would have been unsuitable and declined as a result.

The team were happy with the number of applications, especially due to the fact that the actual route of the race only went through a small section of the Borough.

In terms of Applications received from each area, the highest number by some margin were received from **Thorne + Moorends (9)**.

Intake and **Wheatley Hills** submitted **2** Applications each. **Edenthorpe** and **Doncaster Town Centre** areas each submitted **1** Application each. No applications were received from **Dunsville** and **Hatfield**.

Similar to the expectations from the TDY Scheme, applications from the **Doncaster Town Centre** were not expected to be in high numbers due to the limited footprints available in the area to put on activities and events. Though the route of the race did not go through

Doncaster Town Centre on this occasion, the scheme promoted applications from areas other than those covered by the route and therefore were pleased to receive an application from this area.

Applications from **Hatfield** were expected to be in low numbers due to the potential numbers of groups who could utilise the fund in that area.

The team were always under the impression that **Thorne + Moorends** would be the area that submitted the most applications due to the large size of the community and number of potential groups located in that area. It is also worth noting that a number of the bids received from Thorne, also included groups who work in the Moorends Community and therefore further increasing the potential for activities and people being involved.

2.1 Successful with small amendments

Of the **15** Successful applications, **5** required some small amendments made to their initial application.

These applicants and items amended are as follows: -

Group	Item(s) requested	Reason(s) for amendment	Compromise
St Paul's Community Church	<ul style="list-style-type: none"> Refreshments including Milk (for Tea and Coffee) and Juice Healthy Eating items such as Fruit / vegetables for Taster Sessions 	<ul style="list-style-type: none"> Such items would need to be purchased the week of the event to ensure they were fresh when used. Officer's availability during the close proximity to event day would be limited. 	Agreed to purchase Supermarket Gift Card to allow group to purchase items themselves and provide proof of purchase after the event.
Wheatley Hills Tennis Club	<ul style="list-style-type: none"> Banner 	<ul style="list-style-type: none"> The cost of the banner being expensive The value for money the banner would provide 	Agreed to remove from bid
	<ul style="list-style-type: none"> Qualified Mini Tennis Coaches 	<ul style="list-style-type: none"> The original bid was for coaches to deliver activities at one location. Shortly after applying, they had become aware of 2x events in their local area and agreed to deliver an additional activity in another location 	Agreed to pay for additional coaches to deliver an additional activity
Edenthorpe Parish Council	<ul style="list-style-type: none"> Banner 	<ul style="list-style-type: none"> The cost of the banner being expensive The value for money the banner would provide 	Agreed to remove from bid

Friends of Sandall Park	<ul style="list-style-type: none"> • Bottles of Water 	<ul style="list-style-type: none"> • As identified by the applicant shortly after submitting their bid, they could utilise re-usable sports water bottles for the same purpose. 	Agreed to replace bottles of water with re-usable sports bottles.
Thorne & Moorends Youth Group	<ul style="list-style-type: none"> • Shopping Vouchers for Competition Winners 	<ul style="list-style-type: none"> • These were not part of the original bid, however using different suppliers for the other items requested meant reductions in costs 	Agreed to purchase vouchers to be used for competition winners

2.2 Other amendments

There were also amendments made to the items applied for by the following three applicants:-

- **Thorne Branch – Royal British Legion**
- **Bridging Generations**
- **Thorne & Moorends Healthy Living Group**

These applicants had all come together to propose an Elderly viewing area on the route, outside Thorne Times on King Street, **Thorne**. The Team were very pleased that these groups were proposing such an activity as they had emphasised they were very keen on these types of applications in the schemes promotion process.

Providing a viewing area for the elderly was a recommendation from the previous Leeds Beckett University research. Similar applications were made for the TDY scheme and stood out to be very successful in giving the opportunity for the elderly community to take part in the event, when they may have not been able to otherwise.

The applicants made it clear in their applications that though they were working together to achieve the same goal, they were applying separately to accommodate the amount of items required to provide enough seating for their own individual client numbers.

The Team were happy with this proposal, however had some concerns in relation to the proposed location of the designated area. The limited footprint of this location meant that to manage it safely would require further consideration for the numbers of patio sets being proposed could fit in the area. The location was also in close proximity to a proposed fan zone around the corner, which was expecting large numbers of attendees. This meant there was potential for a crowd surge to occur in this area once the race was arriving.

Therefore, the team liaised closely with the three groups and **Thorne Town Council** to achieve the following resolutions:-

- **Creation of an additional smaller viewing hub area further down the road outside Thorne Funeral care to reduce numbers in the original location.**

- Agreement that instead of patio sets with tables being used (reducing the potential footprint allowed just for seating), only chairs would be purchased. This also allowed more seating to be purchased from the allocated funding.
- Agreement that due to no patios with umbrellas being purchased, a separate marquee be provided in the car park area to the side of the viewing area to allow shelter from the weather if required.
- Agreement that the sides of the viewing area would be cordoned off by pedestrian barriers preventing potential crowd surges flowing into the viewing area.

On a number of occasions, the items listed in some of the Applicants bids had become unavailable from the supplier they had specified or had increased in price since their application was submitted. On these occasions, contact was made with the applicant to advise them that the same item(s) could be purchased from other suppliers for a similar or cheaper price than what they had originally expected.

In addition to the above amendments made to a number of bids, there was discussions made with **Edenthorpe Parish Council** regarding the purchase of Bunting.

Doncaster Council had purchased bunting for previous Tour De Yorkshire Events and therefore had sourced a reliable and respectably priced company from which to purchase bunting. Therefore, it was agreed that the team would purchase their requested length of bunting from that supplier, as it would be significantly cheaper than from the ones they had identified.

It was also agreed that the Bunting would be returned to Doncaster Council to utilise in other Communities for future Tour De Yorkshire Events. This ensured the value for money was being maximised for this item.

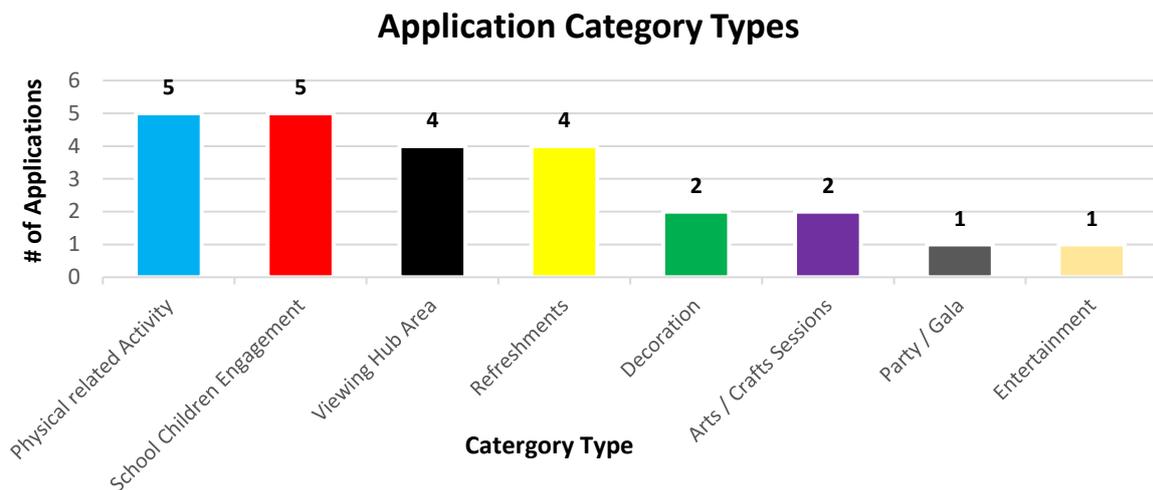

On all these occasions, the applicants were more than happy with the proposals and agreed to them.

3. Application Category Types

The events and activities delivered by successful applicants utilising the UCI 19 Micro Grant covered a wide variety of types and themes. A number of them were exactly what the team were hoping would be delivered as a part of meeting the recommendations set out by the Leeds Beckett Research.

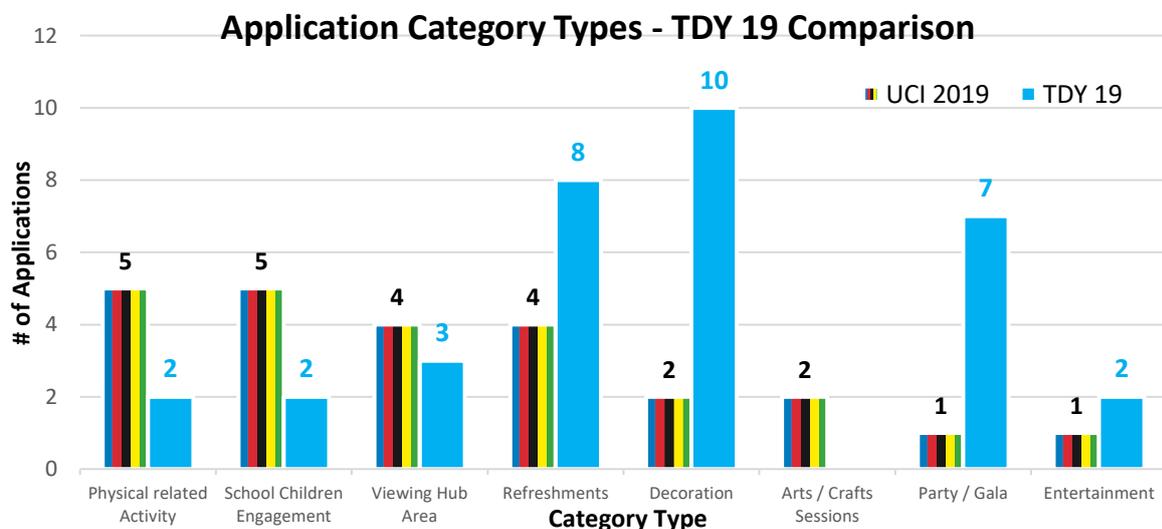

These can be broken down into the following categories: -

Many of the applicants included items in their applications, which met two or more of the above categories.

The most popular categories of applications were:- **Physical Related Activity**, **School Children Engagement**, **Viewing Hub Areas** and **Refreshments**

Some of these numbers are significantly different to the ones identified by the TDY 19 Microgrant Scheme.

There has been a significant increase in numbers of applications that cover **Physical related Activity** and **School Children Engagement**.

The number of applications for **Physical Related Activity** for the TDY 19 Scheme was disappointingly low. As mentioned in the background section, the Scheme fits into the Get Doncaster Moving project, which aims to get more people active in Doncaster. Therefore, the Team had emphasised to potential applicants that they were particularly keen on receiving applications in this category.

The increase in applications that covered School Children Engagement correlates to the areas where most of these applications came from. Many Schools in **Thorne** had chosen to have a teacher training day on the date of the event, which meant many applicants designed their events and activities to ensure they attracted school children who were not going to be in school to take part throughout the day.

There has been a significant reduction in the numbers of applications that cover **Refreshments, Decorations** and **Parties / Galas**.

The reduction in **Refreshment** requests may be as a result of a number of applicant's ability to obtain refreshments from other sources such as local businesses or other community partners.

The reduction in **Decorative Items** being applied for could be seen as a result of the team emphasising and ensuring applicants were aware that as part of previous TDY events, they have an inventory of items that they could access.

The reduction in numbers of applicants applying for **Party / Gala** type items has been identified by discussions with applicants. Many advised they were aware of large-scale events in their community and did not want to compete with them by delivering alternative events, they would rather have utilised the fund for other purposes including activities that could be added on to the bigger events by working closely with the organisers. This was particularly the case in **Intake** with the People Focused Groups (PFG) event, **Wheatley Hills** with the Friends of Sandal Park event and **Thorne + Moorends** with the Fan Zone organised by numerous groups alongside Thorne Town Council.

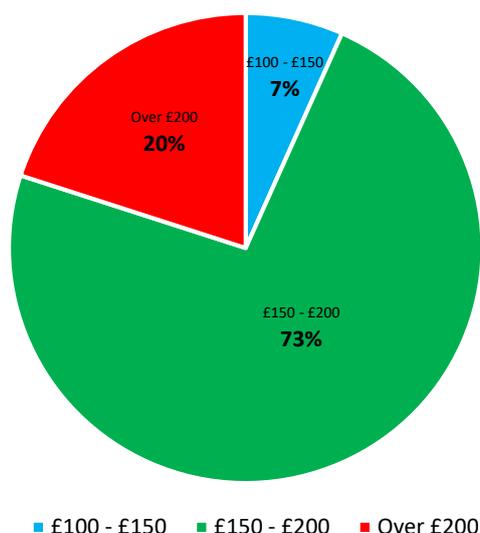

4. Expenditure

4.1 Individual Application Expenditure

The maximum amount for applications was **£200**, there was some expectation that most would try to maximise their applications to get as close to this figure as possible.

This was the case with most applications for this scheme with **73%** of applicants applying within the **£150 - £200** range.

Breakdown of Application amounts

There were also a number of occasions where an applicant had bid for over the **£200** limit.

Bridging Generations and **Thorne & Moorends Healthy Living Group** had both applied for **£203.95** for their proposed Patio Sets and Patio chairs. They both advised they would cover the additional **£3.95**. Due to the previously mentioned amendments to their items, this was not required.

Wheatley Hills Tennis Club had applied for items that amounted for **£220** but only applied for **£200**. Due to the previously mentioned amendments to their items, this overspend was not required and they received **£199.99** in Funds.

Thorne & Moorends Youth Group had originally applied for items, which came in at **£194.54**. However, due to other suppliers being used to source the items and therefore reducing costs, the applicant requested extra funds to purchase prizes for a schoolchildren competition they were running. This was authorised and their total application came in at **£223.50**.

4.2 Application Expenditure Totals

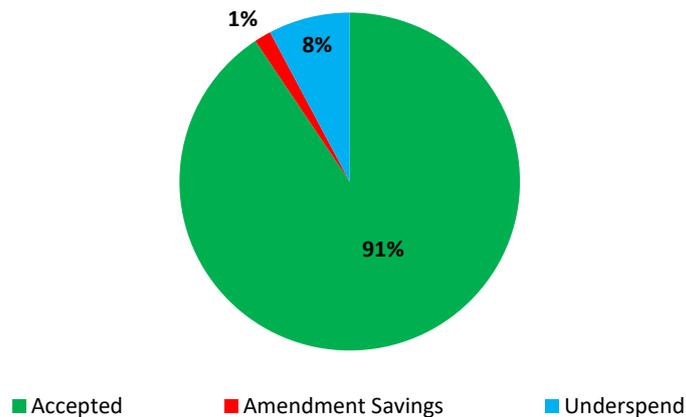

The original budget for the UCI 19 Micro Grant Scheme was set at **£3000**, which would cover a minimum of 15 bids at the **£200** limit.

The actual final amount applied for from all 15 bids received was **£2812.81**.

Small amendments made to a number of applications resulted in the final amount being authorised being **£2763.79**.

Therefore, the total underspend of this scheme comes in at **£236.21**.

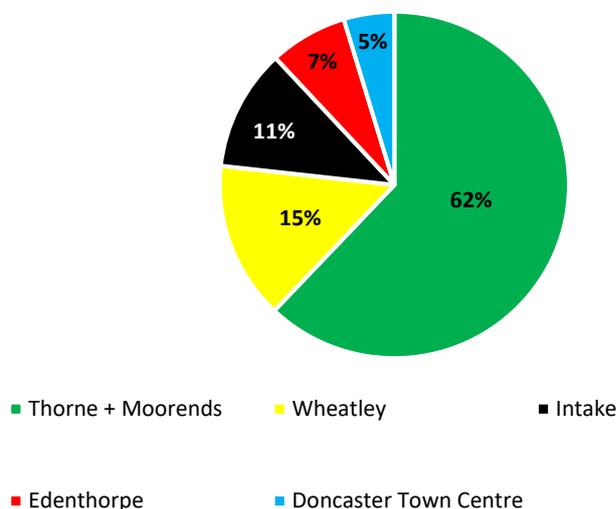

Breakdown Of Application Total + Spend

In terms of spend in each area, the order of which received the most / least closely follow the number of applications received from those areas and is to be expected.

It is worth noting that at no point did the team consider the locality of the application but only how the application met the criteria.

Breakdown Of Spend In Each Area

5. Monitoring / Feedback

All applicants agreed to take part in monitoring and research of the Scheme. The first stage of this was completing a small monitoring form, which would capture a number of different statistics and provide feedback opportunities.

A copy of the monitoring form can be found in **Appendix 12.2**.

This form was sent to all successful applicants shortly after the Event. Overall, the results were extremely positive and can be found in detail via **Appendix 12.4 + 12.5**.

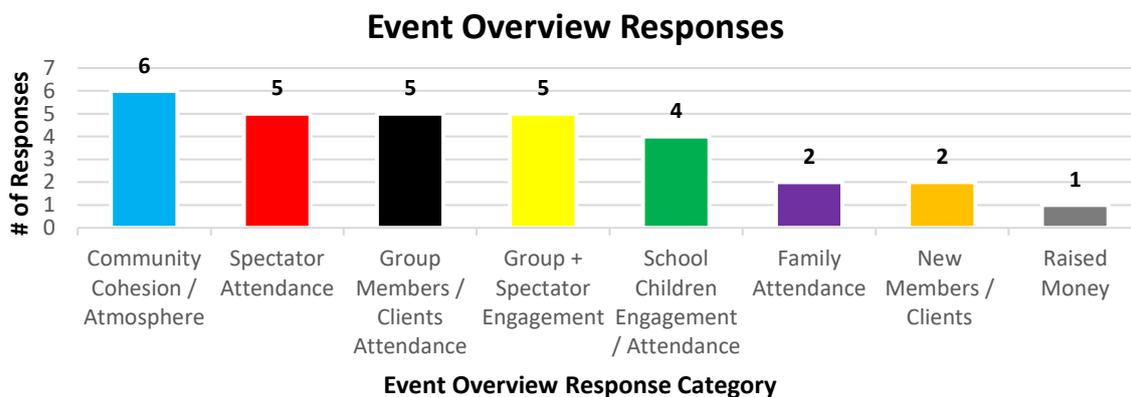

This section will go through the results from each question on the completed monitoring forms.

5.1 Success of Events / Activities

Question 1:- *“Please provide an overview of how your project / event went”*

All of the responses received were extremely positive and everyone agreed that they had a successful event overall.

The content of the responses can be broken down into a number of categories as follows: -

The most popular comment was in relation to the **Community Cohesion** experienced by the applicants and therefore the resulting atmosphere in their areas. A number of Applicants identified that they were proud of how their community had come together to celebrate the event. This was also a common response in relation to the TDY Microgrant Scheme.

One of the other most popular responses can also be identified as having a longer lasting benefit to the applicant and that is in relation to their **Group Engaging with Spectators** and **School Children**. This meant many were able to promote themselves and services they provide to a wider audience than they normally would through other promotional channels.

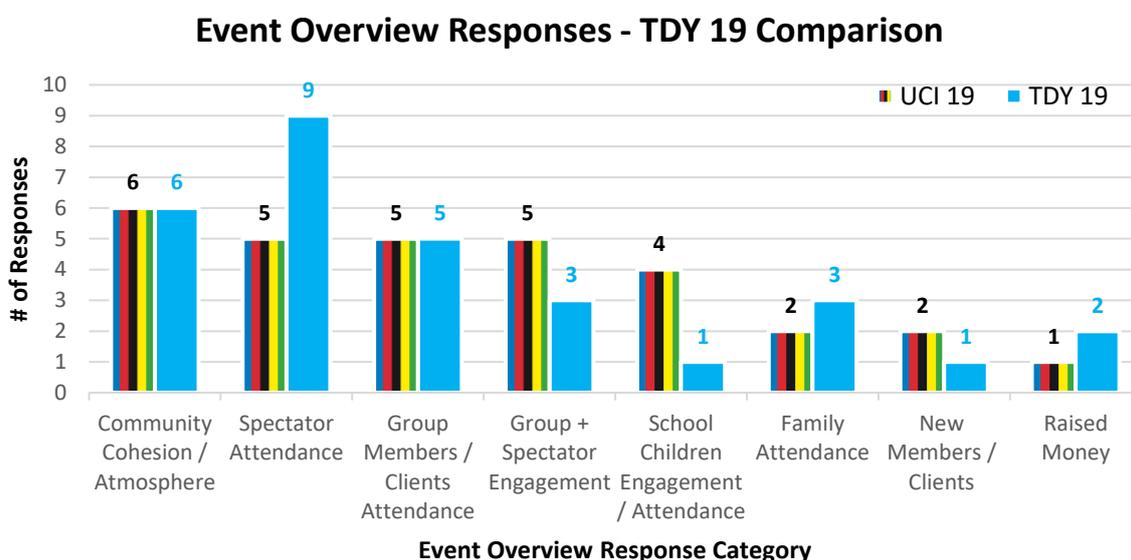

This also meant a small number of applicants advising they had recruited new members / clients as a direct result of their activity / event on the day.

A common theme amongst many of the responses was in relation to the **Weather**, which saw a number of rain showers throughout the day and during the event.

People Focused Group advised that they had to change their event plans slightly by bringing a number of their planned outdoor activities inside their venue. A further five groups advised the weather potentially affected the spectator numbers on the day. All applicants who mentioned this advised that their events still went ahead and were still successful regardless.

It is worth mentioning that other than the weather, there were no negative responses and though it is possible that the applicants will have experienced small issues on the day, they have not deemed them worthy of bringing up in their feedback.

In comparison to the TDY Microgrant Scheme responses, the numbers in each category are very similar with the only significant differences in numbers applying to 2 categories. **Spectator Attendance** was mentioned less, which could be as a result of the weather affecting attendance. **School Children Engagement / Attendance** was mentioned significantly more, which could be as a result of the previously mentioned number of applications targeting this demographic being higher due to school closures along the route.

A small selection of the comments from each applicant can be seen below: -

“It was a great community atmosphere throughout the day and everyone seemed to have a great time.”
Friends of Sandall Park

“The event was a successful day, enabling us to increase awareness of our club and access to netball within the local area.” **Thorne Netball Club**

“Group members which are the older more vulnerable members of our community were able to enjoy the event in a safe, warm environment.” **Bridging Generations**

“The older vulnerable members that attended said that they felt spoilt, an opportunity of a life time that they really enjoyed.” “A reason to come out of the house, talk to people and see such an amazing event whilst provided with hot drinks and cupcakes – simply amazing” **Thorne & Moorends Youth Group**

“Some of the clients who attended had not ridden a bike for a long time and being in a secure and supportive environment gave them the opportunity to try and explore something which they had considered not to be an option for them.” **Doncaster MIND**

5.2 Numbers

Question 2:- *“Please estimate how many people have benefited from your project / event?”*

It is worth noting that this is difficult for many organisers to determine. Their interpretation of how many people benefitted from their project / event can differ depending on a number of factors.

It also differs significantly depending on the type of project / event. It is much easier for an applicant to count attendees to a small event within a confined area than it is for an applicant to determine numbers benefitted from decorating a community.

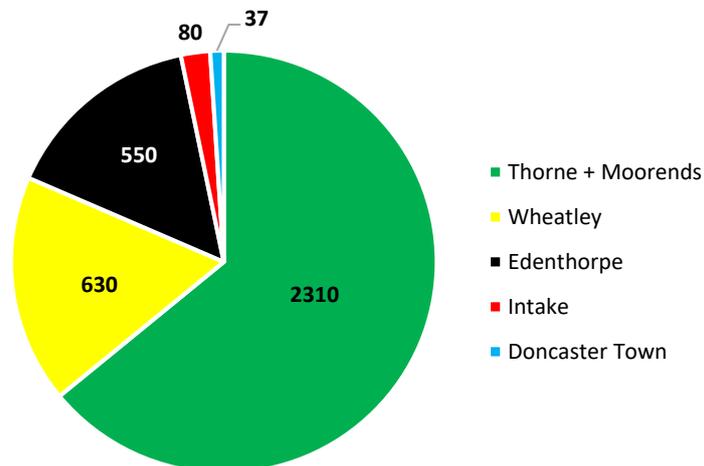

Therefore, though the numbers collated is not an exact science, it can be a good indication of how many people within a community potentially benefitted in the long run.

The total figure was determined to be **3607** people. This Statistic can be used to work out how much per head the funding cost to benefit members of the public who took part in the festivities:-

$$\text{£}2763.79 / 3607 = 77\text{p per head}$$

The statistic of those who potentially benefitted can also be broken down into each area. The highest number was from **Thorne + Moorends**, which was to be expected due to the numbers of bids submitted and supported in those areas.

Numbers benefiting from each area

The numbers identified as having benefited from this scheme is significantly lower to the TDY scheme (**7459**). However, it is worth noting that as identified in Section 3, there has been more applications received which were relating to targeted activities rather than decorative items in this scheme. It was identified that a large percentage of the numbers given for the TDY scheme were as a result of Bunting and other decorative items potentially benefiting a whole community, including people that were not specifically engaged with the event on the day.

5.3 Demographics

Question 3:- *Please estimate and breakdown the number above into the following demographics which you believe benefited from your project / event:-*

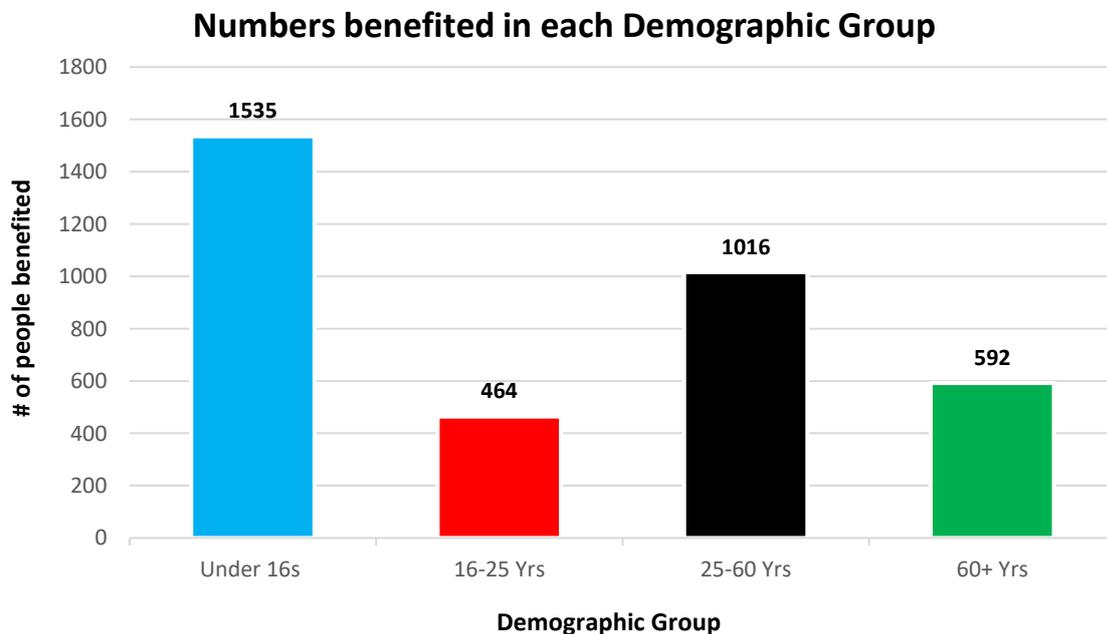

The applicants were then given the following demographic categories: -

- **BAME**
- **Under 16s**
- **16-25 Year Olds**
- **25-60 Year Olds**
- **60+ Year Olds**

Due to one of the recommendations incorporated into the scheme, this question has differed slightly from the TDY Microgrant Monitoring as it now asks the applicant to give specific numbers to each demographic rather than just ticking which ones had benefited from their event / activity.

It is again worth noting that this is also difficult for many organisers to determine. Their interpretation of which demographics benefitted from their project / event can differ depending on a number of factors.

The breakdown of numbers, which were identified as benefiting from each age demographic group, can be seen below:-

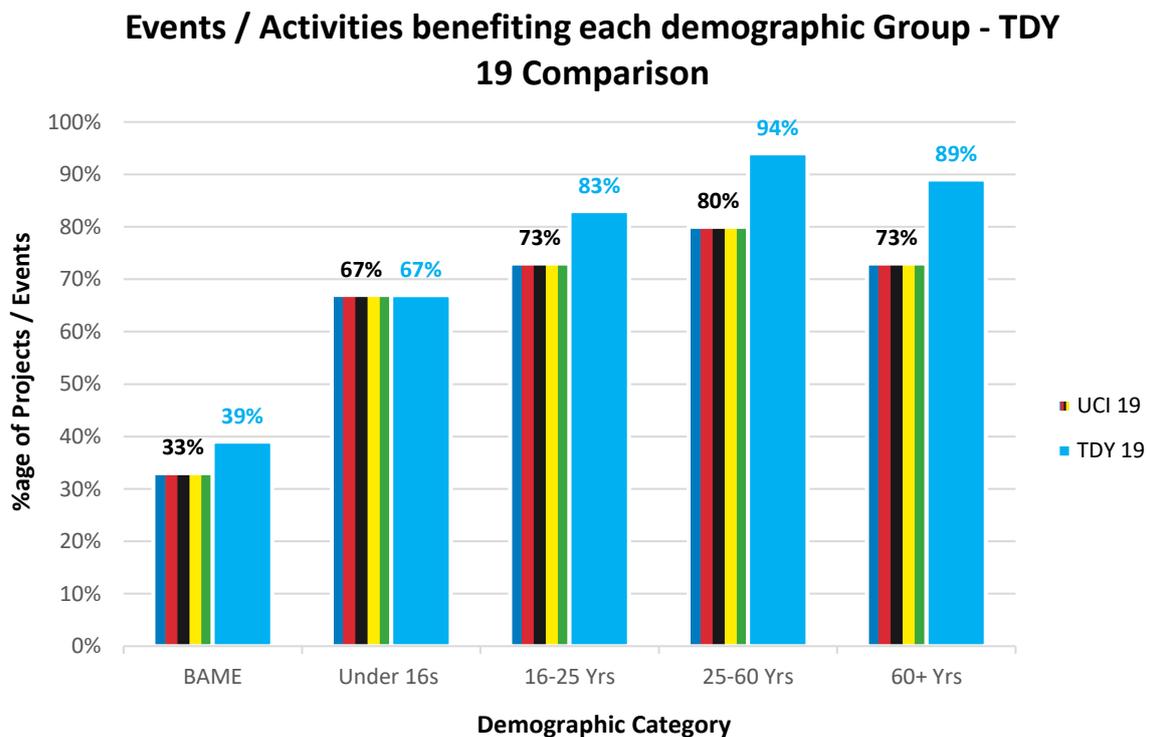

The team wanted the scheme to particularly but not exclusively benefit the **16-25** and **60+** age demographics as they were the ones identified by the Leeds Beckett University Social Impact research that were less engaged in previous Tour De Yorkshire events.

The numbers identified, show that the scheme has benefitted significantly more people in the other two age demographics **Under 16s** and **25-60 years**.

The most common age demographic by some margin was the **Under 16s**, however as previously covered, this will be as a result of the number of bids supporting School Children engagement and activities targeting the schoolchildren who were not at their school during event time due to Teacher Training days.

Though detailed numbers for each demographic are not available for the TDY Microgrant Scheme, comparisons can be made in relation to the percentage of applicants identifying that their event / activity benefited each category:-

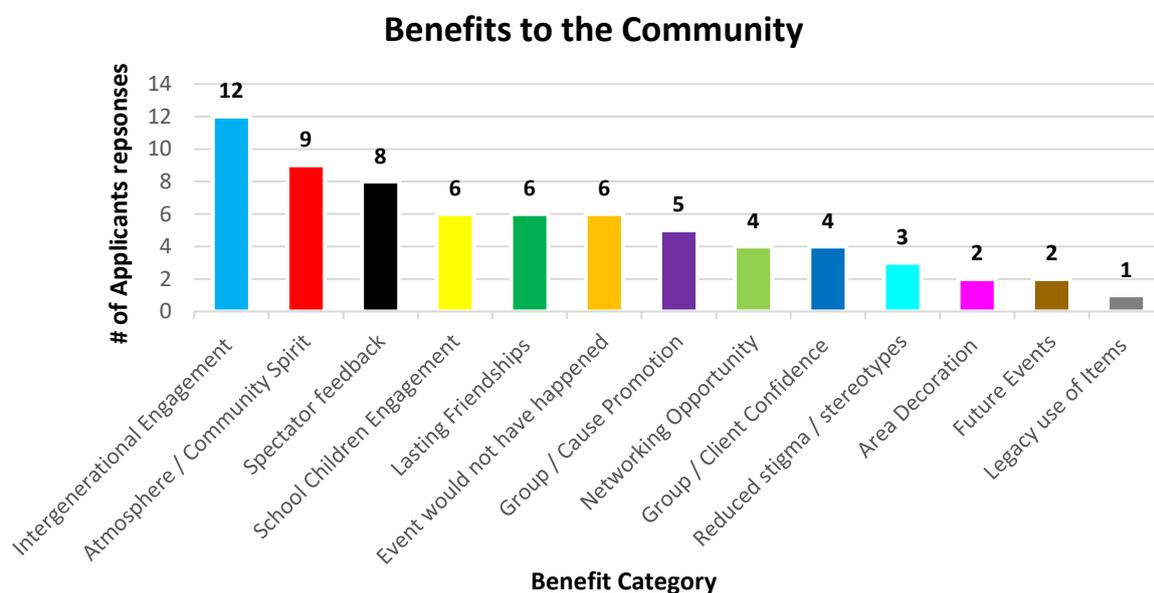

The above statistics show small reductions in percentages of bids being identified as benefiting each demographic category. Potentially this is due to the fact that many of the applicant's events / activities were targeted at specific demographics (e.g Elderly viewing Hubs + Schoolchildren activities) rather than benefitting the whole community i.e. decorative items.

5.4 Benefits to the Community

Question 4:- *“What benefits were created with the spending of this funding on your project / event?”*

The responses can be broken down into a number of categories as follows: -

The most popular benefit mentioned (80%) was **Intergenerational Engagement** where young and old came together to prepare and deliver their event / activities. This ties in with the goal of ensuring the elderly were engaged not only with the event but improving relationships with the younger sections of their community.

The second most common benefit (60%) was in relation to the **Atmosphere / Community Spirit** experienced by applicants and those attending the event / activities. On many occasions, this coincided with the third most common benefit (53%), which was **Spectator Feedback** being received from applicants on how much they enjoyed the festivities and being part of the big day.

The next most common benefit was in relation to amount of **School Children Engagement** during the applicant's events. This was expected due to the number of applications targeting that demographic.

As mentioned in **Section 5.1**, there were some responses that come under the wider aspect of community cohesion and these include the above and a number of mentions of **Lasting Friendships** being developed within the Community and **Reduced Stigma / Stereotypes** of clients engaging with spectators.

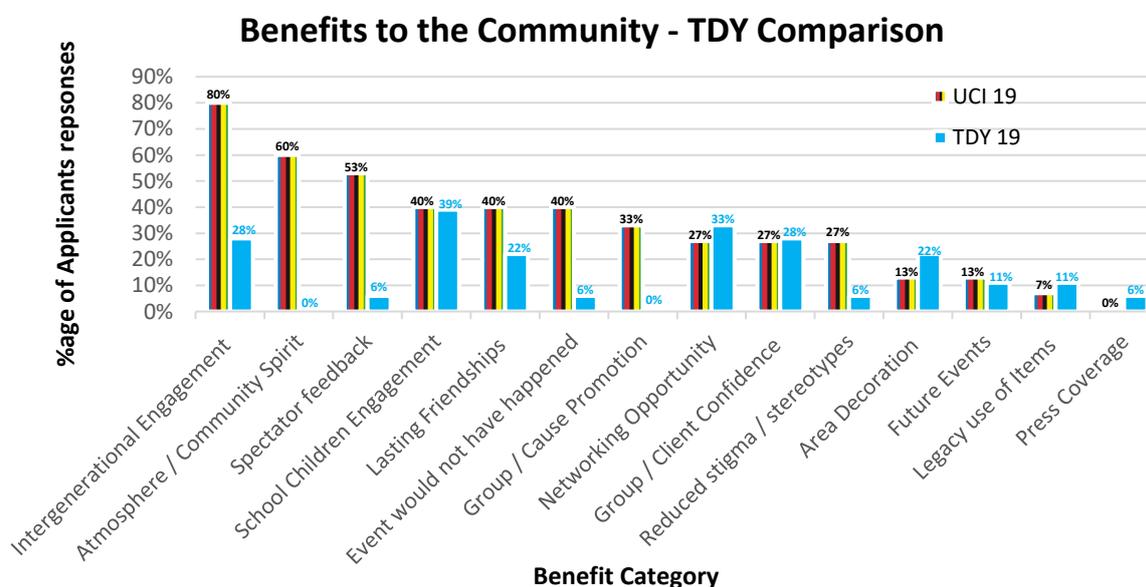

Other popular benefits mentioned which benefited the group specifically were **Networking Opportunities**, **Group + Client Confidence** and **Group / Cause promotion**. Many groups advised that their group have been able to take the opportunity this event gave them to increase the awareness of their group on a scale they may have not been able to do previously.

Longer lasting benefits which showed that a small pot of money can go further than just one event were shown by mentions of **Legacy use of items** and delivering **Future Events** as a result of the success surrounding this one.

Other responses, which can be identified as short-term benefits, would be **Area Decoration** and the applicants advising their **Event / Activity would not have happened** if it were not for the Microgrant being available.

In terms of comparing these responses to those received from the TDY Microgrant Scheme, there has been a large increase in responses which mention **Intergenerational Engagement** and **Spectator Feedback**.

There has also been a large increase in the number of responses where applicants advised their **event / activity would not have happened** without the Microgrant. This could be as a direct result of this scheme seeing an increase in applications for viewing Hubs and events rather than decorative items.

A small selection of positive comments relating to Community benefits can be seen below:-

“General feel good factor amongst residents, “it was good to see everyone smiling, cheering and generally enjoying the event.” **Edenthorpe Parish Council**

“The day helped people feel included in the wider community of Doncaster.” **People Focused Group**

“This is a great way for us to break down barriers around entering our church” **St Paul’s Community Church**

“There was a real buzz in the viewing area and a real sense of people enjoying a unique one off event.” **Royal British Legion -Thorne Branch**

“This project provided an opportunity for some of our most vulnerable members of the community to witness an event that they would otherwise not have been able to see.” **Bridging Generations**

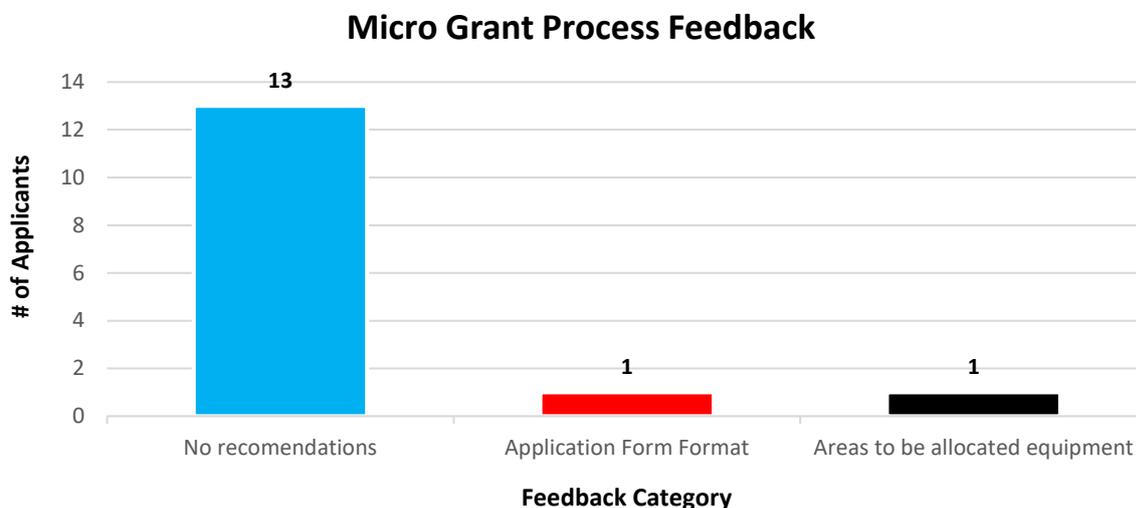

“A lot of our members can feel lonely and isolated and this provided such an opportunity to take part which they thoroughly enjoyed.” **Thorne & Moorends Healthy Living Group**

“This really made a difference to the lives of the older people attending, it brought together the young and older members of the community.” **Thorne & Moorends Youth Group**

5.5 Micro Grant Scheme Feedback

Question 5:- *“Do you have any feedback in relation to the process of applying for the funding and receiving your items so that we can improve future schemes?”*

The responses received from this section can be broken down into the following categories:

13 out of the **15** Applicants advised that there were no recommendations they could make to improve the Scheme, which is extremely positive, especially taking into account that this is only the second scheme the team has delivered.

This accounts to **87%** of applicants advising they had no recommendation's, an increase from **78%** who advised the same for the TDY Scheme.

Only two recommendations were made, which will be discussed below:-

1. Computer Access

One applicant advised they struggled to access the form on their computer. This wasn't an issue mentioned by any other applicant and this may be due to the fact this applicant was using an older version of Windows on their computer to complete the application. The applicant advised that a teenager helped them resolve this issue.

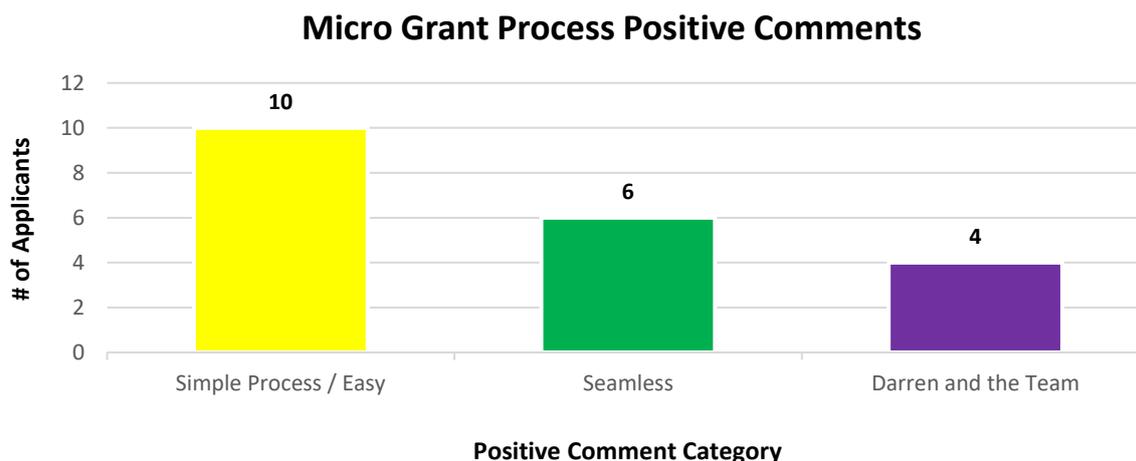

2. Decorative Items Allocation

One applicant advised that they believed areas should be allocated a certain amount of decorative items, providing they would be returned. This applicant applied for decorative items only. It was discussed with this applicant that decorative items such as Bunting and Painted bikes were available separately to the Microgrant Scheme.

These recommendation's will also be discussed in **section 8: Lessons Learnt (Page 29)**

This section of the feedback was designed to determine potential recommendations that the team could utilise for future schemes, however applicants also used this section of their feedback to provide positive comments on the scheme and how they found the process.

These comments can be broken down into the below categories: -

The majority of these comments were in relation to how **Simple / Easy** the process was. This was comforting for the team to hear as this was one of the main goals of the scheme and the application process to ensure as many groups / networks as possible could apply.

The second most popular response was in relation to how **Seamless** the process was and mainly covers how the process worked overall from start to finish.

The third most common response was in relation to **Darren and the Team** assisting with the whole process from completing the application, communicating throughout and ensuring the items were received after being ordered. This emphasises the importance of having a single point of contact when it comes to these schemes to ensure the process is managed effectively for the benefit of the applicant.

A small selection of these positive comments can be seen below:-

"I thought the system was easy, understandable and uncomplicated." "The purchasing of items by DMBC was actually easier for me – less hassle and a better value deal." **Friends of Sandall Park**

"The process was very easy." "Well explained and very accessible to smaller groups like ourselves." **People Focused Group**

"The application was straightforward and the form was not complicated to complete." "Another good aspect was the goods requested on the application were purchased and delivered, therefore minimising any confusion and abuse of the grant assistance." **Thorne Netball Club**

"We received exactly what we asked for and it was delivered well in advance which allowed us to be well prepared." "The form was easy to complete to so for me there is nothing that needs changing." **St Paul's Community Church**

"The process of the grant and application has been smooth and organised, I was a little apprehensive about the Council ordering all the materials rather than giving us the money to do this ourselves however, it worked really well and we collected the materials from the Civic Building when they arrived."

"Darren has been brilliant communicating with us and understanding when things have had to change." **Doncaster MIND**

6. Leeds Beckett University Research

Additional Questions

During Tour De Yorkshire 2019, Leeds Beckett University were keen on determining the success of the Micro Grant Scheme, especially as it had been one of the key recommendation's they had made as part of their research carried out during Tour De Yorkshire 2018.

Therefore, they requested that a number of follow up questions be put forward to applicants in order to determine the success of the scheme.

In the monitoring of the TDY 2019 Scheme, it was identified that the feedback and content received was extremely useful and therefore these questions should be utilised in the monitoring of future schemes including the UCI 2019 Microgrant.

The TDY 19 research carried out by Leeds Beckett University included detailed coverage of the responses received from these additional questions, as they were particularly keen on determining the success of the scheme. Therefore, the TDY 19 Microgrant Scheme Monitoring report did not go into detail about the responses.

However, even though the research carried out by Leeds Beckett University on UCI 2019 included Microgrant related coverage, it was not covered in as much detail due to the research focus being shifted towards physical related activity participation in the chosen locale of Thorne and Moorends.

Therefore, this monitoring report will now cover the responses to these additional questions.

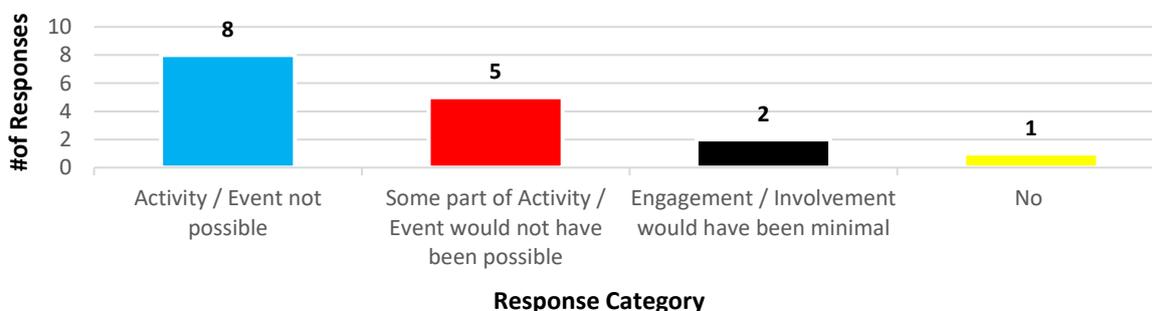

The full responses to the additional Questions can be found in **Appendix 12.5**.

6.1 Event planning without Microgrant funding

LBU Question 1:- *Would you have done things differently for the UCI event without this micro-grant? If yes, how?*

The responses received from this section can be broken down into the following categories:

Would you have done things differently without the Micro Grant?

The most common response was that the applicant's event / activity would not have been possible at all, if it was not for the Microgrant. This response was given by all applicants who had created Viewing Hub Areas along the route.

The Second most common response was applicants advising they would still have delivered an event / activity but with some aspect(s) of it not being possible. This response was common amongst applicants that were involved with or delivered the larger events such as **Friends of Sandall Park**, **Thorne Moorends Events Working Group** and **Thorne & Moorends Business Forum**.

A couple of applicants advised that community engagement and involvement within their area would have been significantly reduced if it were not for the items / services obtained through the scheme. This was prominent in the response from **Edenthorpe Parish Council** who advised that the decoration undertaken from the items they received persuaded many residents to then decorate their properties along the route.

A small selection of the positive comments can be seen below:-

*"A lot of residents were unaware of what the UCI cycle race was, without the Microgrant I do not think the village would have been quite so well decked out. **Edenthorpe Parish Council***

*"This Microgrant means that we will be able to do more than this event, especially in the spring / summer time." **People Focused Group***

*"The grant was able to provide additional activity that would not otherwise have been provided." **Thorne Moorends Events Working Group***

*"Without the grant we would not have had sufficient funds to put any kind of event on." **St Paul's Community Church***

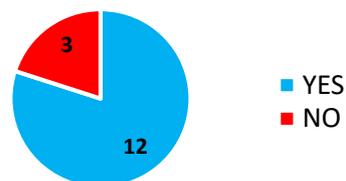

*"Yes the elderly viewing area would simply have not happened." **Royal British Legion -Thorne Branch***

*"I think it would have been extremely difficult for our members to attend without having a specific area and seating" **Bridging Generations + Thorne & Moorends Healthy Living Group***

6.2 Engaging new faces / people

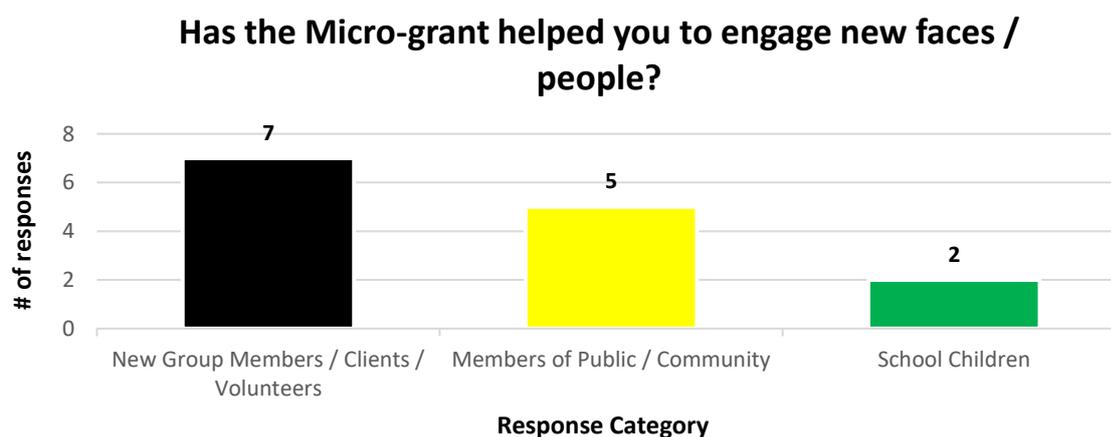

LBU Question 2:- *Has this micro-grant helped you engage 'new faces'/people in your activities/organisation?*

The responses received identified that **12** of the **15** Applicants (**80%**) advised that the Microgrant **did** help them engage “new faces” / People.

Applicants, who advised **NO** in their response, did not elaborate with further detail of why this may have been the case. However, it is worth noting that two of the applicants (**Thorne Moorends Events Working Group** and **Friends of Thorne Memorial Park**) are very experienced in delivering large-scale events in their community and were more than likely engaging with people they have met previously during these events and other work they carry out in the Community.

The **YES** responses received from this section can be broken down into the following categories of types of people they engaged with:-

The most popular response was in relation to applicants gaining **New members / Clients and Volunteers** as a result of engaging with people during their event / activity.

The second most popular response was where applicants advised that engagement of new people mainly came from speaking to **Members of the Public / Community** who had come to either watch the race or take part in their event / activity.

A small selection of the positive comments can be seen below:-

“We had approx. 10 new people join us for our event. These people have all been back to the building since the event.” **People Focused Group**

“Yes most definitely! It has enabled us to engage more young women and more mature women, typically working Mums who were previously struggling to access exercise” **Thorne Netball Club**

“This event brought us into contact with several new families, enabled us to include regular visitors and we also encouraged a few new volunteers to help from the local community.” **St Paul’s Community Church**

“As a result of the session and the group becoming more structure and planned events we are now seeing an average of 18 people at our sessions in comparison to an average of 10.” **Doncaster MIND**

6.3 Encouragement to do other events

LBU Question 3:- *Has this micro-grant encouraged you to do other events in the future? If yes, can you give details?*

The Majority of Applicants (**8**) advised that as a result of the Micro Grant and the success of their events / activities, they would be looking into delivering more in the future.

There were a number of these applicants who advised that they are now able to re-use the items purchased via the Microgrant to deliver future events in which they wouldn't have been able to previously. Other Applicants advised they are now able to deliver activities as a result of the networking opportunity which allowed them to meet other community groups / members.

There were **4** applicants who advised that the Micro-grant has not specifically encouraged them to deliver future events. However, all of these responses were in relation to the applicant already being involved in events on a regular basis within their community.

There were responses received from **3** applicants who advised that though they are not particularly going to deliver their own events of the success of the Microgrant Scheme, they would be interested in getting involved and taking part in similar large-scale events in the future, if the opportunity arose.

A small selection of the positive comments can be seen below:-

"Yes, we will be able to facilitate similar recruitment events in the future due to the items purchase with the grant assistance." **Thorne Netball Club**

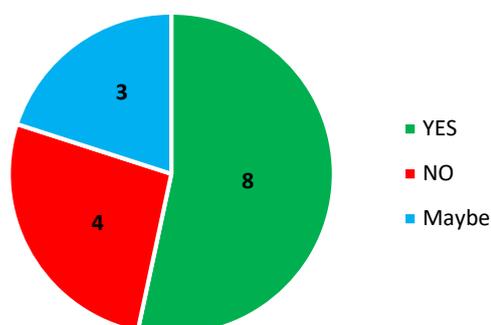

"This grant has given us the opportunity to plan more structured activities around certain events which are taking place both in Doncaster and special occasions." "This is giving our clients the opportunities to take part and visit events and activities that they wouldn't have previously considered." **Doncaster MIND**

"The grant gave our clients the opportunity to try out the new cycle track without the worry or concern around cost and after this session our clients have requested to plan another session into the group timetables." "The group leaders will be looking at booking another event in the new year. We are hoping that this will eventually support the clients into accessing a cycling club in the near future." **Doncaster MIND**

"Again, most definitely yes. Sandall Park have an Easter event that I shall be attending." **Wheatley Hills Tennis Club**

"We enjoy providing varied events for our community and the more diverse we can be the better. We would happily come on board with new / annual Doncaster / Yorkshire community events." **St Paul's Community Church**

Future Events Encouragement

7. Good News Stories

As part of the Question 4 on the Monitoring Form, applicants were asked if they had any “**Good News Stories**” from their event.

This kind of information is difficult to capture as there would be occasions where such occurrences were not obvious to the event organiser(s) and difficult to determine without interviewing every attendee to their event.

However, many of the applicants did manage to determine such stories and though they have been mentioned in some form as part of the snapshots of positive comments of the previous sections of this report, there is some that the team believe are worth highlighting again.

Friends of Sandall Park were particularly keen on letting the team know how well their Community Partners and networks did on the day:-

“The Tennis Club had free taster sessions which engendered interest and they have been invited to attend our future events.”

“Cycle Buddy (repairs and maintenance) and Wheels All Round (conversion/sales/electric) had numerous visitors and much interest.”

“Pedal Ready enrolled new people on to their cycle training programme”

“Doncaster Talks brought their bus and did a roaring trade in getting their surveys completed.”

Thorne Netball Club provided the following feedback relating to potentially a completely new client base for them:-

“From having a clear netball space provided by the gazebo, passing residents and staff of a nearby nursing home came over to talk with us. One of our members was innovative in adjusting the hoop to enable the residents to engage in taking shots from their wheelchairs. The staff member has welcomed to club to complete some similar activities within their nursing home, thus demonstrating the accessibility of sports to those with physical and mental disabilities when appropriate adjustments are made.”

They also advised about an opportunity that arose which allowed them to demonstrate women’s ability to engage in sport and inspire the younger generation of females:-

“A local Father had brought his two young daughters to witness the women’s cycle race, as he had wanted to demonstrate to his daughters that women are just as able to engage in sports as men. This was therefore emphasised as we met with his daughters, engaging them in our activities and informed them that the England Netball ladies have won gold in the Commonwealth games and achieved a huge success at the recent World cup. We were able to tell them about our team and the leagues we participate in.”

Doncaster MIND who had the opportunity to utilise the Microgrant fund to deliver two separate activities within their group (*Arts and Crafts sessions and Doncaster Cycle Track Sessions*). Were keen on letting the team know about two of their clients who had great experiences during these sessions and how it has improved their lives as a result:-

ARTS + CRAFT SESSIONS

“One client stated that she really enjoyed participating in a more structured group, learning new skills, making friends and becoming part of a wider community supporting events and

activities that she wouldn't have taken part in before. She stated that her mental health is improving as she feels part of something bigger."

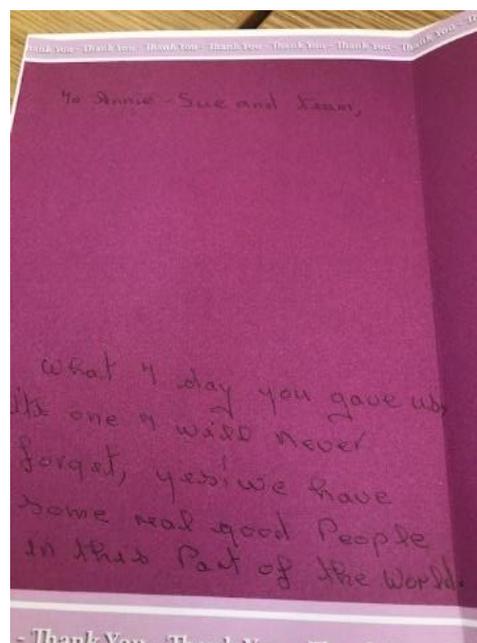

CYCLING HUB SESSIONS

"One of our clients has COPD which restricts him from taking part in physical activity; this sometimes causes additional social isolation due to him not being able to take part. At the cycling event he attended to spectate and have a coffee with the group after however due to the accessible bikes he was able to take part in the activity with the support from one of the staff at the cycle track. He was so grateful that he could participate in an activity that was fully inclusive both of this mental health and physical disability this meant a great deal to him and he is keen to attend the track again in the near future."

And finally, the following "Good News Story", came from **Royal British Legion -Thorne Branch** and really sums up how a small pot of money can not only benefit a large section of the Community, but also how it can have genuine meaningful impacts to individuals:-

"One elderly lady who used the viewing area has since commented it was one of the best days of her life and sent a Thank You card to Cllr. Susan Durant to receive on behalf of the community that had come together to deliver the event."

8. Lessons learnt

Though the majority of the feedback received from the Monitoring process of the Micro Grant Scheme has been positive and glowing, there has been a small number of new recommendation's suggested by applicants and identified by the team throughout the process.

8.1 Schools

Though none of the Applications received were from Schools, a number of Schools engaging with the team enquired about the scheme and whether or not they could apply. This was also prominent in the Tour De Yorkshire 2019 School engagement process.

It is worth noting that none of the schools were disappointed once advised they could not and were very understanding. However due to the impressive amount of School involvement and engagement with Tour De Yorkshire and UCI this year (over 8300 children) it is worth discussing the possibility of opening up the Scheme for schools to apply in the future or maybe a separate scheme for Schools only.

Those schools who showed interest in applying, advised they would have requested small waving flags and Land Art materials. Though the Land Art items would probably be declined for reasons mentioned in the TDY 19 Microgrant Scheme report, the Waving flags are a significantly cheap item to purchase in high numbers.

8.2 Application Form

One of the recommendation's identified from the TDY Microgrant Scheme was to ensure hard copies were made available to potential applicants who may not have a computer. However, during this scheme, one applicant advised they were unable to open the application due to them owning a PC with an older version of windows, which the document would support. Thankfully, on this occasion, the applicant had a friend assist them in completing the application form for them on another PC.

Though it is believed this is a rare occurrence, discussions will be made with the internal IT department on the possibility of having a version of the document, which could be downloaded by PCs with older versions of the Windows software.

8.3 Decorative Items

As identified in this report, the number of applications received requesting decorative items, has significantly reduced compared to the TDY Micro grant Scheme. However, those that did request such items were either initially unaware or unsure about the amount of free decorative items that would be donated to community groups along the route, separate to the Microgrant Scheme.

Though the scheme does allow for such items to be purchased, the team would prefer that the scheme be utilised for other activities / events / services and the decorative items that an applicant may require be donated from the large inventory of Bunting / Bikes and Banners they have now accumulated from previous events.

Therefore, there is potential to add a note in the application form criteria section, which would advise that decorative items would be made available separate to the scheme and upon request. This would also confirm that the scheme would still support such bids but allow applicants to potentially look at other options for utilising the fund available.

8.4 Monitoring

On a small number of occasions, some applicants found it difficult to complete the monitoring form in a short timeframe after the event. This was due to a number of unforeseen factors, which are difficult to avoid. However, the delay in receiving feedback also had an impact on the timeframe available for completing this report.

One of the biggest reasons for applicants delay in completing the form was the time it would take them in their busy schedules to actually get to a computer to download the form, complete it and then send through or complete a hard copy and post.

Therefore, one recommendation which could be made to attempt to reduce the delay, would be to allow the option for applicants to have a member of the Team visit them to assist in this process. The visit could be made during one of their group meetings or sessions where the team member would populate the form on a laptop whilst they gave the feedback.

8.5 Breakdown of Lessons Learnt

A full list of Lessons learnt can be seen below: -

- 1. Further discuss the possibility of opening up the Scheme for schools to apply or setting up a separate Scheme solely for Schools.**
- 2. Look into the possibility of the Application form format being available for PCs with older versions of Windows Software.**
- 3. Emphasise on the Application form that decorative items are available separately from the scheme and can be donated on request.**
- 4. Provide Applicants with an option to receive a visit from the team to assist them in completing the Monitoring form shortly after the event.**

9. Next Steps

Next steps for this particular scheme are as follows: -

- Collect Bunting and other items back from those applicants who no longer require them to use for future events
- Ensure monitoring of payments on the UCI Expenditure code to ensure figures match those on record.
- Ensure payment for Services requested via invoices are complete
- Work closely with Leeds Beckett University to ensure data needed for Research is available or received
- Ensure this report is made available to relevant internal departments / colleagues / partners who may be able to utilise its findings into their field of work including similar schemes or initiatives.

Next Steps for future Schemes are as follows: -

- Incorporate recommendation's highlighted in Lessons learnt section of this report
- Receive feedback from internal departments / colleagues / partners on the content of this report to ensure it provides useful information which can enable them improve their work streams.

12.1 Application Form

UCI 2019 Road World Championships

Get Doncaster Cycling Fund Guidance

What is the Get Doncaster Cycling Fund?

As part of the borough wide Get Doncaster Moving Programme, and to celebrate the town's role in hosting the UCI Road World Championships 2019, this fund has been introduced as part of a programme of activities allowing Get Doncaster Cycling to promote cycling as a recreation, sport and a mode of transport to Doncaster residents.

The Get Doncaster Cycling Fund has been developed to offer grants of up to £200 to eligible groups/networks/organisations within the borough of Doncaster. These grants are being offered to facilitate a 'festival atmosphere' and encourage people to be more active in the surrounding communities around the UCI Road World Championships 2019 on the Friday 27th September.

This grant could help fulfil the delivery of a project in your local area to contribute to a positive and vibrant festival atmosphere.

Please note:

- You **do not** need to be a formal, constituted group to be eligible
- Businesses / companies and Schools **are not** eligible to apply
- Monies from the fund will **not** be paid directly, items/services will be purchased by DMBC on behalf of successful applicants (and collection arranged)

What can the fund be used for?

DMBC are willing to provide funding for projects that can demonstrate a contribution to increasing levels of physical activity and promoting engagement in cycling within local communities of Doncaster. This may include:

- Leading cycle based activities to engage communities
- Running Sports or Physical activity sessions
- Using banners, bunting and/or flags to decorate areas along a cycle event route
- Hosting a 'viewing hub' perhaps providing:
 - Respite for vulnerable residents
 - Light refreshments
 - 'Big screen' footage of the event
 - Physical activity opportunities or promotion

We are particularly interested in (although not exclusively) applications that:-

- Will engage communities along the route:
 - Bessacarr, Intake, Wheatley Hills, Edenthorpe, Dunsville, Hatfield, Thorne
- Demonstrate an ability to sustain engagement following the initial support provided for the event; this may relate to physical activity/sport and/or volunteering
- Applications that target, although not exclusively:
 - BAME populations

- 16-25 year olds
- 60+ year olds
- Applications which can evidence "match funding", where the applicant will match funds requested to purchase similar or different items for their event / activity.

Please note:

The Get Doncaster Cycling SEED fund will **not** pay for;

- Activities promoting religious or political beliefs
- Professional fundraisers
- Any activities outside of the borough of Doncaster
- Holidays, prizes or food (other than light refreshments)
- Uniforms
- Goods or services that have already been bought or ordered
- Volunteer expenses

Points for consideration:

- Think carefully about the aims of the project to ensure that they are realistic.
- Plan ahead – you need to be aware that the fund may take several weeks to process.
- Working in partnership and through networks can often strengthen the support given to the group/network/organisation.
- Include supporting evidence where you feel it would strengthen the application.
- It must be demonstrable that the project represents good value for money.
- The breakdown of costs for the items needs to be accurate and include postage and packaging.
- Following the event, DMBC will require successful applicants to complete monitoring forms and engage in research work measuring the benefits of the scheme.
- The above guidance information should not be considered as exhaustive and if you are unsure of your project's eligibility, or would like clarification, please contact:-
Darren Simpson (Tel: 01302 737721 email: darren.simpson@doncaster.gov.uk)

Completed application forms should be returned by email to:-
simran.kaur@doncaster.gov.uk

Or by post to:

Simran Kaur, Leisure Services, Doncaster Metropolitan Borough Council, Civic Office,
Waterdale, DN1 3BU

The deadline for UCI 2019 applications is:-

****Friday 9th August 2019****

St Paul's Community Church	Intake	<ul style="list-style-type: none"> • We will be holding our bi-monthly Preloved Uniform sale with community coffee morning that day so it seemed a great opportunity to extend the event for our community. • We will have a member of The Stronger Families Team present till 12pm to engage with the community as a whole and help point them to local healthy activities. • We will be playing the racing live on a screen in the church with cycling themed children's crafts and games available at the same time. • A healthy eating picnic style buffet will be available with an emphasis on trying fresh and raw foods during a taster session and I am hoping to have some outdoor games – weather permitting . • I have contacted a local representative from Doncaster Triathlon Club who is a fully qualified personal coach and nutritionist and hope to have them on site. • I will be engaging the local primary schools in a colouring competition and will encourage them to have an 'active' time during the school day which I will hopefully be helping with. 	<ul style="list-style-type: none"> • We aim to encourage people to access healthy lifestyle activities that are local / accessible and hope that this is of long term benefit to their health. • We will be inviting adults to our men's /ladies nights so to encourage community cohesion and reduce loneliness – therefore helping to reduce mental health problems – it has been medically proven that exercise and friendship groups reduce mental health problems and this is something we see a lot of in our community. • Raising awareness of free activities too such as Park Run, walking groups and sites such as Get Doncaster Moving. 	<ul style="list-style-type: none"> • We are located close to the cycle route and feel that as we live in a community which has limited financial infrastructure • We have a moral obligation to provide opportunities which encourage the residents to try to improve their health and mental wellbeing. • We often hold outdoor events so to engage with our community and feel this is a great opportunity to do so in a way that can hopefully benefit them long-term. • Here at St Paul's we aim to offer everything to our community for free because we know this is the best way to support them and to encourage them to engage and try new things. • Because of this we are often looking for external funding to help support all that we do from school's work to community craft sessions. • All help is greatly appreciated by us and our community and any financial assistance we get then enables us to provide more for our community than we could ever possibly manage on our own. • Many thanks for considering our application and we look forward to putting on this event. 	Several Arts + Crafts Items Refreshments	Several Arts + Crafts Items Ordered from different supplier £45 Voucher Instead of refreshment's purchased direct	£115.32	£113.02

Royal British Legion - Thorne Branch	Thorne	<ul style="list-style-type: none"> Protected seating/viewing area during the races for disabled and elderly people and a quieter rest area during the wider fan zone event. The Thorne Times are supporting the area and making their toilets available on ground floor for users of the area. There will also be tea and coffee provision in the area. 	<ul style="list-style-type: none"> Providing a suitable viewing area for elderly/disabled who may otherwise be deterred from getting involved in the event. 	<ul style="list-style-type: none"> The funding is required to provide appropriate seating/table/rest facilities for those using the area. 	Patio Sets x3		£179.97	
Bridging Generations	Thorne	<ul style="list-style-type: none"> The funding applied for would be to purchase outdoor table and chairs including a couple of additional chairs that we would be able to put outside the Thorne Times, Jacks Discount (which is a vacant shop next door to the Thorne Times) and along the road closure area for the group(s) to be able to watch the UCI. The group is made up of older more vulnerable members of the local community with a wide range of health problems including poor mobility. We have spoken with the Thorne Times who have agreed that we can use this as a designated area to enable us to provide a safe viewing position to watch as the UCI pass through Thorne Town Centre. We will be working in partnership with other local groups and organisations to encourage and support more vulnerable members of our community to be able to participate, feel involved and enjoy the event. Together we will provide a tea urn, tea, coffee etc to make sure they have drinks for the day and the Thorne Times have said that they will be able to use their toilets. The total amount for the patio set and a couple of additional chairs comes to £203.77 and we are able to pay the additional £3.77. We have spoken with Mel Wake from the Thorne times who is fully supportive as are the Thorne & Moorends Town Council Events Committee. 	<ul style="list-style-type: none"> This event will help address social isolation and loneliness, the opportunity to meet new people (from the other two groups), make friends and feel involved. Our older, more vulnerable members of the community including those with disabilities will have the opportunity to see and experience a once in a lifetime event in their neighbourhood. The tables and chairs will enable them to sit in comfort have a cup of tea or coffee whilst enjoying the event. This experience will give them something that they can tell their Grandchildren and Great grandchildren about in the future. A feel good factor, helping with the health & wellbeing of those attending whilst bringing some joy and laughter for the day, helping to make them feel valued 	<ul style="list-style-type: none"> The group does not have any outdoor table and chairs, this will enable vulnerable members of the community to participate in an event that may never come through our area again. We would then reuse the table and chairs for activities especially in the summer for the group There three groups working in partnership are the Royal British Legion, Bridging Generations and Thorne & Moorends Healthy Living Group. All three groups are applying for funding for tables and chairs to make sure that we are able to provide enough seating for our older vulnerable members of the community. 	Patio Sets x3 Patio Chairs	Deck Chairs x 11 To be shared by 3x Groups Plastic Chairs x 10 (40 total) To be shared by 3x Groups	£203.95	£605.24
Thorne & Moorends Healthy Living Group	Thorne	<ul style="list-style-type: none"> We would like to purchase outdoor table and chairs that we would be able to put outside the Thorne Times & outside Jacks Discount which is vacant and along the road closure area for the group to be able to watch the UCI. The group is made up of pensioners with varying health problems and poor mobility. The Thorne Times has agreed that we can use this as a designated area for them to have a good safe viewing position to watch as the UCI pass through Thorne Town Centre. We will provide a tea urn, tea, coffee etc to make sure they have drinks for the day as well. The amount comes to £203.77 and we are able to pay the additional £3.77. Thorne Netball Club	<ul style="list-style-type: none"> The event was a successful day, enabling us to increase awareness of our club and access to netball within the local area. The event resulted in us recruiting at least five new members to our back to netball training sessions. We were able to engage with children although at present we don’t cater for under 16’s it may mean that there is a need for traditional sports within and outside school. One of our qualified coach’s will be in touch with a local care home to try and engage with the residents. 	45	<table border="1"> <tr><td>BAME</td><td>-</td></tr> <tr><td>UNDER 16</td><td>20</td></tr> <tr><td>16-25</td><td>10</td></tr> <tr><td>25-60</td><td>10</td></tr> <tr><td>60+</td><td>5</td></tr> </table>	BAME	-	UNDER 16	20	16-25	10	25-60	10	60+	5	<ul style="list-style-type: none"> Having the gazebo and table allowed us to have a dedicated netball stand, in which we were able to display netball promotional materials. It also facilitated interest from passing patrons, who to the time to browse and enquire who we were and allowed us to engage in discussing netball and access to fitness in the local area. We were able to allow multiple people (children, teenagers, adults, and older people) to participate in some basic netball techniques. Whilst our club is only open to adults, we utilised engaging children to facilitate conversations with their parents (who are our target audience). We would also hope that such activities will generate interest in netball both at present and in the future, i.e., children requesting to play this at their school and hopefully be interested in joining our club when old enough. <p>Good news stories:</p> <ul style="list-style-type: none"> From having a clear netball space provided by the gazebo, passing residents and staff of a nearby nursing home came over to talk with us. One of our members was innovative in adjusting the hoop to enable the residents to engage in taking shots from their wheelchairs. The staff member has welcomed to club to complete some similar activities within their nursing home, thus demonstrating the accessibility of sports to those with physical and mental disabilities when appropriate adjustments are made. A local Father had brought his two young daughters to witness the women’s cycle race, as he had wanted to demonstrate to his daughters that women are just as able to engage in sports as men. This was therefore emphasised as we met with his daughters, engaging them in our activities and informed them that the England Netball ladies have won gold in the Commonwealth games and achieved a huge success at the recent World cup. We were able to tell them about our team and the leagues we participate in. 	<ul style="list-style-type: none"> The application was straightforward and the form was not complicated to complete. I felt that by capping the grant amount also left no question and brought focus to the application. Another good aspect was the goods requested on the application were purchased and delivered, therefore minimising any confusion and abuse of the grant assistance.

St Paul's Community Church	<ul style="list-style-type: none"> We had a positive event with engagement with lots of families who live locally. One of two schools engaged with a competition we ran. Lots of people volunteered to help run the event from the local community and other churches in the area. We had Wheatley Hills Tennis Club and Armthorpe Wolves FC provide outdoor tennis and football activities while we supervised crafts, games a quiz and refreshments. The young people really enjoyed the large selection of fruit and vegetables we were able to provide- some of which they had never tried and the parents appreciated that the food was healthy to coincide with it being around sports. I was allowed to engage in a school assembly to promote the cycling in the area as well as our event. 	40	BAME	-	<ul style="list-style-type: none"> We were able to have conversations / be relational with people from our community that we don't always see or engage with. This is a great way for us to break down barriers around entering our church and was a great opportunity to tell people about the other events, sessions and community groups we run. These types of opportunity are difficult financially for us as we live in a part of Doncaster which has high unemployment – so the money we receive in donations is very small. These types of grant help us to engage with our community in fun and diverse ways that alone we could not afford. 	<ul style="list-style-type: none"> We received exactly what we asked for and it was delivered well in advance which allowed us to be well prepared. The form was easy to complete to so for me there is nothing that needs changing.

12.5 Leeds Beckett University Additional Questions Spreadsheet

APPLICANT	Q1. Would you have done things differently for the Tour de Yorkshire event without this micro-grant? If yes, how?	Q2. Has this micro-grant helped you engage 'new faces'/people in your activities/organisation? If yes, can you give us some more details (NB. no personal information required)?	Q3. Has this micro-grant encouraged you to do other events in the future? If yes, can you give details?
Friends of Sandall Park	<ul style="list-style-type: none"> Without the microgrant we wouldn't have provided the re-usable water bottles, which were a huge hit with cyclists and pedestrians alike Probably not the flags either, though we did use our own stock of Union Jack Flags. I wouldn't provide the lunch bags that we did – the grant paid for some of the contents and FoSP paid for the rest. They were intended for disabled/special needs attending our viewing area but the take up for this was negligible – the area was used though by elderly. Elderly and children received our lunch bags. 	<ul style="list-style-type: none"> Most definitely – our volunteers engaged the public at every opportunity whilst giving out flags and lunch bags. Many people who attended weren't cyclists or interested in cycling, but wanted to support the park and Doncaster. Some people had never been to the park but had seen our event advertised. New people signed up to the cycle training. 	<ul style="list-style-type: none"> Not really, we have our own set event programme.
Edenthorpe Parish Council	<ul style="list-style-type: none"> A lot of residents were unaware of what the UCI cycle race was, without the microgrant I do not think the village would have been quite so well decked out. It would have taken a lot more persuasion for residents to decorate their gardens along the route. When things are provided then it is accepted easier. 	<ul style="list-style-type: none"> It was just a pleasure on the day to see everyone out, cheering and waving. The community chatted to each other. It was definitely a feel good sort of day. 	<ul style="list-style-type: none"> We are willing to support and celebrate public events which are relevant to the village of Edenthorpe. We are a close-knit village and have a good camaraderie amongst us.
People Focused Group	<ul style="list-style-type: none"> This Microgrant enabled us to get a new gas BBQ. In the past we have had to borrow one from another community organisation which means we can not always do events on the day which we want. This Microgrant means that we will be able to do more than this event, especially in the spring / summer time. 	<ul style="list-style-type: none"> We had approx. 10 new people join us for our event. 5 were homeless and heard about the free food. 4 were young people from the local high school which had closed for the day due to traffic issues. These people have all been back to the building since the event. 	<ul style="list-style-type: none"> We are currently planning a Halloween event using the anticipate fund. We are planning future events using the BBQ in Spring / Summer.
Doncaster Council – Countryside Team	<ul style="list-style-type: none"> The engagement wouldn't have been as meaningful as the children really enjoyed making the bunting and placing their hand prints on the cards. 	<ul style="list-style-type: none"> Yes. Engaging with each class was particularly meaningful as in previous visits to school has been in full year groups and I have not had chance to speak to the children individually. 	<ul style="list-style-type: none"> Not at present but if the chance arises in the future I will certainly apply again, very quick turnaround and no hassle. The funding was extremely useful and has helped Thorne and Moorends out massively in showing the community spirit.
Thorne Moorends Events Working Group	<ul style="list-style-type: none"> The grant was able to provide additional activity that would not otherwise have been provided. 	<ul style="list-style-type: none"> No. 	<ul style="list-style-type: none"> We are already very active with delivery of local events.
Thorne Netball Club	<ul style="list-style-type: none"> Without a designated place, we have struggled to engage with the public as much at the event. In addition, as the weather was poor- we were able to continue despite this, without the gazebo this would not have been feasible. The gazebo generated more interest and opened more conversations, enabling focus to the display and attract passers-by giving a professional appearance. The table allowed us to display items, allowing passers-by to browse when we were engaged in activities other conversations. Combined, the grant purchases allowed us to engage with more people and more successfully. It will enable us to attend more events to promote our sport and fitness in general. 	<ul style="list-style-type: none"> Yes most definitely! It has enabled us to engage more young women and more mature women, typically working Mums who were previously struggling to access exercise (i.e., being too intimidated to join a gym, unable to afford expensive classes, wanting the access things locally). Encouraging team spirit and including all comers into the netball family. 	<ul style="list-style-type: none"> Yes, we will be able to facilitate similar recruitment events in the future due to the items purchase with the grant assistance.
St Paul's Community Church	<ul style="list-style-type: none"> Without the grant we would not have had sufficient funds to put any kind of event on. 	<ul style="list-style-type: none"> This event brought us into contact with several new families, enabled us to include regular visitors and we also encouraged a few new volunteers to help from the local community. 	<ul style="list-style-type: none"> We enjoy providing varied events for our community and the more diverse we can be the better. We would happily come on board with new / annual Doncaster / Yorkshire community events.

Royal British Legion - Thorne Branch	<ul style="list-style-type: none"> • Yes the elderly viewing area would simply have not happened. • As it was the area proved to be one of the more successful elements of the day as the presence of 'cover' and shelter from the elements proved to be invaluable. 	<ul style="list-style-type: none"> • No. 	<ul style="list-style-type: none"> • We are already very active with British Legion affairs largely being the Poppy Appeal however we do already have a regular presence at local events.
Bridging Generations	<ul style="list-style-type: none"> • I think it would have been extremely difficult for our members to attend without having a specific area and seating 	<ul style="list-style-type: none"> • Yes, we had several members of the public who came in to see what was happening and was also treated to a cuppa and a bun. • This enabled them to talk to people, have a friendly chat and find out what is happening in the community 	<ul style="list-style-type: none"> • We will be looking at some ideas for further activities
Thorne & Moorends Healthy Living Group	<ul style="list-style-type: none"> • I think it would have been extremely difficult for our members to attend without having a specific area and seating 	<ul style="list-style-type: none"> • Yes, we had several members of the public who came in to see what was happening and was also treated to a cuppa and a bun. • This enabled them to talk to people, have a friendly chat and find out what is happening in the community 	<ul style="list-style-type: none"> • We will be looking at some ideas for further activities
Friends of Thorne Memorial Park	<ul style="list-style-type: none"> • The grant was able to provide additional activity that would not otherwise have been provided 	<ul style="list-style-type: none"> • No 	<ul style="list-style-type: none"> • We are already very active with delivery of local events.
Thorne & Moorends Youth Group	<ul style="list-style-type: none"> • No 	<ul style="list-style-type: none"> • The event has helped promote the activities that the group deliver within the local community 	<ul style="list-style-type: none"> • The group is very active within the local community, however it will lead to more projects that help bridge age gaps and support partnership activities
Thorne & Moorends Business Forum	<ul style="list-style-type: none"> • The face painter would have otherwise charged a fee which would have reduced the numbers able to take part. 	<ul style="list-style-type: none"> • Yes, through speaking with people it made people more aware of our organisation and its aims. 	<ul style="list-style-type: none"> • Yes, we are working with other organisations to bring forward events in the future, although these haven't been decided and finalised at this point.
Doncaster MIND	ARTS + CRAFTS <ul style="list-style-type: none"> • If we didn't have the grant we wouldn't have planned the cycling themed arts & crafts session and then the clients wouldn't have had the opportunity to go and support the cycling event with the support of our staff. • The clients were able to fully participate by holding their banners and bunting which they made themselves, feeling proud and very much part of the event. 	ARTS + CRAFTS <ul style="list-style-type: none"> • We advertised our event both on social media, word of mouth and on our website. • We had two new people attend our session who had not previously attended any of our services but has seen our event planned on social media. • As a result of the session and the group becoming more structure and planned events we are now seeing an average of 18 people at our sessions in comparison to an average of 10. 	ARTS + CRAFTS <ul style="list-style-type: none"> • This grant has given us the opportunity to plan more structured activities around certain events which are taking place both in Doncaster and special occasions. • This is giving our clients the opportunities to take part and visit events and activities that they wouldn't have previously considered. • We now have a course programme for this group and the group are keen to mix with other arts & craft groups to share ideas and learn new skills.
	CYCLE SESSIONS <ul style="list-style-type: none"> • We feel that if we hadn't been successful with the grant then our group maybe wouldn't have attended the track and tried out the cycling sessions. • Our groups are planned where people can drop in and out (they do not have to attend each week), we also ask our clients to contribute a small amount of money towards the activities we have planned, unfortunately as disposable money can be a problem for some of our clients they will miss out on activities or maybe not try something new. • As this was a free activity thanks to the grant it meant that people could try this out without the concerns or worries relating to the cost of the session. • We sometimes find that with new activities our numbers of clients will be low due to this however this was not the case. 	CYCLE SESSIONS <ul style="list-style-type: none"> • Although we haven't seen any new members in these activities we did have a client who hasn't used the services for quite some time due to really severe mental ill health but he attended the cycling session with a support worker who is keen to introduce more of his clients to the group so we are hopeful that this will introduce new members to the group. 	CYCLE SESSIONS <ul style="list-style-type: none"> • The grant gave our clients the opportunity to try out the new cycle track without the worry or concern around cost and after this session our clients have requested to plan another session into the group timetables. • The group leaders will be looking at booking another event in the new year. • We are hoping that this will eventually support the clients into accessing a cycling club in the near future.
Wheatley Hills Tennis Club	<ul style="list-style-type: none"> • In all honesty, I might not have attended either event. • However it has been beneficial for the club to have been welcomed at both venues as you can't put a price on getting together with local groups to create an excellent feel good factor for local residents who come to each event. 	<ul style="list-style-type: none"> • Most definitely yes. • Really good to know both groups and have contact details in order that we can support events in the future. • I handed out a lot of Tennis Club leaflets with the hope that some people will take up the game at our club. • Park Primary School showed interest in me going to their school. 	<ul style="list-style-type: none"> • Again, most definitely yes. • Sandall Park have an Easter event that I shall be attending.

END
